Re: Aggregate Industries South Platte Combined Replacement Plan (WDID 0202565)
Plan IDs 3614, 4773, 3624, 4772, 4616, 3437, 3376, 3650, 3668, 5475, 5829, and 6090
Water Division 1, Water Districts 2, 3, 5 and 6, Weld, Boulder, and Adams Counties

Approval Period: January 1, 2022 through October 31, 2022 (or December 31, 2022 if extended)

Contact information for Mr. Dains: 303-452-6611; jareddains@applegategroup.com

Dear Mr. Dains:

We have reviewed your letter dated November 29, 2021, requesting renewal of a substitute water supply plan in accordance with section 37-90-137(11), C.R.S., to cover depletions caused by gravel mining operations at multiple mine sites operated by Aggregate Industries ("Aggregate" or "Applicant") along the South Platte River mainstem, Lower Poudre River (Timnath Reservoir inlet to the confluence with the South Platte River) and St. Vrain River. This plan proposes to replace depletions resulting from current and past mining at twelve (12) sites, including two new additions, specified in Table A below. The required fee of \$3,084 (12 sites × \$257/site renewal fee) has been received (receipt nos. 10017141-10017152).

Table A - Pit Overview

Site Name	Stream Reach	DRMS Permit No.	WDID	Current Well Permit No.	New Permit Required	Exposed Surface Area (acres)
Jeronimus Pit	South Platte	M-1999-034 ^a	0203029	63281-F	No	5.6 ^b
Hazeltine Pit	South Platte	M-2004-031	0203030	63224-F	No	0
Brighton Pit	South Platte	M-1977-436	0203031	56993-F	No	1.0
Tucson South Pit	South Platte	M-2004-044	0203032	81342-F	No	3.0
Wattenberg Pit	South Platte	M-2004-051	0203034	78627-F	No	37.0
Platte Valley Pit	South Platte	M-1989-120	0203035	78626-F	No	63.8
Distel Pit	St. Vrain	M-1989-029	0503000	67433-F & 76960-F	No	N/A ^c
Tull Pit	St. Vrain	M-1994-027	0603001	74831-F	No	4.0
Irwin-Thomas Pit	St. Vrain	M-2016-054	0505626	82900-F	No	2.5
Fredstrom Pit	St. Vrain	M-2001-016	0505629	86019-F	No	0
W.W. Farms Pit	Lower Poudre	M-1999-098	0303014	76207-F	No	64.0
F-Street Pit	Lower Poudre	M-1992-069	0303015	67989-F	No	26.2

^a The Jeronimus Pit was added to the M-1999-034 permit (historically referred to as the "Fulton Lakes Pit") via an amendment approved by the DRMS on July 8, 2003. Aggregate had completed mining at the Fulton Lakes Pit and reclamation of the site and ownership was transferred to the City of Thornton. The only consumptive use of water under DRMS permit no. M-1999-034 is associated with the Jeronimus Pit.

^b 5.6 acres exposed after December 31, 1980 and 14.7 acres exposed prior to January 1, 1981.

^c The City of Longmont has assumed the augmentation responsibilities for lagged and future depletions from evaporation and consumptive use by wetlands vegetation at this site under their plan for augmentation decreed in case no. 09CW271.

The general location for each of the mining sites is identified in Table B below and depicted on the attached “Figure 1—Aggregate Industries Combined SSP Vicinity Map”.

Table B - Pit Locations

Site Name	Location
Jeronimus Pit	Section 16, T2S, R67W
Hazeltine Pit	Section 9, T2S, R67W
Brighton Pit	Sections 14 and 23, T1S, R67W
Tucson South Pit	Sections 1 and 12, T1S, R67W
Wattenberg Pit	Sections 25 and 36, T1N, R67W; Section 30, T1N, R66W
Platte Valley Pit	Section 30, T1N, R66W
Distel Pit	Sections 7, 8, 9, 17 and 18, T2N, R68W
Tull Pit	Sections 9, 16 and 17, T2N, R68W
Irwin-Thomas Pit	Section 11, T2N, R69W
Fredstrom Pit	Section 36, T3N, R70W; Section 31, T3N, R69W; Section 6, T2N, R69W
W.W. Farms Pit	Sections 32 and 33, T6N, R66W
F-Street Pit	Sections 34 and 35, T6N, R66W

This SWSP previously included the Teti Pit (WDID 0203027) and the North Dahlia Pit (WDID 0203028). A plan for augmentation for these two sites was decreed in water court case no. 2007CW198 on December 17, 2013 and all depletions from these sites will be replaced under the decreed plan for augmentation. The East 8th Street Pit (M-2000-082, WDID 0303016) is no longer a part of this Combined SWSP. Aggregate sold the East 8th Street Pit to Superior Oilfields and as of November 2012 this pit is no longer covered by Aggregate. All depletions impacting the river are now covered under the East 8th Street SWSP (WDID 0302562). The Tucson Pit (M-1991-140, WDID 0203033) was also previously included in this SWSP. Mining operations at the Tucson Pit have been completed, and a request for a full performance and financial warranty release for the Tucson Pit was approved by the DRMS on April 29, 2016. A portion of the Tucson Pit (Rogers Reservoir, WDID 0203917) has been lined with a slurry wall and has obtained SEO liner approval. All post-pumping depletions associated with the Tucson Pit have been replaced under previous SWSPs. The remaining 2.0-acre pond is located within the permit boundaries of the Tucson South Pit and will be accounted for and reclaimed under that permit.

The Irwin-Thomas Pit (Plan ID 5829, WDID 0505626) and the Fredstrom Pit (Plan ID 6090, WDID 0505629) operated under individual SWSPs in 2019. These two sites were incorporated into this SWSP starting in the 2020 plan period.

A summary of the mining operations at each of the twelve (12) sites included in this SWSP is provided below.

*Jeronimus Pit
(South Platte
Mainstem)*

Status: Resource extraction at the Jeronimus Pit is complete. Operations on-site include backfilling of the pit with inert fill. Depletions covered by this SWSP are limited to water lost due to evaporation. The total surface area exposed at the site is 20.3 acres, of which 14.7 acres were exposed to the atmosphere prior to January 1, 1981. The 14.7-acre area exposed at the Jeronimus Pit prior to 1981 is tied to the location as shown on the exhibit dated January 31, 2011 as provided in the 2011 SWSP. The credits for the pre-1981 area are tied to the location identified on that map and may not be re-allocated to other areas of groundwater exposure within the gravel pit permit boundary.

Exposed Groundwater Surface: 5.6 acres post-81, 14.7 acres pre-81

Active Dewatering: No

*Hazeltine Pit
(South Platte
Mainstem)*

Status: Resource extraction at the Hazeltine Pit has been completed and reclamation is in progress. The Hazeltine Pit was lined with a soil bentonite slurry wall, and was approved as having been lined to the design standard referenced in the August 1999 State Engineer Guidelines for Lining Criteria for Gravel Pits in a letter dated May 25, 2016. The construction of the slurry wall resulted in groundwater mounding and flooding of adjacent property. The operator has installed a gravity drain to dewater the site on a continuous basis. A 45-day leak test was performed after installation of the permanent drain to verify that the liner was not impacted. The liner was re-approved in a letter dated March 22, 2018. The Applicant was required to install and operate the Orr Drain to reduce mounding of groundwater associated with the installation of the slurry wall at the site. According to the Applicant, the Orr Drain must continue to operate until the DRMS Permit is released. The Orr Drain currently intercepts groundwater seepage and surface flow in the Bull Seep, which are routed into the lined pit and subsequently pumped out to the Bull Seep and discharged to the South Platte River; the monthly difference between what is measured entering the pit and what is measured being pumped out is considered a depletion. Depletions covered by this SWSP are limited to depletions due to Orr Drain inflows that are not pumped out in the same month and lagged depletions from past operations at the site, including past dewatering. The Applicant anticipates that 154.0 acre-feet will be pumped from the Orr Drain into the pit during this plan period, and 138.60 acre-feet will be pumped out, resulting in a depletion of 15.40 acre-feet in 2022.

Exposed Groundwater Surface: None
Active Dewatering: No

*Brighton Pit
(South Platte
Mainstem)*

Status: Resource extraction at the Brighton Pit is complete and reclamation is in progress. Depletions covered by this SWSP include water lost due to evaporation and post-pumping dewatering depletions. The south and central reservoirs are lined with a slurry wall (WDIDs 0203031 and 0203385) and have obtained SEO liner approval. Reclamation work includes backfilling the remaining exposed areas, of which 2.0 acres was backfilled in 2020. Mining operations will not be considered to have ceased until the backfilling is complete.

Exposed Groundwater Surface: 1.0 acres
Active Dewatering: No

*Tucson South Pit
(South Platte
Mainstem)*

Status: Aggregate intends to continue actively mining the Tucson South Pit during 2022. Depletions covered by this SWSP include water lost due to evaporation, aggregate production, slurry wall construction, landscape irrigation, and dust control.

Exposed Groundwater Surface: 3.0 acres (including 2.0 acres transferred from the Tucson Pit)
Active Dewatering: Proposed to start in 2022

*Wattenberg Pit
(South Platte
Mainstem)*

Status: Resource extraction at the Wattenberg Pit is complete and reclamation is in progress. Depletions covered by this SWSP include water lost due to evaporation, dust control, and dewatering. Prior to 2018, the north pit was dewatered with water delivered to the nearby Broda Pond. The north cell has since been lined, and dewatering operations have shifted to the south cell with water to be discharged to multiple locations. A portion of the water will be

pumped to the Stillwater Ski Lake located south of the pit to mitigate lower levels in the pond due to the suppressed water table resulting from dewatering. A portion of the water may be pumped to a new recharge pond on the west side of the site in order to mitigate low water table levels in domestic wells in the area. A portion of the water may be discharged to the Huett Seep, a surface drainage adjacent to the site. The remainder of the dewatering discharge will be pumped across the South Platte River to the Broda Pond located within the Platte Valley Pit. Once water enters the Broda Pond, some is pumped to the river to ensure the pond does not spill. There was a temporary cessation of dewatering in January 2018. The site will be dewatered continuously throughout 2022.

Exposed Groundwater Surface: 37.0 acres

Active Dewatering: Yes

*Platte Valley Pit
(South Platte
Mainstem)*

Status: Mining operations at the Platte Valley Pit are not anticipated to occur in 2022, though reclamation activity consisting of backfilling portions of the site will continue in 2022. Aggregate intends to import 2,085,000 tons of material mined at other sites to the Platte Valley Pit site for processing. The imported material will be washed with water withdrawn from exposed groundwater ponds on the site, therefore 2% of the weight of the imported material will be charged as a depletion. The initial moisture content of the material will be charged as depletions at the originating source, which may include sources operated by other entities. Depletions covered by this SWSP include water lost due to evaporation, aggregate processing, dust control, and concrete batching. Water for concrete batching will come from Well Permit No. 13410-F-R (WDID 0207073). Note that the water right for this well was on the division engineer's 2010 Decennial Abandonment List, but the well may still be used in accordance with its permit as long as all depletions are treated as junior to all other vested water rights in accordance to this SWSP and the well complies with the South Platte Well Measurement Rules. The applicant submitted the attached "Figure 1—Platte Valley Pit 2021 Exposed Area" for verification of the area that has been exposed starting in 2019.

Exposed Groundwater Surface: 63.8 acres

Active Dewatering: No

*Distel Pit
(St. Vrain River)*

Status: Mining operations at the Distel Pit were completed in 2011 and reclamation is in progress. In 2017, Aggregate used water from the Distel site as a water supply for a portable ready-mixed plant located at the site for a short-term job. Depletions covered by this SWSP include water used for dust control, and lagged depletions from past concrete batching and past aggregate production, and post-pumping depletions from past dewatering. Dewatering at the site ceased due to flooding in September 2013, and Aggregate currently has no plans to reactivate dewatering. The City of Longmont has assumed the augmentation responsibilities for lagged and future depletions from evaporation and consumptive use by wetlands vegetation at the site under their plan for augmentation decreed in case no. 2009CW271.

