Re: Annual Report M1981-207, Blue Pit

03/08/2022

Mining has continued West and North in the past year. 9 additional acres have been stripped of topsoil and over burden and stockpiled for future reclamation. Approximately 46,000 cubic yards of imported inert fill dirt was placed mid-mining area to raise floor to lessen reclaim slope height.

A handwritten signature in blue ink, appearing to read "SM", is positioned above a solid horizontal line.
