Re: Confirmation of Republication of Public Notice and Second Comment Period for Golden Mine M1976-007UG CN1 application

Ms. Bellantoni:

Per our previous conversation, the Division of Reclamation, Mining, and Safety has required republication of the public notice and extension of the public comment period for the above referenced permitting action. The Division noted during the adequacy review process that the initial public notice was only published once, on Sept 16, 2021, instead of the required four consecutive weeks. Although the date given for the end of the public comment period of October 27, 2021 in that single publication was correct for a four week run (four weeks plus 20 days after the last date of publication), the Division will require republication of the public notice for a full four consecutive weeks and the comment period will extend to 20 days after the date of the last publication.

It is our understanding that the public notice will be republished on December 9th, 16th, 23rd and 30th, 2021 with the end of the second comment period closing on January 19, 2022.

If you have any questions, please contact me at (303) 229-9414.

Sincerely,

Eric Scott – Environmental Protection Specialist