Exposed Groundwater Surface: N/A (augmented under case no. 2009CW271)

Active Dewatering: No

<i>Tull Pit (St. Vrain River)</i>	<p>Status: Mining operations are anticipated to continue at the Tull Pit in 2022. Depletions covered by this SWSP include water lost due to evaporation, dust control, aggregate production, and dewatering. The site will be dewatered continuously throughout 2022.</p> <p>Exposed Groundwater Surface: 4.0 acres</p> <p>Active Dewatering: Yes</p>
<i>Irwin-Thomas Pit (St. Vrain River)</i>	<p>Status: Mining operations are anticipated to begin at the Irwin-Thomas Pit in 2022. Water use at this site will consist of dewatering, evaporation from exposed groundwater, aggregate production, and dust control.</p> <p>Exposed Groundwater Surface: 2.5 acres</p> <p>Active Dewatering: Proposed to start in 2022</p>
<i>Fredstrom Pit (St. Vrain River)</i>	<p>Status: Mining operations are anticipated to be on hold at the Fredstrom Pit in 2022. There is no anticipated water use at this site in 2022, and there are no remaining lagged depletions to be replaced during this plan period. The Fredstrom Pit is included in this SWSP due to requirements of third-party agreements.</p> <p>Exposed Groundwater Surface: 0 acres</p> <p>Active Dewatering: No</p>
<i>W.W. Farms Pit (Lower Poudre River)</i>	<p>Status: Mining operations at the W.W. Farms Pit (aka Riverview Resources) are anticipated to continue in 2022. Depletions covered by this SWSP include water lost due to evaporation, aggregate production, dust control, and dewatering. During the spring of 2011 the pit was flooded by the Poudre River due to the high spring runoff conditions. Ongoing dewatering has reduced the exposed surface area at the site. The entire remaining exposed surface area will be assessed evaporative losses as this is an unlined pit. The site will be dewatered continuously throughout 2022. Note: The Applicant has obtained a decreed plan for augmentation in water court case no. 1990CW23 to cover evaporation from up to 66 acres of exposed water surface area in one or more unlined ponds remaining at the site post-mining; however, since final reclamation of the site has not yet occurred, all depletions from this pit will continue to be replaced under this SWSP during this plan period.</p> <p>Exposed Groundwater Surface: 64.0 acres</p> <p>Active Dewatering: Yes</p>
<i>F-Street Pit (Lower Poudre River)</i>	<p>Status: Resource extraction at the F-Street Pit is complete and reclamation is in progress. Depletions covered by this SWSP are limited to water lost due to evaporation, as lagged dewatering and operational depletions are no longer accruing to the river.</p> <p>Exposed Groundwater Surface: 26.2 acres</p> <p>Active Dewatering: No</p>

Depletions

The lagged depletions resulting from evaporation, water lost in mined product, dust control, concrete batching, and dewatering operations at each site are shown in Table C below:

Table C - Depletion Summary (all amounts in acre-feet)

Site Name	Evaporation	Water Lost in Mined Product	Dust Control / Slurry Wall	Concrete Batching	Orr Drain Diversion	Total	Lagged Depletions	Lagged Dewatering Depletions Impacting the River	Total Depletions to be Replaced
Jeronimus Pit	15.00	0	0	0	0	15.00	15.61	0	15.61
Hazeltine Pit	0	0	0	0	15.4 ^b	15.4	1.5	42.3 ^c	59.2
Brighton Pit	2.73	0	0	0	0	2.73	4.98	2.17 ^c	7.15
Tucson South Pit	8.2	50.62 (1,720,000 tons)	5.68	0	0	64.51	64.77	0 ^d	64.77
Wattenberg Pit	108.38	0	0	0	0	108.4	105.58	0 ^d	105.58
Platte Valley Pit	169.15	30.68 (2,085,000 tons)	13.02	5.52	0	218.4	214.14	0	214.60
Distel Pit	0 ^a	0	1.54	0	0	1.54	1.54	0.01 ^c	1.55
Tull Pit	10.32	19.16 (650,852 tons)	0.99	0	0	30.47	24.67	0 ^d	24.67
Irwin-Thomas Pit	6.0	10.30 (350,000 tons)	0.91	0	0	17.21	8.77	0 ^d	8.77
Fredstrom Pit	0	0	0	0	0	0	0	0	0
W.W. Farms Pit	178.56	15.89 (540,000 tons)	0.99	7.93	0	203.4	200.15	0 ^d	200.15
F-Street Pit	71.79	0	0	0	0	71.79	71.79	0	71.79
Total	--	--	--	--	--	682.4	--	--	704.63

^a Evaporation is replaced by the City of Longmont under their augmentation plan decreed in water court case no. 09CW271.

^b The depletion is the difference between the amount of water delivered into the pit and the amount of water pumped out of the pit each month.

^c Lagged Dewatering Depletions, as shown in the table, are from past dewatering operations that have ceased but continue to impact the stream system.

^d So long as the pit is continuously dewatered, the water returned to the stream system is considered to be adequate to offset depletions attributable to the dewatering.

A stream depletion model using either the Glover method, or Stream Depletion Factor (SDF) method (for the Brighton Pit) was used to calculate the lagged depletions to the river. The Glover method uses four aquifer input parameters for each site as follows: 1) X - distance (ft) from centroid of exposed groundwater to river, 2) W - distance (ft) from the aquifer boundary through the well to the river channel, 3) T - transmissivity of the alluvial aquifer (in gallons per day per foot) between the well and the river, and 4) S - specific yield (0.2 was used for all wells). The parameters used in the model for each site are listed in Table D below.

Table D - Aquifer Characteristics

Site Name	T (gal/day/ft)	X (ft)	W (ft)	SDF (days)
Jeronimus Pit	100,000	1,600	23,000	-
Hazeltine Pit	100,000	1,200	23,000	-
Brighton Pit	-	-	-	10
Tucson South Pit	75,000	1,600	4,600	-
Wattenberg Pit	80,000	1,200	5,500	-
Platte Valley Pit	150,000	1,400	7,400	-
Distel Pit	50,000	700	5,300	-
Tull Pit	50,000	4,900	9,300	-
Irwin-Thomas Pit	50,000	1,900	6,000	-
Fredstrom Pit	50,000	1,400	8,700	-
W.W. Farms Pit	120,000	900	8,750	-
F-Street Pit	120,000	2,600	5,000	-

The consumptive use and lagged stream depletions from each site are summarized in the attached “South Platte Combined Substitute Supply Plan Accounting 2022” sheet.

Replacements

Lower Poudre River

Replacement Sources	Projected 2022 Yield (acre-feet)	Comments
Whitney Ditch	165.10	13.5 shares
Greeley Irrigation Company	34.84	Lease of 3 shares
Bucklen Pit	55.68	Annual lease of excess augmentation credit

Note: Projected 2022 yield may vary from previous estimates of net yields due to the computed return flow obligations based on the previous year's actual water deliveries.

Whitney Ditch

Aggregate owns a total of 13.5 shares in the Whitney Ditch Company. The subject 13.5 shares were changed in case no. 1990CW23 from irrigation use to industrial mining, dust suppression, reclamation, irrigation, augmentation under the plan for augmentation described in the decree, and piscatorial purposes. The use of the subject shares for replacement purposes in this SWSP was not decreed in case no. 1990CW23; however, the Applicant has proposed to use the subject shares for replacement purposes pursuant to this SWSP in conformity with the requirements of case no. 1990CW23.

The decree entered in case no. 1990CW23 relied on a ditch-wide analysis of the Whitney Ditch developed for and decreed in case no. 2008CW65. Based on a study period of 1950 through 1995, the Court found that the average annual gross river diversion was 10,600.2 acre-feet per year or 33.13 acre-feet per share. The ditch-wide analysis determined that the overall average consumptive use was 4,400.9 acre-feet per year or 13.75 acre-feet per share for 320 shares, assuming a system loss of 15% and a farm efficiency of 60%. In case no. 2002CW331, 8 shares historically used on 74 acres were found to have a river headgate diversion of 33.42 acre-feet per share and a consumptive use of 16.32 acre-feet per share (130.5 acre-feet total). After removing the consumptive use decreed for the 8 shares in case no. 2002CW331, the historical consumptive use for the remaining 312 shares was determined to be 4,270.4 acre-feet, or 13.69 acre-feet per share. For Aggregate's 13.5 Whitney Ditch shares, the total average annual consumptive use would therefore equal 184.81 acre-feet per year. The ditch-wide analysis utilized a return flow split of 50% surface and 50% subsurface return flows.

For the 2022 plan period, Aggregate will dedicate all 13.5 of their Whitney Ditch shares to this SWSP. For the purposes of this SWSP, the projected consumptive use credit has been estimated based on a dry-year farm headgate delivery of 24.75 acre-feet per share (which includes a 15% ditch loss) or approximately 334 acre-feet for all 13.5 shares. After accounting for the return flow obligations, the total consumptive use credit for 2022 is projected to be approximately 165.10 acre-feet.

Beginning in 2011, Aggregate utilized the Whitney Ditch West return structure (WDID 0302904) owned by the Whitney Irrigation Company located in the SE¼ of Section 30, Township 6 North, Range 66 West, 6th P.M. Aggregate anticipates that this return structure will be utilized again in 2022. A copy of the agreement authorizing Aggregate's use of this structure for the 2022 irrigation season will be obtained prior to April. **This source may not be used until the Applicant has provided an executed agreement.**

The dry-up locations for the subject Whitney Ditch shares were originally identified through an April 12, 2011 letter to the Division 1 Engineer. That letter stated the northern portion of Orr Farm #1 may continue to be irrigated using 1 of the 13.5 Whitney Ditch shares owned by the Applicant. In 2011 the entire Orr Ditch Farm #1 was removed from irrigation due to damage to the lateral serving the property. Therefore the entire farm is included as a dry-up location for all 13.5 shares dedicated to the plan in 2022. The share dedication dated February 29, 2012 remains valid and is attached.

Greeley Irrigation Company Shares

The Applicant has obtained a lease for a total of three (3) shares in the Greeley Irrigation Company ("GIC") owned by Pat Arnold. A share of GIC water provides the shareholder with GIC direct flow water and Fossil Creek Reservoir water. The term of the lease will be for the 2022 irrigation season. A copy of the lease, dated November 15, 2021, is attached. The share certificate numbers are #2476 (2 shares) and #2455 (1 share).

The GIC owns a 5/8th interest in the water rights decreed to the Greeley Canal No. 3 (WDID 0300934) and 60 preferred rights in Fossil Creek Reservoir (WDID 0303774). The historical use of 519.7 outstanding shares in the GIC was previously quantified and decreed in case no. 1996CW658 using a ditch-wide analysis. The decree in case no. 1996CW658 found that 519.7 shares were used to irrigate 3,501 acres (6.74 acres per share) with an average historical consumptive use of 5,358 acre-feet per year, which yields an average consumptive use credit of 10.31 acre-feet per share (5,358 acre-feet ÷ 519.7 shares) or an average consumptive use credit of 1.53 acre-feet per acre. The 3 GIC shares leased by the Applicant are therefore expected to yield a consumptive use amount of 30.93 acre-feet per year (10.31 acre-feet/share × 3 shares = 30.93 acre-feet).

The ditch-wide analysis decreed in case no. 1996CW658 determined the acreage irrigated with GIC water rights was 3,501 acres, or 6.74 acres per share. Of that amount, 2,098 acres were determined to have been dried up as a result of development ("dry-up pool"). The total required dry-up associated with the subject 3 shares is 20.22 acres. Of the 3 GIC shares, 1.5 shares were used to irrigate 2.15 acres identified as Farm E-73a, and the remaining 1.5 shares were used to irrigate 7.06 acres identified as Farm E-73b. The acreage historically irrigated by the subject shares is below the irrigated-acreage-per-share historical average of 6.74. As such, the Applicant may claim the remaining 11.01 acres of required dry-up from the "dry-up pool". The subject farms are no longer irrigated.

In paragraph 6.7.4. of the decree entered in case no. 1996CW658, future farm headgate deliveries of the 67.75 shares owned by Poudre Prairie Irrigation Company were limited to 1,712 acre-feet per year (25.26 acre-feet per share) and 12,631 acre-feet (186.43 acre-feet per share) in any consecutive 10 year period. For the purposes of this one-year SWSP, deliveries of GIC direct flow

water associated with the 3 shares must be limited to a farm headgate delivery of 55.8 acre-feet (18.6 acre-feet per share). The historical return flows associated with the 3 shares that are the subject of this SWSP shall be maintained in accordance with the return flow factors identified in case no. 1996CW658. The return flow obligations will be accounted for and replaced under this SWSP.

For the purposes of this SWSP, you have used a projected yield of 20.31 acre-feet of GIC direct flow water per share and 1.19 acre-feet of Fossil Creek Reservoir deliveries per share. These amounts are consistent with projected deliveries per share for Year One as described in paragraph 28 of the decree entered in case no. 2003CW348. Projected deliveries for Year One were calculated in accordance with paragraph 20.3.3 of the decree entered in case no. 2003CW99, and are based on 2002-2006 recorded deliveries. As specified in case no. 1996CW658, all GIC direct flow deliveries incur an immediate surface return flow obligation of 23.7%, and all Fossil Creek deliveries incur an immediate surface return flow obligation of 20.1%. The estimated consumptive use credit is therefore 15.50 acre-feet per share for GIC direct flow water, and 0.95 acre-feet per share for Fossil Creek Reservoir water. For the purposes of this SWSP, Aggregate is assuming that the GIC's 60 preferred rights in Fossil Creek Reservoir will not be available to GIC during WY2022. Excluding the Fossil Creek Reservoir component of the GIC deliveries, the projected yield of the 3 shares will equal 60.93 acre-feet per year (3 shares × 20.31 acre-feet/share), with a return flow obligation of 26.09 acre-feet. The total consumptive use credit for the 3 shares is therefore projected to equal 34.84 acre-feet for 2022.

The GIC shares will be delivered back to the river through the 23rd Avenue and Fourth Street Return Station.

Bucklen Equipment Company Lease

The Applicant executed an agreement with Bucklen Equipment Co., Inc. for the lease of excess augmentation credits from the Bucklen Pit SWSP (WDID 0302538) during the period of April through October 2022. A copy of the lease, dated November 15, 2021, is attached. The excess augmentation credits will be generated from six (6) Greeley Irrigation Company shares owned by the Bucklen Equipment Co., Inc. The return flow obligations associated with the use of the six Bucklen GIC shares are counted as a depletion in and will be replaced under the Bucklen Pit SWSP. After use in the Bucklen Pit SWSP, the shares are projected to produce a total of 55.95 acre-feet of excess credits during the 2022 irrigation season. According to the agreement, Bucklen Equipment Co. will lease to Aggregate as needed any excess augmentation credit available during the 2022 irrigation season for use. At the time of execution of the agreement, it was anticipated that a total of 55.68 acre-feet of excess augmentation credit would be available for use in this SWSP. The Bucklen GIC shares will be delivered to the Cache la Poudre River at the 23rd Avenue and Fourth Street Return Station (WDID 0302318).

St. Vrain River

Replacement Source	Projected 2022 Yield (acre-feet)	Comments
City of Longmont Lease	32.5	Annual lease

City of Longmont Lease

Aggregate has entered into a water lease agreement with the City of Longmont for 23.5 acre-feet of fully consumable water. A copy of the lease agreement, dated December 10, 2021, is attached. On February 16, 2022, Aggregate obtained a lease for an additional 9 acre-feet, for a total of 32.5 acre-feet of fully consumable water. Deliveries under this lease are available from either the outfall of Longmont's municipal wastewater treatment plant or the confluence of Spring Gulch and

Saint Vrain Creek. Deliveries will be made to St. Vrain Creek during the period of April through October 2022 pursuant to the attached delivery schedule.

South Platte Mainstem

Replacement Sources	Projected 2022 Yield (acre-feet)	Comments
Centennial	30.00	Perpetual lease
Westminster 1998	265.24	Available throughout the year-perpetual lease; 265.24 acre-feet proposed to be used in 2022
Westminster Annual Lease	224.0	Annual lease with Westminster
Thornton Effluent	10.53	November - March only
Fulton Ditch	96.28	96 shares total; 62 to be used in 2022
Brighton Ditch	191.36	1.038 shares total

Note: Projected 2022 yields may vary from previous estimates of the net yield due to the computed return flow obligations based on the previous year's actual water deliveries.

Centennial Lease

Aggregate conveyed water rights in exchange for a perpetual lease of augmentation water in an agreement with Centennial Water and Sanitation District in 1996. The agreement requires Centennial to provide Aggregate with 30 acre-feet of fully consumable water each year. The rate of delivery for the 30 acre-feet cannot exceed 0.5 cfs, but can be taken at any time throughout the year. For this plan period, Aggregate intends to utilize this source during the months of September and October. A copy of a letter confirming Centennial's intent to follow the proposed schedule dated November 5, 2021 is attached. Aggregate will not claim credit from Centennial releases on days when the Burlington Ditch is sweeping the river. The Applicant is working on ways to bypass the Centennial credits past the Burlington Ditch for future SWSP approvals.

Westminster 1998 Lease

The 1998 effluent lease with the City of Westminster is a perpetual lease that provides 0.28 cfs of fully consumable water every day of each year (averaging 16.89 acre-feet per month) and an additional 0.17 cfs every day from October 1 to June 30 during each year (averaging 10.25 acre-feet per month) at the outfall of the Metro Wastewater Treatment Plant. The lease provides 294.79 acre-feet annually, of which 265.24 acre-feet are anticipated to be utilized in this SWSP. (The remaining 29.55 acre-feet are reserved for use in case no. 2007CW198.)

Westminster Annual Lease

Pursuant to a March 4, 2010 Consumable Water Lease Agreement with the City of Westminster, amended January 14, 2020, Aggregate may lease up to 250 acre-feet of consumable water annually, with a minimum lease of 150 acre-feet per year unless changed by mutual agreement between the parties. The amended lease is currently valid through June 30, 2022. Deliveries under this lease are available from November 10th through March 20th from either the Metro Wastewater Treatment Plant or the Big Dry Creek Wastewater Treatment Plant. For 2022, Aggregate and Westminster have agreed to a total annual delivery amount of 107 acre-feet in the months of January, February, and March. A copy of the proposed 2022 delivery schedule, dated November 2, 2021, is attached. For this SWSP, transit losses were assessed assuming deliveries will be from the Big Dry Creek Wastewater Treatment Plant. Prior to switching releases from the Metro Wastewater Treatment Plant or the Big Dry Creek Wastewater Treatment Plant, prior approval from the water commissioner is required. Prior approval from the water commissioner is also required before any of the releases from Westminster may be diverted or used as a replacement for a direct diversion.

Notice must also be provided to the water commissioner at least 48 hours prior to the release of replacement water, or as required by the water commissioner, and must identify which source the replacement water will originate from (the Metro Wastewater Treatment Plant or the Big Dry Creek Wastewater Treatment Plant) to allow confirmation of release and that water was delivered.

Aggregate is in the process of negotiation with Westminster to lease an additional 117 acre-feet for the months of November and December. **This SWSP will only be extended for the period of November 1, 2022 through December 31, 2022 if a copy of the executed lease is provided to this office on or before October 31, 2022.**

Thornton Lease

Aggregate has a perpetual lease of 10.53 acre-feet of fully consumable effluent from the City of Thornton, which will be released from the Metro Wastewater Treatment Plant at a rate of 0.035 cfs daily from November 1st through March 31st.

Fulton Ditch

Aggregate owns a total of 96 shares in the Fulton Ditch Company, consisting of 62 shares obtained from Cooley Gravel, 22 shares from CAMAS, 6 shares from C&M Aggregates, and 6 shares from Hill & Peterson. For 2022, Aggregate intends to utilize their 62 Cooley Gravel shares for replacement under this SWSP. (The 22 CAMAS shares, 6 C&M Aggregates shares, and 6 Hill & Peterson shares will be leased to others for irrigation purposes).

Prior to 1977, the 62 Cooley Gravel shares were used in two blocks: 30 of the shares were owned by the Montandon Trust and used for the irrigation of 48.7 acres, and 32 shares were owned by the Palombos and used for the irrigation of 31.1 acres. The shares were purchased by Walt Flanagan & Company in 1977 and little is known about the use of the shares after that time. The historical consumptive use analysis utilized a parcel-specific analysis for the period of 1919 to 1977. A total of 40 shares were used on the Montandon parcel prior to 1964, with 10 shares being sold off in 1964. The historical consumptive use analysis assumed that the subject 30 shares irrigated 75% of the Montandon parcel (36.5 acres) prior to 1964 and 100% of the parcel (48.7 acres) from 1964 to 1977. The crop mix for the Montandon and Palombo parcels was assumed to reflect the mix of crops for the Fulton Ditch as a whole as identified in the 1956 CDSS irrigated lands GIS layer, consisting of 44% alfalfa, 26% corn, 15% dry beans, 13% pasture grass, 1% small grains, and 1% sugar beets. The applicant previously utilized an assumed ditch loss of 20% and irrigation efficiency of 65%. For the purposes of this SWSP, the applicant has provided a revised analysis utilizing an assumed irrigation efficiency of 50%. Based on the above, the historical consumptive use of the 62 Cooley Gravel shares is estimated as 1.5 acre-feet per share. Return flow obligations were allocated as 50% surface return flows and 50% subsurface return flows.

The 62 shares to be used for replacement purposes under this SWSP will be delivered through the augmentation station owned by the South Adams County Water & Sanitation District located just downstream of the ditch headgate. The expected consumptive use credit for the 62 Fulton Ditch shares for 2022 has been estimated from a dry-year farm headgate delivery of 2.66 acre-feet per share or approximately 164 acre-feet for all 62 shares. After accounting for return flow obligations, the total consumptive use credit for the 62 shares is projected to equal 96.28 acre-feet in 2022. In the event the Fulton Ditch goes into Sections, the Applicant has sufficient alternative replacement supplies in the form of shares in the Brighton Ditch, as described below, to make up any temporary shortfalls.

Brighton Ditch

Pursuant to a March 4, 2010 Water Lease with the City of Westminster (Amended January 14,

2020), Aggregate has the right to use 1.038 shares in the Brighton Ditch Company owned by the City of Westminster for augmentation purposes. Aggregate has extended the lease through June 30, 2022. The subject 1.038 shares were changed in case no. 2016CW3186 from irrigation use to direct flow and storage or all beneficial uses of the municipal water system of Westminster. The use of the subject shares for replacement purposes in this SWSP was not decreed in case no. 2016CW3186; however, the decree entered in case no. 2016CW3186 included a provision that Aggregate's continued use of the subject shares be governed by the terms and conditions of the decree.

The decree entered in case no. 2016CW3186 relied on a parcel-specific analysis of the historical consumptive use of the subject water rights, with a study period of 1950 through 2001. The total shares include 4/6th (0.667) of a share historically used to irrigate the Broncucci (aka Wattenberg) Property. An average of 42 acres of pasture grass were irrigated by controlled flood irrigation. The engineering study commissioned by Westminster for case no. 2016CW3186 found the average historical consumptive use for the 0.667 Brighton ditch shares used on the Broncucci Property to be 82.5 acre-feet.

The other 0.371 shares were historically used to irrigate the Haake Property, along with 5.75 shares of the New Brantner Extension Ditch Company. Irrigated portions of the Haake Farm ranged from 92.3 to 111.8 acres from 1950-2001. During the study period, between 10.7 and 11.3 acres of dry beans (prior to 1960) and corn (1960 on) were irrigated by the Brighton Ditch shares only; 20 acres of pasture grass and between 14.2 and 20.1 acres of dry beans (prior to 1960) and corn (1960 on) were irrigated by the New Brantner Ditch shares only; and between 49 and 61 acres of furrow irrigated corn and flood irrigated pasture grass were irrigated by both the combined Brighton Ditch and New Brantner Ditch water supplies. The engineering study commissioned by Westminster for case no. 2016CW3186 found the average historical consumptive use attributable to the 0.371 Brighton Ditch shares used on the Haake Property to be 67.85 acre-feet.

The total average historical consumptive use for the subject 1.038 shares is therefore 150.35 acre-feet per year (144.85 acre-feet per share). Aggregate will utilize the entire 1.038 shares for use in this plan. The use of the Brighton Ditch shares in this plan must comply with the terms and conditions of the 2016CW3186 decree, including the volumetric limits identified in paragraph 35.D of the decree and summarized in the table below.

	Apr	May	Jun	Jul	Aug	Sep	Oct	Annual
Max Monthly and Annual Limits	59.7	96.3	96.3	106.6	97.8	56.8	52.3	458.0
20-Year Limits	458	1,073	1,355	1,598	1,375	879	425	7,163

For the purposes of this SWSP, you have estimated the expected credit for the Brighton Ditch shares from a dry-year farm headgate delivery (using a 25% ditch loss, consistent with case no. 2016CW3186) of 331 acre-feet per share, or 343.60 acre-feet for all 1.038 shares for the period of April through October. This amount is less than the 20-year average annual limit of 358.15 acre-feet (7,163 acre-feet ÷ 20 years), and therefore is acceptable.

The historical return flows associated with the 1.038 shares that are the subject of this SWSP must be maintained in accordance with the return flow factors identified in paragraph 35.F of the decree entered in case no. 2016CW3186. The return flow obligations will be accounted for and replaced under this SWSP.

The total consumptive use credit for 2022 is projected to equal 191.36 acre-feet, which is greater than the dry-year yield because of the reduced subsurface return flow obligation requirement resulting from low deliveries in 2021. Aggregate anticipates utilizing the augmentation structures on the Brighton Ditch operated by the City of Aurora for the delivery of these shares.

Replacement Summary

The proposed depletions and replacements are shown in the attached “South Platte Combined Substitute Supply Plan Accounting 2022”. The transit loss for each stream was estimated as 0.5% per mile for the South Platte River and for the Cache la Poudre River east of Interstate 25, and 0.25% per mile for the Cache la Poudre River west of Interstate 25. The stream miles for each source is found on the Transit Loss spreadsheet submitted as part of the Applicant’s accounting.

Aggregate will coordinate deliveries of changed shares back to the river from the Whitney Ditch, the Fulton Ditch, the Brighton Ditch, and the Greeley Irrigation Canal with the Water Commissioners. Aggregate will track and provide the amount of water available, the amount of water requested, and the amount of water delivered on a daily basis or as required by the water commissioner.

Prior to using a downstream replacement source for upstream depletions, or prior to operating any administrative exchange, the Applicant shall be required to provide 48 hours advanced notice and obtain prior approval from the Water Commissioners. Any use of downstream replacement sources for upstream depletions, or any operation of an administrative exchange, can only operate when there is sufficient streamflow and no intervening call for water within the impacted reach.

Additional Water Supplies - Not Currently Authorized for Use in this SWSP

The Applicant owns or has/may obtain the right to use the following additional water supplies, which are not currently included as authorized replacement sources in this SWSP. The details of each source are provided herein solely for informational purposes.

Source	Comments
Bergen Reservoirs 4, 5, & 6 ^a	191 shares total
Boyd & Freeman Ditch ^b	240 shares, owned by City of Greeley
Central Colorado Water Conservancy District ^b	Lease
City of Greeley ^b	Lease
Godding, Dailey & Plumb Ditch ^a	3 shares total
Huett Seepage Ditch ^a	100% ownership
L.G. Everist ^b	Lease
Last Chance Ditch Co. No. 2 ^a	0.3154 shares total
Left Hand Ditch Company ^a	4 shares total
Leggett-Owens Reservoir ^a	19.6 shares total
Lupton Bottom Seep Ditches No. 1 & No. 2 ^a	100% ownership
Martin Marietta Lease ^b	Lease
Platte River Power Authority Lease ^b	Lease
Silver Heights ^b	Lease
Smith & Emmons Ditch ^a	1.5 shares total
Zweck & Turner Ditch ^c	5/12 ^{ths} interest in the ditch

^aThe use of these sources for replacement purposes will only be allowed pursuant to a request for a new SWSP that provides the necessary additional information detailed for each source in our letter of December 8, 2014, and summarized below.

^bThe Applicant must provide a copy of a lease/purchase agreement to the State Engineer’s Office and the division engineer for use of such additional replacement water prior to its use as a replacement source under this SWSP. In addition, this source of replacement water may only be used in this SWSP if the Applicant complies with the attached Division One Administration Protocol “Use of Replacement Sources Not Specifically Identified in an SWSP or Augmentation Plan”.

^cThe use of this source for replacement purposes will only be allowed pursuant to a request for a new SWSP that provides additional information as detailed below.

Bergen Reservoirs 4, 5, & 6

This office located the reference to the December 29, 1986 report prepared by KKBNA Incorporated Consulting Engineers in the July 13, 1990 SWSP request for the Thornton Pit; however this office does not appear to have a copy of the report itself. Therefore this office is unable to determine the validity of the conclusions reached by the report. Prior to use of these shares as a replacement source, the Applicant must provide documentation to support the claimed net annual yield of 85 acre-feet and estimated average annual consumptive use of 15.8 acre-feet for these shares.

Boyd & Freeman Ditch

In the past, Aggregate has utilized 240 shares in the Boyd & Freeman Ditch Company currently owned by the City of Greeley. Aggregate is currently in discussions with Greeley on the continued use of these shares in this SWSP. Until approval for their use is given by Greeley, no credit from the Boyd & Freeman Ditch shares will be claimed in this SWSP.

Central Colorado Conservancy District

Aggregate is negotiating with the Central Colorado Water Conservancy District for a lease to provide fully consumable water for the period of July through December 2022. Before Aggregate may use leased water from Central Colorado Water Conservancy District as a source of replacement water in this SWSP, they must meet all the standards of the attached Division 1 Administration Protocol "Use of Replacement Sources Not Specifically Identified in an SWSP or Augmentation Plan".

City of Greeley Lease

Aggregate has previously utilized fully consumable effluent leased from the City of Greeley as a replacement source in this SWSP. The water is discharged to the Poudre River from the City's wastewater treatment plant. In the future, Aggregate may use leased water from the City of Greeley if a supplemental source of replacement water is needed.

Godding, Dailey & Plumb Ditch

The Applicant seeks to rely on a historical consumptive use analysis included in the SWSP request for the Distel Pit dated November 14, 2000. The historical consumptive use analysis did not compare actual monthly historical diversions to the monthly crop consumptive use (based on actual weather data), and therefore is not acceptable. Prior to use of these shares as a replacement source, the Applicant must provide a revised historical consumptive use analysis for the subject shares. The revised analysis must also identify the lands historically irrigated by the shares.

Huett Seepage Ditch

Prior to use of these shares as a replacement source, the Applicant must provide a full historical consumptive use analysis for the subject shares.

L.G. Everist Lease

Aggregate has previously utilized water leased from L.G. Everist, Inc. and stored in the Everist Star Reservoir (WDID 0303325) as a replacement source in this SWSP. Everist Star Reservoir is part of the Feit Gravel Pit (M-1977-522), and is primarily located in the SE¼ of the SW¼ and the SW¼ of the SE¼ of Section 26, Township 6 North, Range 66 West, 6th P.M., adjacent to the Cache la Poudre River. The slurry wall liner for the Everist Star Reservoir was approved as having been lined to the design standard referenced in the August 1999 State Engineer Guidelines for Lining Criteria for Gravel Pits in a letter dated December 16, 2014 (amended March 6, 2015) and it is therefore classified as a lined reservoir. Deliveries from the Everist Star Reservoir would be to the Cache la Poudre River via a

submersible pump. The headgate for the Greeley No. 3 Ditch is located between the point of depletion of the W.W. Farms Pit and the Everist Star Reservoir (downstream point of release). During times when the Greeley No. 3 Canal is calling for water, Aggregate is not permitted to use the water released from the Everist Star Reservoir as a replacement source for depletions from the W.W. Farms Pit.

Last Chance Ditch Company No. 2

The Applicant proposes to rely on a ditch-wide analysis of the Last Chance Ditch system performed by W.W. Wheeler and Associates summarized in a letter report dated April 16, 1990. Prior to use of these shares as a replacement source, the Applicant must provide a copy of said letter report to this office for review. Please note that several subsequent change cases involving a change of shares in the Last Chance Ditch No. 2 found the per-share historical consumptive use to be significantly lower than the values referenced in the SWSP request. This office reserves the right to require a new historical consumptive use analysis for Aggregate's shares.

Left Hand Ditch Company

The Applicant seeks to rely on the historical consumptive use for the shares determined in case no. 87CW127. Prior to use of these shares as a replacement source, the Applicant must demonstrate that the shares have continued to be used in approximately the same way as considered in case no. 87CW127 since the decree was entered on June 5, 1991 (that there has been no change in circumstance), or the Applicant must take into account any periods of non-use or undecreed use in determining the actual historical consumptive use of the shares.

Leggett-Owens Reservoir

Prior to use of these shares as a replacement source, the Applicant must provide a full historical consumptive use analysis for the subject shares.

Lupton Bottom Seep Ditches No. 1 and No. 2

Prior to use of these shares as a replacement source, the Applicant must provide a full historical consumptive use analysis for the subject shares.

Martin Marietta Lease

Aggregate has previously utilized water from Martin Marietta Materials, Inc. as a replacement source in this SWSP. For this SWSP period, the use of leased water from Martin Marietta Materials, Inc. is not necessary and is not proposed to be utilized. In the future, Aggregate may use leased water from Martin Marietta if a supplemental source of replacement water is needed.

Platte River Power Authority Lease

Aggregate has previously utilized leased water from the Platte River Power Authority ("PRPA") as a replacement source in this SWSP. For this SWSP period, the use of leased water from the PRPA is not necessary and is not proposed to be utilized. In the future, Aggregate may use leased water from the PRPA if a supplemental source of replacement water is needed.

Silver Heights Lease

Aggregate seeks the flexibility to use water from this source when needed. The Applicant must be able to account for and deliver Plum Creek water, including proper accounting and tracking in the Chatfield Reservoir Daily accounting; augmentation station releases, transit loss, etc.

Smith & Emmons Ditch

Aggregate owns 1.5 of 8 total outstanding shares in the Smith & Emmons Ditch Company. The

1.5 Smith & Emmons Ditch shares were historically used to irrigate 68 acres of pasture grass. Using a Blaney-Criddle analysis the potential crop consumptive use for the 68 acres was determined to be 108.7 acre-feet. Assuming a 10% ditch loss and 55% farm efficiency the dry-year consumptive use was determined to be 91.65 acre-feet for the 1.5 shares.

The Applicant will install a return structure to measure Smith & Emmons Ditch deliveries associated with the subject shares back to the stream prior to claiming use of this source. The applicant may not utilize the 1.5 shares of Smith & Emmons Ditch as a replacement source in this SWSP until such time as all required measurement and bypass structures have been installed and approved by the water commissioner.

Zweck & Turner Ditch

The Applicant seeks to rely on a historical consumptive use analysis previously submitted in support of the SWSP request for the Fredstrom Pit and included in the 2020 SWSP request, dated May 29, 2018. The historical consumptive use analysis was accepted for the Fredstrom Pit SWSP for the purpose of demonstrating that the yield from the subject shares was expected to be sufficient to offset evaporative depletions from the Fredstrom Pit. The historical consumptive use analysis did not include evidence that the actual field efficiency (based on historical management and system properties) achieved the assumed maximum irrigation efficiency of 60% assumed in the report, and is therefore not acceptable. Prior to the use of the Applicant's interest in the Zweck & Turner Ditch as a replacement source, the Applicant must provide a revised historical consumptive use analysis for the ditch that either uses an assumed maximum irrigation efficiency of 50% or a maximum irrigation efficiency that considers the site-specific potential efficiency and the effects of installation, management and maintenance of the irrigation system on the potential irrigation efficiency. In addition, the SWSP request must clearly define how the maximum irrigation efficiency was determined, including all assumptions and calculations.

Furthermore, Aggregate is in the process of developing an augmentation station for the Zweck & Turner Ditch. The applicant may not use the Zweck & Turner Ditch as a replacement source in this SWSP until such time as all required measurement and bypass structures have been installed and approved by the water commissioner.

Use of Excess Credits

The Applicant has proposed to use excess replacement credit associated with their approved replacement sources in other gravel pit SWSPs approved pursuant to section 37-90-137(11), C.R.S. or temporary SWSPs approved pursuant to section 37-92-308(5), C.R.S., to the extent such excess replacement credit exists. The Applicant must provide written notice to the Division Engineer and Water Commissioner at least 30 days in advance of the desired commencement of use of the excess replacement credits, which must include the specific plan in which the credits will be used, the provision in the plan that allows an unnamed source to be added for credit, the annual and monthly amount of excess replacement credit available, the location at which the water will be delivered to the stream, and a copy of a lease agreement between the Applicant and the purchaser of the excess replacement credits if the additional plan is not owned by the Applicant. **The Applicant cannot claim credit for the use of the excess replacement credits in any other plan until they have received written approval from the Division Engineer or Water Commissioner. Furthermore, excess credits from the Westminster Consumable Water Lease Agreement dated January 14, 2020, may not be used in any plans not specifically approved in this SWSP.** For this plan period the Applicant requests the ability to lease excess replacement credits for use as a replacement source in the Stillwater Ski Lake SWSP (Plan ID 6024, WDID 0202850) requested pursuant to section

37-92-308(5), C.R.S. The Applicant will provide 11.2 acre-feet of excess replacement credits on the South Platte River above the St. Vrain confluence during the 2022 irrigation season for use in the Stillwater Ski Lake SWSP.

Dewatering

All sites that are actively dewatering have been equipped with a Totalizing Flow Meter (“TFM”) to measure the dewatering discharge. Monthly dewatering volumes must be recorded monthly with the meter readings included on submitted accounting. As long as dewatering operations remain continual at constant rates the net accretions are assumed to offset any lagged depletions. Under this assumption, the Applicant is not claiming any dewatering credit. Once dewatering operations stop, or are significantly reduced, at specific sites the monthly meter readings will be used to analyze post pumping depletions. The sites that will be actively dewatered during this SWSP period are the Wattenberg Pit, W.W. Farms Pit, Tull Pit, Tucson South Pit, and Irwin-Thomas Pit.

Long Term Depletions and Reclamation

In accordance with the letter dated April 30, 2010 (copy attached) from the Colorado Division of Reclamation, Mining, and Safety (“DRMS”), all sand and gravel mining operators must comply with the requirements of the Colorado Reclamation Act and the Mineral Rules and Regulations for the protection of water resources. The April 30, 2010 letter from DRMS requires that you provide information to DRMS to demonstrate you can replace long term injurious stream depletions that result from mining related exposure of groundwater. The DRMS letter identifies four approaches to satisfy this requirement, which are identified and described in the attached letter.

In accordance with approach no. 4, you have provided an affidavit dated February 29, 2012, that dedicates the 13.5 shares of the Whitney Ditch Company and 96 shares of the Fulton Irrigating Ditch Company described above as replacement water solely for this combined SWSP for as long as there are depletions at these gravel pit sites or until such time as another replacement source is obtained. This dedication supersedes a previous dedication dated January 25, 2011. A copy of the affidavit is attached to this letter. You have also provided an affidavit dated April 23, 2019 that dedicates 5/12^{ths} of the Zweck & Turner Ditch described above as replacement water solely for the Fredstrom Pit for as long as there are depletions at the gravel pit site or until such time as another replacement source is obtained. For the purposes of this SWSP, these affidavits will be accepted for the dedication of the shares; however, if the State Engineer determines that a different affidavit or dedication process is necessary to assure proper dedication of the shares, additional information may be required prior to future SWSP approvals. A summary of the final reclamation and the approach for compliance with the DRMS letter, including the current posted bond amount, is shown in Table E.

Table E - Final Reclamation Summary

Site Name	Proposed Final Reclamation	Bond Amount	DRMS Approach No.	Comments
Jeronimus Pit	Backfilled	\$1,510,800	1, 4	Backfilling of all post-81 areas in progress. Water rights dedicated via February 29, 2012 affidavit.
Hazeltine Pit	Lined Reservoir	\$670,602	3	Bonded for lining. The site has been lined with a slurry wall (WDID 0203381).
Brighton Pit	Lined Reservoir/Lakes	\$150,000	1, 3	Bonded for lining. The south and central reservoirs are lined with a slurry wall (WDID 0203385) and have obtained SEO liner approval. A bond reduction was approved by DRMS. The applicant is in the process of backfilling the remaining exposed groundwater areas. Once backfilling is complete, additional SWSPs will be required until the applicant has replaced all of the remaining lagged depletions.
Tucson South Pit	Lined Reservoir	\$3,505,000	1, 3	Bond increased with the acceptance of Amendment 1 which increased permit area.
Wattenberg Pit	Lined Reservoir	\$520,000	3	Bonded for lining. (Pit lined in 2013; however, liner has not yet been tested or approved.)
Platte Valley Pit	Groundwater Lake	\$754,732	1, 4	Bonded for backfilling. Water rights dedicated via February 29, 2012 affidavit.
Distel Pit	Groundwater Lake	\$1,216,716	1, 2	Bonded for backfilling. Lagged and future depletions from evaporation and consumptive use by wetlands vegetation at the site covered under City of Longmont augmentation plan decreed in case no. 2009CW271.
Tull Pit	Lined Reservoir	\$2,947,600	1, 3	Bonded for lining. Conditional water storage right decreed in case no. 1994CW062.
Irwin-Thomas Pit	Lined Reservoir	\$2,747,911	3	Bonded for lining.
Fredstrom Pit	To Be Determined	\$1,000	4	Water rights have been dedicated via April 23, 2019 affidavit.
W.W. Farms Pit	Lined Reservoir/ Groundwater Lakes	\$270,000	2	Conditional water storage right and plan for augmentation for evaporation from up to 66 acres of water surface area decreed in case no. 1990CW23 (site currently exposes 36 acres).
F-Street Pit	Groundwater Lake	\$10,237,994	1 or 3	Bond amount increased to cover the cost of backfilling the site.

Conditions of Approval

I hereby approve this substitute water supply plan, in accordance with section 37-90-137(11), C.R.S., subject to the following conditions:

1. This SWSP shall be valid for the period of January 1, 2022 through October 31, 2022 (or December 31, 2022, if extended) unless otherwise revoked or superseded by decree. **This SWSP will only be extended for the period of November 1, 2022 through December 31, 2022 if a copy of the executed lease with the City of Westminster is provided to this office on or before October 31, 2022.** Should a request for renewal of this plan be needed, such renewal request must be submitted to this office with the statutory fee (currently \$257 per pit) no later than November 1, 2022. **If a renewal request is received after the expiration date of this plan, it may be considered a request for a new SWSP in which case the filing fee for a new SWSP will apply (currently \$1,593 per pit).**

2. Well permits have been obtained for the current use and exposed groundwater surface area of each gravel pit in accordance with sections 37-90-137(2) and (11), C.R.S., as identified in Table A of this approval.
3. The total area of groundwater surface exposed after December 31, 1980 for each of the pits shall not exceed those values listed in Table A of this approval. Should the total surface area exposed exceed those amounts, an amendment will need to be filed with this office.
4. The total amount of groundwater to be consumed at each of the pits shall not exceed the values listed in Table C of this approval. Total consumption at each pit must not exceed these amounts unless an amendment is made to this plan.
5. Approval of this plan is for the purposes as stated herein. This office must first approve any additional uses for the water. Any future additional historic consumptive use credit given (e.g., agricultural water transfer) for these sites must consider all previous credits given.
6. All releases of replacement water must be sufficient to cover all out-of-priority depletions in time, place, and amount and must be made under the direction and/or the approval of the water commissioner(s). If approved prior, the release of replacement water may be aggregated to maximize beneficial use. The water commissioner(s) and/or the division engineer shall determine the rate and timing of an aggregated release.
7. Conveyance loss for delivery of replacement water is subject to assessment and modification as determined by the division engineer. The distance for assessment of conveyance loss will be based upon DWR stream miles or as approved by the Water Commissioner, and will be assessed from the point of release to the point of depletion/replacement.
8. The replacement water which is the subject of this plan cannot be sold or leased to any other entity unless prior approval is obtained from the state or division engineer. As a condition of subsequent renewals of this substitute water supply plan, the replacement water must be appurtenant to these sites until a plan or plans for augmentation are obtained. All replacement water must be concurrent with depletions in quantity, timing, and locations. According to affidavits dated February 29, 2012 and April 23, 2019, the Applicant dedicated the 13.5 shares of the Whitney Ditch Company, 96 shares of the Fulton Irrigating Ditch Company, and 5/12th interest in the Zweck & Turner Ditch as replacement water solely for this SWSP for as long as there are depletions at these gravel pit sites or until such time as another replacement source is obtained. For the purposes of this SWSP, these affidavits will be accepted for the dedication of the shares; however, if the state engineer determines that a different affidavit or dedication process is necessary to assure proper dedication of the shares, additional information may be required prior to future SWSP approvals.
9. All diversions shall be measured in a manner acceptable to the division engineer. The Applicant shall install and have approved by the Water Commissioner all structures prior to any credit or use in this SWSP. The Applicant shall maintain such measuring devices as required by the division engineer for operation of this SWSP.
10. The Applicant shall provide daily accounting (including, but not limited to diversions, depletions, replacement sources, and river calls) on a monthly basis. The accounting must be uploaded to the CDSS Online Reporting Tool within 30 days of the end of the month for which the accounting applies (<https://dwr.state.co.us/Tools/reporting>). In addition, the accounting must be submitted to the water commissioners [currently Jorge Vidal (Jorge.Vidal@state.co.us), Mark Simpson (Mark.Simpson@state.co.us), Shera Sumerford (Shera.Sumerford@state.co.us), Michael Hein (Michael.Hein@state.co.us), and Brent Schantz

(Brent.Schantz@state.co.us)] within 30 calendar days of the end of the month for which the accounting is being made. Instructions for using the tool are available on the Division of Water Resources website on the “Services” → “Data & Information” page under the heading of “Online Data Submittal. Accounting and reporting procedures are subject to approval and modification by the division engineer. Accounting forms need to identify the WDID number for each structure operating under this SWSP. **NOTE:** Monthly accounting, even during the winter non-irrigation season, is required. Submitted accounting shall conform to the attached Division One Administration Protocol “*Augmentation Plan Accounting*”.

In addition, the Applicant shall verify that each entity making replacements for this plan have included this plan in their respective accounting submitted to the division engineer. For this plan period those entities are the City of Longmont, Centennial Water and Sanitation District, City of Westminster, and City of Thornton.

11. All return structures utilized in this plan must have a measuring device equipped with an electronic recording device and must be approved by the water commissioner prior to use. In addition, all charts or other output data associated with each measuring device utilized in this plan must be provided in a timely manner acceptable to all of the water commissioners identified herein.
12. Prior to using a downstream replacement source for upstream depletions, or prior to operating any administrative exchange, the Applicant shall be required to provide 48 hours advanced notice and obtain prior approval from the Water Commissioners. In addition, the Applicant will coordinate deliveries of changed shares back to the river from the Whitney Ditch, the Fulton Ditch, the Brighton Ditch, and the Greeley Irrigation Canal with the Water Commissioners. Aggregate will track and provide the amount of water available, the amount of water requested, and the amount of water delivered on a daily basis or as required by the water commissioner. Any use of downstream replacement sources for upstream depletions, or any operation of an administrative exchange, can only operate when there is sufficient streamflow and no intervening call for water within the impacted reach.
13. In order to prevent injury to other water rights, the division engineer and water commissioner must be able to administer Applicants’ replacement water past headgates on the river at times when those headgates would otherwise be legally entitled to divert all available flow in or “sweep” the South Platte River or its tributaries. Applicant shall not receive credit for replacement of depletions to the South Platte River or its tributaries below such diversion structures unless bypass and measurement structures are in place to allow the division engineer and water commissioner to confirm that Applicant’s replacement water is delivered past the headgates. In the event that delivery past dry-up points requires the use of a structure for which a carriage or use agreement with a third party is required, Applicant shall be responsible for securing such agreement. Until such time as the Applicant provides a copy of the carriage or use agreement to the division engineer and water commissioner, no credit will be allowed for replacement of depletions to the South Platte River or its tributaries below such diversion structure.
14. The Division of Water Resources will not be responsible for any enforcement or administration of third party agreements that are not included in a decree of the water court.
15. The name, address, and phone number of a contact person who will be responsible for the operation and accounting of this plan must be provided to the Water Commissioner(s) and the Division Engineer.

16. Subject to prior approval by the division engineer, the Applicant may lease or purchase additional replacement water as identified in this SWSP request. Such additional sources of replacement water may only be used in this SWSP if the Applicant complies with the attached Division One Administration Protocol *“Use of Replacement Sources Not Specifically Identified in an SWSP or Augmentation Plan”*.
17. The Applicant shall perform an inspection of the dried up parcel, submit a Dry-Up Report - Verified Statement of that inspection, and provide a zipped GIS shapefile of the dried-up land as follows:
- The Applicant’s inspection of dry-up must be submitted on the Dry-Up Report - Verified Statement form at the beginning of the irrigation season indicating planned dry-up and then again in the fall after the irrigation season confirming the planned dry-up was accomplished. A pdf map may be attached to that report. The Dry-Up Report - Verified Statement form is available for download from the Division of Water Resources’ website at:
https://drive.google.com/drive/folders/1TF0aINt6f5fla0Xz_n1_iAGCg4xusRN2
(Water Administration Documents / South Platte River Basin Forms). The Dry-Up Report - Verified Statement must be signed by an individual with personal knowledge of the dry-up for the entire irrigation season for each parcel of land associated with the change of water right in this SWSP.
 - GIS shapefiles in a file format *.zip outlining the dry-up shall also be submitted at the same time as the Dry-Up Report. The GIS files must include any accompanying attribute data and the datum must be NAD83 and the UTM projection must be Zone 13N.
 - Submittals shall be made by May 31, 2022 for planned dry-up and by October 31, 2022 for dry-up confirmation. Submittals shall be made through the CDSS Online Reporting Tool (<https://dwr.state.co.us/Portal/?ReturnUrl=/Tools/Reporting>). Instructions for using the tool are available under Services / Data and Information in the Online Data Submittal Section. Two new Reporting Submittal Tool elements will be created for this SWSP: (1) Dry-up shapefile and (2) Dry-up Report - Verified Statement. For additional assistance, with Online Reporting Submittals, contact Dawn Ewing in the Division 1 office.
18. The historical consumptive use attributed to the changed surface water right(s) under this SWSP shall not include groundwater contributions. As a result, the historical consumptive use (“HCU”) credit calculated for the subject water right(s) to be changed by this SWSP shall be reduced by any ongoing sub-irrigation from groundwater. In order to ensure the required dry-up conditions exist during the approval period of this SWSP, and to ensure no sub-irrigation from groundwater is occurring, the Applicant shall provide records of monthly monitoring of depth to groundwater for all land associated with the change of water right(s) in this SWSP. Information regarding depth to groundwater may be provided using existing irrigation wells, existing or new monitoring wells, or piezometers located on the dried-up fields. The Applicant may utilize wells or piezometers located within ¼ mile of each field provided that the Applicant can demonstrate the depth to groundwater information available off-site is representative of the depth to groundwater on the dried-up land. The Applicant shall modify its accounting to reduce the amount of the calculated HCU that may be claimed in this SWSP according to the table below. Measurements taken at the start of each month will determine the necessary reduction in credit to be applied during the following month. The Applicant may use another methodology upon review and prior approval by the state

engineer and division engineer. (Construction of monitoring holes/wells, or piezometers requires that permits or notices be obtained as described in Table 1 of the Water Well Construction Rules.)

Depth to Groundwater (Feet)	Percent Reduction in Calculated HCU ¹	
	Native Grass	Alfalfa
1	85%	100%
2	50%	90%
3	30%	75%
4	20%	50%
5	15%	35%
6	10%	20%
7	5%	15%
8	0%	10%

1. Adapted from *EVAPOTRANSPIRATION AND AGRONOMIC RESPONSES IN FORMERLY IRRIGATED MOUNTAIN MEADOWS*, South Park, Colorado, March 1, 1990; Revised September 1, 1991

19. Dewatering at the Wattenberg Pit, W.W. Farms Pit, Tull Pit, Tucson South Pit, and Irwin-Thomas Pit will produce delayed depletions to the stream system. As long as the pits are continuously dewatered, the water returned to the stream system should be adequate to offset the depletions attributable to the dewatering operation. Once dewatering at a site ceases, the delayed depletions must be addressed. Accordingly, dewatering is required to continue at the Wattenberg Pit, W.W. Farms Pit, and Tull Pit during the term of this approval. Once dewatering has begun at the Tucson South Pit and Irwin-Thomas Pit it will be required to continue during the term of this approval. At least three years prior to completion of dewatering, a plan must be submitted that specifies how the post pumping dewatering depletions (including refilling of the pit) will be replaced in time, place and amount.
20. Prior to claiming any credit for the water returned to the stream system from dewatering in excess of lagged dewatering depletions (a net accretion), the Applicant must install a totalizing flow meter that accurately measures the quantity of water being pumped and returned to the stream system via dewatering operations and account on a real time basis for the actual dewatering depletions and accretions. No net accretion credits are sought by the Applicant for this approval period.
21. If dewatering of any of these sites is discontinued, the pit would fill, creating additional depletions to the stream system due to increased evaporation. To ensure that additional depletions to the river do not occur, a bond has been obtained through the DRMS for lining or backfilling of the pits. Therefore, if the dewatering is discontinued, these bonds can finance the completion of the lining of these pits or the backfilling, thus preventing depletions to the stream system.
22. The approval of this substitute water supply plan does not relieve the Applicant and/or landowner of the requirement to obtain a Water Court decree approving a permanent plan for augmentation or mitigation to ensure the permanent replacement of all depletions, including long-term evaporation losses and lagged depletions after gravel mining operations have ceased.
23. If reclamation of the mine sites will produce a permanent water surface exposing groundwater to evaporation, an application for a plan for augmentation must be filed with the Division 1 Water Court at least three (3) years prior to the completion of mining to include, but not be limited to, long-term evaporation losses and lagged depletions. If a lined pond results after reclamation, replacement of lagged depletions shall continue until there is

no longer an effect on stream flow. According to the SWSP request, mining of material has ceased at the Jeronimus Pit, Hazeltine Pit, Platte Valley Pit, F-Street Pit, Brighton Pit, Distel Pit, and Wattenberg Pit. Since material mining has ceased at these sites, either the lakes must be lined or backfilled, or an application for a plan of augmentation for the site must be filed with the water court. In addition all lagged depletions shall continue to be replaced under a SWSP until there is no longer an effect on stream flow or a court approved augmentation plan is approved by the water court. Granting of this plan does not imply approval by this office of any such court application(s).

24. The state engineer may revoke this SWSP or add additional restrictions to its operation if at any time the state engineer determines that injury to other water rights has occurred or will occur as a result of the operation of this SWSP. Should this SWSP expire without renewal or be revoked prior to adjudication of a permanent plan for augmentation, all excavation of product from below the water table, and all other use of water at the pits under this SWSP, must cease immediately.
25. In accordance with amendments to section 25-8-202(7), C.R.S. and Senate Bill 89-181 Rules and Regulations adopted on February 4, 1992, the state engineer shall determine if this substitute supply is of a quality to meet requirements of use to which the senior appropriation receiving the substitute supply has normally been put. As such, water quality data or analyses may be requested at any time to determine if the requirement of use of the senior appropriator is met.
26. The decision of the state engineer shall have no precedential or evidentiary force, shall not create any presumptions, shift the burden of proof, or serve as a defense in any water court case or any other legal action that may be initiated concerning the substitute water supply plan. This decision shall not bind the state engineer to act in a similar manner in any other applications involving other plans or in any proposed renewal of this plan, and shall not imply concurrence with any findings of fact or conclusions of law contained herein, or with the engineering methodologies used by the Applicant.

Should you have any further comments or questions, please contact Michael Hein, Lead Assistant Division Engineer, in Greeley at 970-352-8712 or Javier Vargas-Johnson of this office.

Sincerely,

for Jeff Deatherage, P.E.
Chief of Water Supply

Lease of Excess Augmentation Credits

This water lease is by and between Aggregate Industries-WCR, Inc. ("AI") and Bucklen Equipment Co., Inc. ("Bucklen"), sometimes collectively referred to as "the Parties".

WHEREAS Bucklen operates a gravel pit Substitute Water Supply Plan (SWSP) for the Bucklen Pit approved by the Division of Water Resources in accordance with C.R.S. §37-90-137(11); and

WHEREAS under conservative assumptions the 2021 SWSP approval for the Bucklen Pit SWSP projects that the Bucklen Pit SWSP will have excess augmentation credit totaling 57.34 acre-feet during the 2021 plan approval period; and

WHEREAS AI operates a combined substitute supply plan (CoSSP) for its various gravel pits approved by the Division of Water Resources in accordance with C.R.S. §37-90-137(11); and

WHEREAS the AI CoSSP may require additional augmentation credit during the 2021 irrigation season;

NOW THEREFORE, in consideration of the foregoing, it is agreed as follows:

1. Bucklen will lease to AI as needed any excess augmentation credit it has available during the 2021 irrigation season according to the Bucklen Pit SWSP monthly accounting submitted to the Division of Water Resources. The amount of excess augmentation credit that will be available during the 2021 irrigation season is currently estimated to equal the values below:

Month	Apr-21	May-21	Jun-21	Jul-21	Aug-21	Sep-21	Oct-21	Total
Estimated Excess [ac-ft]	4.06	10.63	9.44	9.76	9.76	8.34	5.36	57.34

2. The water leased to AI is for the exclusive use by AI and shall not be leased or conveyed to others except by written permission from Bucklen.
3. The cost of the lease water shall be \$100 (ONE HUNDRED DOLLARS) per acre-foot. The volume of water leased by AI each month will be reported to Bucklen within thirty days of the close of that month. Payment will be made by AI within thirty days following the end of the 2021 irrigation season for all water leased. This payment shall be nonrefundable and is not contingent upon AI's actual usage of the water.

DATED this 1 day of January, 2021.

Lease of GIC Shares

This water lease is by and between Aggregate Industries-WCR, Inc. ("AI") and Pat Arnold ("SHAREHOLDER"), sometimes collectively referred to as "the Parties".

WHEREAS SHAREHOLDER owns 3 shares in the Greeley Irrigation Company (GIC), as evidenced by Certificate Nos. 2455 and 2476, and

WHEREAS SHAREHOLDER desires to rent out their GIC shares for the 2021 irrigation season; and

WHEREAS AI operates a combined substitute supply plan (CoSSP) for its various gravel pits approved by the Division of Water Resources in accordance with C.R.S. §37-90-137(11); and

WHEREAS AI desires to rent GIC shares for 2021 irrigation season to be used as a replacement supply in their CoSSP;

NOW THEREFORE, in consideration of the foregoing, it is agreed as follows:

1. SHAREHOLDER will lease to AI their 3 GIC shares for the 2021 irrigation season. Before April 1, 2021, SHAREHOLDER will direct the GIC to deliver their shares to the 4th Street Augmentation Station on the ditch to return the water associated with the shares to the river in order to generate replacement credit on behalf of AI during the entire 2021 irrigation season.
2. The water leased to AI is for the exclusive use by AI and shall not be leased or conveyed to others except by written permission from SHAREHOLDER.
3. AI will pay the cost of the 2021 assessments on SHAREHOLDER's behalf for the 3 GIC shares, at a rate of up to \$540 (FIVE HUNDRED DOLLARS) per share, which is up to \$1,620 total for all three shares. Payment will be made directly to the GIC. SHAREHOLDER will be responsible for payment of any assessments in excess of the maximum \$540 per share paid by AI. Payment will be made by AI within thirty days following the date that the GIC determines the 2021 assessment rate. This payment shall be nonrefundable and is not contingent upon AI's actual usage of the water.

DATED this 19 day of February, 2021.

WATER SUPPLY AGREEMENT

This WATER SUPPLY AGREEMENT ("Agreement") is made and entered into this 10th day of December, 2021, by and between the City of Longmont, a municipal corporation organized under the laws of the State of Colorado, and acting by and through its Water Utility Enterprise ("Longmont"), whose address is 1100 South Sherman Street, Longmont, Colorado 80501, and Aggregate Industries-WCR, Inc., whose mailing address is 1687 Cole Blvd., Suite 300, Golden, Colorado 80401 ("Customer"). Longmont and Customer may sometimes be referred to herein individually as a "Party" or collectively as "Parties."

RECITALS

A. Longmont, a home rule municipality in Boulder County, Colorado, duly organized and existing under Article XX of the State Constitution, acting on behalf of its water utility enterprise, is authorized, pursuant to Sections 1.2, 1.3, and 11.1 of Longmont's Home Rule Charter and Section 31-15-101, et seq., C.R.S., as amended, to acquire, hold, lease, and dispose of real and personal property, including water and water rights.

B. Longmont owns water, water rights, or water credits in the St. Vrain Creek basin that are fully consumable.

C. Longmont and Customer desire to enter into this Agreement to provide water to be supplied by Longmont to Customer.

D. Pursuant to section 14.09.030 of the Longmont Municipal Code, Longmont's General Manager of Public Works and Natural Resources, or the General Manager's designee, is authorized to enter into and execute water rights leases or raw water supply agreements, at the then-current rental market rates for agricultural and other uses, or exchange agreements by which Longmont obtains water of equal or greater value, of one year or less.

AGREEMENT

Now, therefore, in consideration of the foregoing recitals, and mutual covenants and agreements herein, and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as follows:

1. Supply. Longmont hereby agrees to provide to Customer 23.5 acre-feet of fully consumable water (the "Subject Water"). The Subject Water may be selected and delivered by Longmont, in its discretion, from various sources including reusable effluent, water stored in Union Reservoir, other fully consumable water controlled by Longmont, or water from any other source, provided the Subject Water shall be usable by Customer for its stated purpose.

2. Deliveries.

2.1. Point of delivery. Longmont shall, at its sole discretion, deliver the Subject Water at either (hereinafter the "Delivery Point"): (1) the outfall of Longmont's municipal

wastewater treatment plant, presently located in the SE¼ NW¼ of Section 11, T2N, R69W of the 6th P.M., Boulder County, Colorado; or (2) the confluence of Spring Gulch and the Saint Vrain Creek, presently located in the SE¼ of Section 7, T2N, R68W of the 6th P.M., Weld County, Colorado. Customer shall bear any losses associated with conveyance of the Subject Water from the Delivery Point to any location where Customer may use the Subject Water. Longmont shall be responsible for all losses and/or return obligations associated with delivery of the Subject Water to the Delivery Point.

2.2. Timing of deliveries. The Subject Water shall be delivered based upon the following schedule:

<u>Month</u>	<u>Year</u>	<u>Ac-Ft</u>
April	2022	0.0
May	2022	4.2
June	2022	4.5
July	2022	4.7
August	2022	4.9
September	2022	0.0
October	2022	5.2
Total		23.50

2.3. Accounting. Longmont shall maintain an accounting of all deliveries of the Subject Water to Customer, and shall provide monthly copies of such accounting to Customer upon request.

3. Use of Subject Water. Customer shall use the Subject Water at the South Platte River Basin Pits (the "Property"). No change of Longmont's water rights shall be applied for or reviewed as part of such use. Customer shall be responsible for obtaining all necessary authorizations, approvals, decrees, and/or permits from any and all private entities, and local, state, and federal agencies, as may be required to effectuate use of the Subject Water by Customer pursuant to this Agreement. If requested, Customer shall provide copies of any such authorizations, approvals, and permits to Longmont.

4. Rate. Customer agrees to pay Longmont [REDACTED] per acre-foot. The total price for the 23.50 acre-feet of Subject Water is [REDACTED]. Payment to Longmont of [REDACTED] is due upon execution of this Agreement; such payment shall be nonrefundable and not contingent upon whether the Subject Water is actually diverted or used by Customer, so long as Longmont delivered the Subject Water based upon the schedule in paragraph 2 above.

5. Term. The term of this Agreement shall begin at time of execution of this Agreement and payment to Longmont of the Rate as outlined in Paragraph 4, and shall end on December 31, 2022.

6. Untreated water. The water delivered to Customer under this Agreement is untreated or non-potable water of whatever quality that is now or in the future available from the sources specified herein. Delivery of non-potable water under this Agreement will be on an "as

is” basis only, and Longmont does not warrant the quality of the Subject Water or the suitability of the Subject Water for any particular purpose. Customer shall not make any claim against Longmont arising from the quality of water delivered, and Longmont shall have no treatment responsibility for the Subject Water made available under this Agreement.

7. Indemnification. Customer shall bear all responsibility for its use of the Subject Water provided under this Agreement, together with the costs associated therewith. To the extent allowed by law, Customer shall defend, indemnify, and hold harmless Longmont from and against any and all damages, claims, losses, obligations, other costs, and other liabilities arising out of Customer’s use of the Subject Water provided under this Agreement.

8. Transfer and assignment. This Agreement, and the right to use the Subject Water, may not be transferred, assigned, subleased, or otherwise conveyed by Customer for use at locations other than the Property without the prior written consent of Longmont.

9. Use Restrictions and Accounting. Customer shall not use any water provided by Longmont under this Agreement for any oil and gas operation, nor suffer such water to be put to such use by anyone to whom Customer conveys the water, or their ultimate successors or assigns. Customer shall not provide this water to any subject political entity or for any use within an urbanized area, as those terms are defined in Chapter 14.09 of the Longmont Municipal Code, as amended, nor suffer the water to be transferred to such entities or used in such areas by anyone to whom Customer conveys the water, or their ultimate successors or assigns. Water used solely at the Property to satisfy the Customer’s substitute water supply plan obligations complies with these restrictions. Customer shall account for, and make record of, all uses, deliveries, and transfers of the water provided by Longmont under this Agreement; shall include such information in the monthly State accounting form required to be submitted to the State Engineer’s Office, Division One Engineer; and shall provide Longmont a copy of such form when it is submitted thereto or required to be submitted thereto, whichever is sooner. Satisfaction of Customer’s substitute water supply plan obligations shall qualify as a final use of the water.

10. Water Conservation. Customer agrees to implement or continue reasonable Best Management Practices (“BMP”) for water conservation during the term of this Agreement. This paragraph shall not be construed to require any specific BMP but shall broadly be held to encourage reasonable, cost effective efforts to conserve water used by Customer both under this Agreement and for base water supplies used by Customer. Procedures and application processes for this paragraph shall be as outlined in the City’s annual Water Supply and Drought Management Plan.

11. Integration. This instrument embodies the whole agreement of the Parties with respect to the subject matter contained herein. This Agreement shall supersede all previous communications, representations, or agreements, whether verbal or written, between the Parties hereto. There shall be no modification of this Agreement nor waiver of any of its provisions, except upon mutual agreement of the Parties expressed in writing, executed with the same formalities as this instrument.

12. Default; Remedies. A default shall be deemed to have occurred if either Party breaches its obligations hereunder and fails to cure such breach within 30 days of written notice from the non-breaching Party specifying the breach. Waiver or failure to give notice of a particular default or defaults shall not be construed as condoning or acquiescing to any continuing or subsequent default. In addition to other legal remedies available to it, including specific performance and damages, the non-breaching Party shall also have the right to cancel this Agreement for noncompliance with any provision hereunder by giving written notice of cancellation; provided that such Party has previously given the other Party written notice of such noncompliance and the other Party has not cured such noncompliance.

13. Notices and payments. All notices, payments, and other communications under this Agreement shall be in writing, except as otherwise provided for in this Agreement. All such notices and communications and all payments shall be deemed to have been duly given on the date of service, if delivered and served personally, or served via facsimile (with respect to notices and communications only) on the person to whom notice is given; on the next business day after deposit for overnight delivery by a courier service such as Federal Express; or on the third day after mailing, if mailed to the Party to whom payment and notice is to be given by first class mail, postage prepaid, and properly addressed as follows:

Longmont: City of Longmont
 Deputy City Manager
 1100 South Sherman Street
 Longmont, Colorado 80501

With a Copy to: City of Longmont
 City Attorney
 408 Third Avenue
 Longmont, Colorado 80501

Customer: Aggregate Industries (US) Inc.
 1687 Cole Blvd., Suite 300
 Golden, Colorado 80401

Persons and addresses to which notices are to be sent may be changed by the same method.

14. No beneficiaries. This Agreement is for the sole benefit of and binds the Parties, their successors and assigns. This Agreement affords no claim, benefit, or right of action to any third party. Any person besides Longmont or Customer receiving services or benefits under this Agreement is only an incidental beneficiary.

15. Governmental immunity. Nothing in this Agreement shall be construed to waive Longmont's protection from liability or the limitations on its liability due to its sovereign immunity under the Colorado Governmental Immunity Act or otherwise.

16. Governing law. This Agreement shall be governed by and construed in accordance with the laws of the State of Colorado. In the event of litigation over this Agreement, jurisdiction

and venue shall be proper and exclusive in the District Court in and for Boulder County, State of Colorado.

17. Force majeure. Customer acknowledges that the availability of the Subject Water provided for hereunder is dependent upon natural water resources that are variable in quantity of supply, and which can be affected by causes beyond Longmont's control. Moreover, Longmont shall not be liable for any delay or failure to perform its obligations under this Agreement caused by an event or condition beyond the reasonable control of, and without the fault of Longmont, including, without limitation, failure of facilities, flood, earthquake, storm, lightning, fire, epidemic, contamination, war, terrorist act, riot, civil disturbance, labor disturbance, accidents, sabotage, or restraint by court or restrictions by other public authority which delays or prevents performance (including, but not limited to, the adoption or change in any rule, policy, or regulation or environmental constraints imposed by federal, state, or local governments), which Longmont could not reasonably have avoided by exercise of due diligence and foresight. Upon the occurrence of such an event or condition, the obligations of Longmont under this Agreement shall be excused and suspended without penalty or damages, provided that Longmont shall give Customer written notice describing the particulars of the occurrence or condition, the suspension of performance is of no greater scope and of no longer duration than is required by the event or condition, and Longmont proceeds with reasonable diligence to remedy its inability to perform and provides progress reports to Customer describing the actions taken to remedy the consequences of the event or condition.

18. Independent contractors. Both Parties shall perform all services under this Agreement as independent contractors and not as an agent or employee of the other Party. No official or employee of Longmont shall supervise Customer. No official or employee of Customer shall supervise Longmont. Neither Party shall represent that it is an employee or agent of the other Party in any capacity. Neither Party has any right to workers' compensation benefits from the other Party or its insurance carriers or funds. Customer shall pay any federal and state income tax on money earned under this Agreement.

19. No continuing duty to supply water. Longmont shall have no obligation to supply water to Customer after this Agreement expires or is otherwise terminated. By agreeing to deliver water to Customer under this Agreement, Longmont does not intend to represent itself as a public utility to Customer or others in such regard nor shall it be deemed to operate as a public utility. Customer shall not assert that Longmont is a public utility by reason of delivering water pursuant to this Agreement nor that it is subject to regulation as a public utility or subject to regulation by the Colorado Public Utilities Commission or to rate regulation by any other public entity.

20. Counterparts. This Agreement may be executed in any number of counterparts, each of which shall be deemed an original, and all of which shall constitute one and the same Agreement. Facsimile signatures shall be acceptable and binding upon all Parties.

21. Headings. All paragraph headings used herein are for the convenience of the Parties and shall have no meaning in the interpretation or effect of this Agreement.

22. Negotiated provisions. This Agreement shall not be construed more strictly against one Party than against the other merely by virtue of the fact that it may have been prepared by counsel for one of the Parties, it being recognized that both Longmont and Customer have contributed substantially and materially to the preparation of this Agreement.

23. Authority. The Parties warrant that they have taken all actions necessary or required by their own procedures, bylaws, or applicable law to authorize their respective signatories to sign this Agreement for them and bind them to its terms.

Executed as of the date first set forth above.

RE: Aggregate Industries Lease request for 2021

Dear Mr. Dains,

I am writing to confirm that Centennial W&S District will plan to provide 5 ac-ft in April, and 25 ac-ft in October as per your request on behalf of Aggregate Industries. Please let me know of any changes to your request.

Please contact me with any concerns.

Sincerely,

Swithin Dick

Water Resources Administrator

APPENDIX C

AGREEMENT TO LEASE AUGMENTATION WATER

THIS AGREEMENT TO LEASE AUGMENTATION WATER is entered into as of the 2 day of DECEMBER, 1996, between Centennial Water and Sanitation District ("Centennial"), a quasi-municipal corporation organized under the laws of Colorado, Lessor, whose address is 62 W. Plaza Drive, Highlands Ranch, Colorado 80126, and the Cooley Gravel Company ("Cooley"), a corporation duly organized and existing under and by virtue of the laws of the State of Indiana, Lessee, whose address is P. O. Box 5485 T.A., Denver, Colorado 80217, 3609 S. Wadsworth Boulevard, Suite 300, Lakewood, Colorado 80235.

RECITALS

WHEREAS, Cooley and Centennial entered into an Agreement to Convey Water Rights in Exchange for Lease of Augmentation Water dated 2 DECEMBER 1996; and

WHEREAS, pursuant to that agreement, Centennial agreed to provide certain augmentation water to Cooley, subject to the terms of both that agreement and the lease agreement herein.

NOW, THEREFORE, in consideration of this lease agreement and the Agreement to Convey Water Rights in Exchange for Lease of Augmentation Water, the parties agree as follows:

1. Upon completion of each of the following, Centennial shall deliver annually up to 30 acre-feet of perpetual augmentation water to be used in connection with Cooley's gravel mining operations located near the South Platte River or Plum Creek: execution of the special warranty deed conveying Cooley's 1.0546 shares of Nevada Ditch Holding Company stock to Centennial; assignment and delivery of Cooley's Nevada Ditch Stock Certificate No. 363 to Centennial; and transfer of said stock to Centennial's name on the books of Nevada Ditch Holding Company and issuance of a new stock certificate in Centennial's name, if necessary. This lease agreement and Centennial's obligation to deliver water hereunder shall be effective upon the date by which Cooley completes the performance of each of the foregoing obligations.

2. Such water shall be delivered, at Centennial's sole discretion, at any point on the South Platte River at or upstream from the mouth of Little Dry Creek in Section 33, T4S, R68W, of the

6th P.M., approximately 2350 feet from the South section line and 1650 feet from the East section line; or on Plum Creek, at or below the headgate of the Lower Plum Creek Ditch, located in the SW¼ of Section 28, Township 6 South, Range 68 West, 6th P.M., Douglas County, Colorado; or at the point where water from McLellan Reservoir can be discharged by pipeline into the South Platte River system; or at the point at which effluent is discharged to Marcy Gulch from Centennial's Marcy Gulch Wastewater Treatment Plant; or at a combination of any such points; or by not requiring augmentation water from Cooley sources above the Titan Road gage located on Plum Creek under the circumstances described in paragraph 4 below; or by a combination of the foregoing delivery points and methods. Centennial may deliver water hereunder to other points on the South Platte River and its tributaries, provided that Centennial and Cooley first agree in writing to such other delivery points. The augmentation water shall be deliverable throughout the year as requested by Cooley pursuant to paragraph 5 below. The points at which Centennial may deliver augmentation water under this lease agreement are not dependent on the location of Cooley's existing gravel mining operations. Such delivery points shall remain the same even if the location of Cooley's gravel mining operations changes, unless the parties agree otherwise in writing.

3. The water may be delivered from any source available to Centennial which is legally adequate for augmentation purposes. It shall be Cooley's responsibility to coordinate with the Colorado Division of Water Resources or other appropriate entities and agencies to obtain augmentation credit for the water. Centennial makes no representations or warranties, express or implied, regarding the quality of the augmentation water leased hereunder or regarding Cooley's ability to make use of any of the augmentation water leased hereunder in an augmentation program.

4. Centennial owns and uses water rights on Plum Creek including without limitation the Lower Plum Creek Ditch water right described in the decrees entered by the Division 1 Water Court in Case Nos. W-6072, 85CW415, and 93CW177. Centennial expressly reserves the right to place a call against Cooley's gravel mining operations on Plum Creek for the benefit of its Lower Plum Creek Ditch priority and any of its other Plum Creek water rights that are senior to Cooley's Plum Creek gravel mining operations. Notwithstanding the foregoing, Centennial and Cooley agree that when Centennial's Plum Creek water rights are the calling water rights requiring augmentation water from Cooley, Centennial may, at Cooley's discretion, satisfy its delivery obligation hereunder by not requiring augmentation water from Cooley sources above the Titan Road gage located on Plum Creek. If Cooley chooses not to allow Centennial to satisfy its delivery obligation hereunder by

the method described in the preceding sentence, Centennial may still place a call against Cooley's gravel mining operations on Plum Creek for the benefit of Centennial's Plum Creek water rights.

5. The amount of augmentation water to be delivered each year hereunder shall not exceed 30 acre-feet. On or before April 1 of every year, Cooley shall provide to Centennial a written estimate of the quantities of augmentation water needed by month for the next 12-month period, provided that the total amount to be delivered by Centennial over the next 12-month period shall not exceed 30 acre-feet per year. Such estimate shall be for the purpose of assisting Centennial in the planning of its water operations and shall not be binding upon Cooley. The rate of delivery shall not exceed 0.5 cfs. On or before the third day of every month, Cooley shall inform Centennial of the quantity of augmentation water needed during the previous month and shall give Centennial an estimate of the amount of water needed for the upcoming month.

6. Upon delivery of such water to the South Platte River or Plum Creek as described above in paragraph 2, Centennial shall have no further obligation to Cooley with respect to such water, and Cooley shall be solely responsible for the carriage of such water in the stream system and utilization of same for augmentation purposes.

7. The augmentation water leased hereunder shall be used only to help satisfy Cooley's obligation to replace out-of-priority depletions to Plum Creek, the South Platte River, or both, resulting from Cooley's gravel mining operations, including replacement of evaporation losses from water-filled gravel pits after mining operations cease.

8. Cooley shall not file an application for approval of an augmentation plan using water to be furnished by Centennial without Centennial's prior review and approval of the application, which approval shall not unreasonably be withheld. Centennial shall respond to Cooley's request for approval within thirty (30) days of receipt of the application that Cooley proposes to file. Centennial shall be entitled to be a party to the proceedings on the application in Water Court. Centennial agrees that it will consent to a decree of the District Court, Water Division No. 1, authorizing use of augmentation water furnished by Centennial subject to the terms of this lease agreement and not otherwise inconsistent with this lease agreement, provided the granting of such application will not otherwise injure Centennial's water rights.

9. Cooley shall have the right to an action for specific performance, but not for damages, if Centennial is ever in default on its obligations described herein. Cooley acknowledges that the water available to Centennial is dependent on sources from which the supply is variable in time and quantity and which are, to some extent, beyond the control of Centennial. Cooley agrees that Centennial shall not be considered to be in default on its obligations described herein as a result of unavailability of Centennial's water supply due to inadequate runoff or other occurrences beyond the reasonable control of Centennial. Centennial will make a reasonable attempt to notify Cooley in advance of any interruptions in delivery.

10. Cooley may terminate this lease agreement at any time by delivering written notice to Centennial. Upon delivery of such notice, this lease agreement shall be terminated. Such termination of this lease agreement shall not affect the validity of Centennial's ownership interest in the Nevada Ditch shares previously owned by Cooley described in paragraph 1. However, if Centennial's title to any part of said Nevada Ditch shares is ever defeated by the claim of a third party based upon acts or omissions attributable to Cooley while Cooley was an owner of said Nevada Ditch shares, then this lease shall terminate at Centennial's option, provided Centennial gives Cooley a reasonable opportunity to cure the title defect before Centennial notifies Cooley of such termination.

11. All notices provided for in this lease agreement shall be in writing, and shall be deemed properly given and received three (3) days after being mailed, if sent by certified or registered United States Mail, postage prepaid, addressed to a party at its address set forth at the beginning of this lease agreement or such other address as a party may designate by written notice to the other party.

12. Neither party to this lease agreement may assign its rights and obligations under this lease agreement without obtaining the express written consent of the other party. Subject to the foregoing, the terms and provisions of this lease agreement shall be binding upon and inure to the benefit of Centennial and Cooley, and their successors and assigns.

13. This Agreement represents the entire agreement between the parties and there are no oral or collateral agreements or understandings. This Agreement may be amended only by an instrument in writing signed by the parties.

Re: 2021 Effluent Deliveries per Consumable Water Lease Agreement

In accordance with Section 2.2 of the First Amendment to Consumable Water Lease Agreement (First Amendment) between the City of Westminster (Westminster) and Aggregate Industries-WCR, Inc. (AI) dated January 14, 2020, AI and Westminster hereby mutually agree to a 2021 total annual delivery amount of 184 acre-feet as set forth in the following delivery schedule for 2021:

All values in ac-ft					
Jan-21	Feb-21	Mar-21	Nov-21	Dec-21	Total
27	29	29	58	41	184

Delivery locations will be as outlined in Section 2.3 of the Consumable Water Lease Agreement dated March 4, 2010 which remains in full force and was not modified or revised by the First Amendment. In addition, delivery will be at a constant flow rate during each month of delivery, as nearly as practicable. AI and Westminster further agree that the annual lease payment for 2021 shall be prorated based upon the 2021 annual delivery amount of 184 acre-feet. The price for the leased water is \$300 per acre foot, so Westminster will invoice AI for a total of \$55,200.

EXCHANGE AGREEMENT

This Agreement ("Agreement") is entered into this 22nd day of May, 1998, between Camas Colorado, Incorporated, an Indiana corporation, ("Camas") and the City of Westminster, ("Westminster" or the "City").

WHEREAS, Westminster is a municipal corporation in the State of Colorado that provides water and sewer services to individuals located within the Westminster Water Service Area;

WHEREAS, Camas Colorado, Incorporated is a corporation of the State of Indiana and owns and operates Cooley Gravel Company in Colorado. Cooley Gravel Company is a wholly owned subsidiary of Camas engaged in certain mining activities in the State of Colorado ("Cooley");

WHEREAS, Cooley is the owner of the following water rights:

(a) 7.5 shares of the capital stock in the Farmers Reservoir and Irrigation Company ("FRICO") assigned for water delivery purposes to the Standley Division, Share Certificate Number 6974;

(b) 31 shares of the capital stock in the Manhart Ditch Company, Replacement Certificate for lost certificates Numbers 43 and 48;

(c) 40.875 shares of the capital stock of the Wellington Reservoir Company, Share Certificate Number 1272; and

(d) 48.715 shares of the capital stock of the Burlington Ditch Reservoir and Land Company, Share Certificate Number 3576.

Within fifteen (15) days of execution of this Agreement, Camas will cause Cooley to execute and record a quit claim deed and assignment of share certificates formally transferring Cooley's interest in the water rights identified above to Camas. The Water Rights identified herein shall thereafter be referred to collectively as the "Camas Water Rights";

WHEREAS, Camas is the owner of approximately 30.69 acres of land, more or less, located in the SE $\frac{1}{4}$ of Section 7, Township 3 South, Range 68 West of the 6th P.M., Adams County, more particularly described in the legal description attached hereto as Exhibit A (the "Camas Lands");

WHEREAS, in connection with the operation of its municipal water service system, Westminster owns certain water rights that yield water that has been decreed to be fully consumable. Moreover, in connection with the operation of its municipal water

treatment system, Westminster owns and generates fully consumable wastewater effluent at its Big Dry Creek Wastewater Treatment Plant ("Big Dry Creek") and at the Metropolitan Denver Wastewater Reclamation District's Sewage Disposal Plant ("Metro") on the South Platte River.

A WHEREAS, the parties wish to effectuate a transfer of ownership of the Camas Water Rights and the Camas Lands for certain cash payments and the provision of 290 acre feet of consumable water to Camas in perpetuity, (the "Camas Exchange") pursuant to the terms of this Agreement.

WHEREAS, in the judgment of the Westminster City Council, the terms of this Agreement coupled with the implementation of the Camas Exchange will result in improvement in the capacity, efficiency, or service of Westminster's utility system.

WHEREAS, pursuant to Section 14.2 of the Westminster City Charter, the City may otherwise dispose of property constituting part of the City's utility system subject to certain findings by the City Council.

WHEREAS, Westminster enters this Agreement to effect the disposition of a portion of the City's utility system and thereby facilitate the implementation of the Camas Exchange contemplated herein.

NOW THEREFORE, for and in consideration of the premises, the mutual promises contained herein, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties agree as follows:

1. Exchange.

The parties will exchange the Camas Water Rights and the Camas Lands for 290 acre-feet annually of consumable water and a one time payment of \$288,500.00, all pursuant and subject to the further terms of this Agreement.

2. Escrow.

Upon execution of this Agreement, the parties will create an interest-bearing escrow with Land Title Guarantee Company pursuant to Escrow Instructions in the form attached hereto as Exhibit B into which Westminster shall deposit the sum of \$20,000.00 (the "Escrow Funds"). The Escrow Instructions shall provide that if, within twenty (20) days of receipt of the Title Commitment described in Paragraph 3.2, below, Westminster provides Camas with written notice of title defects to the Camas Water Rights or to the

8.9 Effective Date. This Agreement shall be effective upon execution by both parties.

8.10 Execution of Counterparts. This Agreement may be executed in counterparts.

8.11 Authority. Each signatory acknowledges and represents that he or she has the authority to enter into this Agreement and bind the party for which he or she signs.

FIRST AMENDMENT TO CONSUMABLE WATER LEASE AGREEMENT

THIS FIRST AMENDMENT TO CONSUMABLE WATER LEASE AGREEMENT is entered into this 14th day of January 2020, between the City of Westminster ("Westminster"), lessor, and Aggregate Industries-WCR, Inc., a Colorado corporation ("AI"), lessee, (collectively, the "Parties").

WHEREAS, Westminster and AI are parties to an Agreement dated October 24, 2000, (the "Storage Agreement"), as amended on February 10, 2010, whereby AI is mining gravel deposits from certain lands located near Wattenberg, Colorado and, upon completion of mining, is constructing a water storage reservoir for Westminster on said lands;

WHEREAS, in connection with the Storage Agreement, the Parties entered into a Consumable Water Lease Agreement dated March 4, 2010, concerning Westminster's delivery of certain fully consumable water to AI, (the "Consumable Water Lease");

WHEREAS, pursuant to the terms of the Consumable Water Lease, Westminster leased up to 519 acre feet (AF) of fully consumable water to AI;

WHEREAS, the current Consumable Water Lease will expire under its own terms no later than December 31, 2019;

WHEREAS, in accordance with paragraph 3.12 of the Consumable Water Lease, the Parties may amend said lease by mutual written agreement; and,

WHEREAS, the Parties desire to extend the term of the Consumable Water Lease and amend it consistent with this First Amendment to Consumable Water Lease Agreement ("First Amendment").

NOW THEREFORE, the Parties agree as follows:

1. Paragraph 2 of the Consumable Water Lease is amended by deleting the entire paragraph and replacing it with the following:

Westminster will lease to AI for the term of this Agreement up to 250 acre-feet (AF) annually of Consumable Water from Westminster's municipal water supply system subject to the further terms and conditions of this Agreement.

2. Paragraph 2.1 of the Consumable Water Lease is amended by deleting the entire paragraph and replacing it with the following:

2.1 Term of Lease. The term of this Water Lease Agreement shall be from January 1, 2010 through June 30, 2022.

3. Paragraph 2.2 of the Consumable Water Lease is amended by deleting the entire paragraph and replacing it with the following:

2.2 *Amounts of Consumable Water Leased. The 250 acre feet of Consumable Water to be leased and delivered to AI shall be delivered so as not to exceed the following monthly amounts and schedule:*

<i>Month</i>	<i>Amount in acre feet</i>
<i>January</i>	<i>45.00</i>
<i>February</i>	<i>45.00</i>
<i>March 1-20</i>	<i>40.00</i>
<i>November 10-30</i>	<i>70.00</i>
<i>December</i>	<i>50.00</i>
<i>Total</i>	<i>250.00 a.f. per year</i>

Delivery shall be, as nearly as practicable, at a constant flow rate during each month of delivery, consistent with the total volume of water to be delivered in each month.

The parties may revise the above delivery schedule to reduce the monthly delivery amounts for a particular calendar year, provided that AI notifies Westminster in writing by November 1st of the preceding year of AI's projected delivery needs for that year. The delivery schedule may not be revised, however, to provide for deliveries outside of the November 10 to March 20 delivery season contemplated above. Delivery in any given month shall not exceed the constant flow rate of 2.0 c.f.s. Moreover, the reduction in delivery amounts may not fall below a total annual delivery of 100 acre feet without the mutual written agreement of the parties.

3. Paragraphs 2.4 and 2.4.1 of the Consumable Water Lease are amended by deleting the entire paragraphs and replacing them with the following:

2.4. *Lease Payments. AI shall pay the sum of \$300.00 per acre-foot per year of Consumable Water leased hereunder. In consideration for the water delivered hereunder, AI agrees to make the following payments to Westminster:*

2.4.1. *An annual payment of \$75,000.00—or a prorated payment based on any mutually agreed-upon reduced annual delivery amount in accordance with Section 2.2. of this Water Lease Agreement—on or before December 31st of each year Consumable Water will be delivered pursuant to this agreement.*

4. Paragraph 3.5.e. of the Consumable Water Lease is amended by deleting the entire paragraph and replacing it with the following:

e. *On June 30, 2022 unless a later date is subsequently agreed to by the parties.*

5. All remaining paragraphs of the Consumable Water Lease, not specifically mentioned above, shall remain in full force and effect and are in no way modified or revised by this First Amendment.

6. This First Amendment shall in no way modify or revise any portion of the Storage Agreement between the Parties.

EXHIBIT D

WATER LEASE

This Water Lease is made and entered into this 31ST day of MARCH, 2006 by and between THE CITY OF THORNTON, a Colorado municipal corporation, ("Thornton"), as Lessor and AGGREGATE INDUSTRIES - WEST CENTRAL REGION, INC., an Indiana Corporation, whose address is 1707 Cole Boulevard, Suite 100, Golden, Colorado, 80401 ("Lessee").

WHEREAS, Thornton owns fully consumable water in its municipal water system, which water, may be delivered to the South Platte River; and

WHEREAS, Thornton desires to lease to Lessee and Lessee desire to lease from Thornton a portion of Thornton's fully consumable water; and

WHEREAS, As consideration for this Water Lease, Lessee is simultaneously selling and transferring 3.0 shares in the Colorado Agricultural Ditch Company (Certificate number 1000) to Thornton pursuant to the Agreement for the Purchase, Sale and Lease of Water Rights dated JANUARY 12, 2005

NOW, THEREFORE IN CONSIDERATION OF THE ABOVE REPRESENTATIONS AND OF THE MUTUAL PROMISES AND COVENANTS CONTAINED HEREIN AND, THE RECEIPT AND ADEQUACY OF WHICH IS HEREBY MUTUALLY ACKNOWLEDGED, THE PARTIES AGREE AS FOLLOWS:

1. Term. This Water Lease shall be a permanent lease, subject to termination only in the event that Lessee, its heirs or assigns notify Thornton in writing that it no longer has any use for, and no longer desire to use the fully consumable water.

2. Consideration. As consideration for this Water Lease, Lessee is simultaneously selling and transferring 3.0 shares in the Colorado Agricultural Ditch Company (Certificate number 1000) to Thornton pursuant to the Agreement for the Purchase, Sale and Lease of Water Rights dated 1/12, 2005. As consideration for the 3.0 Colorado Agricultural Shares, Thornton agrees to permanently lease and provide for Lessee's use the following amount of fully consumable water delivered by Thornton to the South Platte River from any fully consumable water rights owned by Thornton. The rate, period and location of water delivery are set forth below.

- a) Delivery Period and Rate. Thornton shall deliver fully consumable water at a rate of 0.035 c.f.s./day November 1 through March 31.
- b) Location. Thornton agrees to deliver the fully consumable water to the South Platte River in the reach from the outfall of the Metropolitan Wastewater Reclamation District Central Plant to the confluence of Big Dry Creek and the South Platte River, but in any case above the calling right within that reach.

3. Water Quality. Thornton does not warrant or guarantee that the water it provides satisfies any water quality standards.

4. Assignability. Lessee may freely assign its rights under this Water Lease in whole or in part to any other person or entity. No such assignment will be effective until written notice has been given to Thornton and no assignment will be allowed if it increases the obligations under this Water Lease. Prior to selling, permanently assigning or otherwise transferring Lessee's rights under this Water Lease, Lessee agrees to notify Thornton of its intent to transfer the rights and enter into an exclusive 30 day negotiation period with Thornton to determine if the Parties can come to an agreement to transfer the rights back to Thornton. Thornton may assign its obligation under this agreement only with the written consent of Lessee or its assignee, which consent shall not be unreasonably withheld.

5. Venue. This Water Lease shall be governed by the laws of the State of Colorado, and any legal action concerning the provisions hereto shall be brought in the County of Adams, State of Colorado.

6. Entire Agreement. This Water Lease constitutes the entire agreement between the parties superseding all prior oral or written communications. None of the provisions of this Water Lease may be amended, modified or changed except by a writing signed by both parties.

7. Waiver. The waiver of any breach of any of the provisions of this Water Lease by either party shall not constitute a continuing waiver or a waiver of any subsequent breach by said party either of the same or of another provision of this Water Lease.

8. Notices. All notices and communications regarding this Water Lease should be directed, in writing by hand delivery or certified mail return receipt requested, to the Water Resources Manager, Civic Center, 9500 Civic Center Drive, Thornton, Colorado, 80229, for Thornton and to Aggregate Industries, Attn: Michael Refer, Vice President of Administration, 1707 Cole Boulevard, Suite 100, Golden, Colorado, 80401 for Lessee, or to any subsequent address provided by the parties.

IN WITNESS WHEREOF, the Parties have executed this Water Lease on the date first above written.

FIRST AMENDMENT TO WATER LEASE

THIS FIRST AMENDMENT TO WATER LEASE is entered into this 14th day of January 2020, between the City of Westminster ("Westminster"), lessor, and Aggregate Industries-WCR, Inc., a Colorado corporation ("AI"), lessee, (collectively, the "Parties").

WHEREAS, Westminster and AI are parties to an Agreement dated October 24, 2000, (the "Storage Agreement"), as amended on February 10, 2010, whereby AI is mining gravel deposits from certain lands located near Wattenberg, Colorado and, upon completion of mining, is constructing a water storage reservoir for Westminster on said lands;

WHEREAS, in connection with the Storage Agreement, the Parties entered into a Water Lease agreement dated March 4, 2010, concerning Westminster's 1.038 shares in the Brighton Ditch, (the "BDC Shares"), identified as Stock Certificate Numbers 228 and 229 (the "Water Lease");

WHEREAS, pursuant to the terms of the Water Lease, Westminster leased its BDC Shares to AI;

WHEREAS, during the term of the current Water Lease, Westminster's BDC Shares were the subject of a change of water right decree issued on July 2, 2018 in Case No. 16CW3186;

WHEREAS, the current Water Lease will expire under its own terms no later than March 4, 2020; and,

WHEREAS, the Parties desires to extend the term of the Water Lease and amend it consistent with this First Amendment to Water Lease ("First Amendment").

NOW THEREFORE, the Parties agree as follows:

1. Paragraph 2 of the Water Lease is amended by deleting the entire paragraph and replacing it with the following:

2. AI agrees to put the water derived from the BDC Shares to "beneficial use" as that term is defined under Colorado Water Law, and will take no action that would constitute an abandonment of the BDC Shares or otherwise jeopardize the historical consumptive use associated with the BDC Shares. AI further agrees that its use of the BDC Shares shall be in compliance with the terms and conditions of the change of use decree issued in Case No. 16CW3186. During the term of this lease, AI shall be responsible for satisfying all return flow obligations and maintaining required accounting information associated with its use of the BDC Shares in accordance with the terms of said decree. To this end, AI will promptly provide Westminster with monthly accounting information for its use of the BDC Shares so Westminster can timely incorporate the information into Westminster's accounting submittals to the State and Division Engineer. AI shall

be solely responsible for any accounting submittals it must make to the State and Division Engineer as required by any approved Substitute Water Supply Plan that involves use of the BDC Shares. In addition, AI agrees that it will limit its diversions under the BDC Shares to no more than 352.9 acre feet in any irrigation season, as well as the monthly maximums set forth below:

<i>April</i>	<i>May</i>	<i>June</i>	<i>July</i>	<i>August</i>	<i>September</i>	<i>October</i>
<i>40.0 a.f.</i>	<i>70.0 a.f.</i>	<i>66.2 a.f.</i>	<i>78.5 a.f.</i>	<i>67.2 a.f.</i>	<i>50.0 a.f.</i>	<i>40.0 a.f.</i>

2. Paragraph 6.a. of the Water Lease is amended by deleting the entire paragraph and replacing it with the following:

a. The completion by AI and acceptance by Westminster of lined storage pursuant to the terms of the Storage Agreement of storage amounts in excess of 3,000 acre feet; or

3. Paragraph 6.f. of the Water Lease is amended by deleting the entire paragraph and replacing it with the following:

f. June 30, 2022; or

3. Paragraph 12 of the Water Lease is amended by deleting the entire paragraph and replacing it with the following:

12. By decree in Case No. 16CW3186, Westminster has changed the use of the BDC Shares to municipal uses. AI agrees that it will not oppose, but will cooperate with the City on, any actions filed in the water court or administrative or other proceedings for approval of the City's request for a change of use of the BDC Shares, including, but not limited to, an application involving a change of water right, alternate point of diversion, appropriative rights of exchange or other water court applications involving the BDC shares, and/or any amendment to the decree in Case No. 16CW3186.

4. All remaining paragraphs of the Water Lease, not specifically mentioned above, shall remain in full force and effect and are in no way modified or revised by this First Amendment.

5. This First Amendment shall in no way modify or revise any portion of the Storage Agreement between the Parties.

Dedication of Water Rights to the

Aggregate Industries Combined Substitute Supply Plan

Aggregate Industries – WCR, Inc. (AI), is the owner of 13.5 shares of the Whitney Ditch Company (which are associated with the W.W. Farms Pit, DRMS Permit No. M-99-098), and 96 shares of the Fulton Irrigating Ditch Company (which are not associated with any specific site but rather are associated generally with the entire AI Combined Substitute Water Supply Plan (CoSSP)). AI hereby affirms that the above water rights will be dedicated solely to the AI CoSSP for as long as there are depletions at the associated gravel pits or until such time as another replacement source is obtained. The water rights will not be sold, leased, or traded to others during the term of this dedication. This dedication supersedes the previous dedication dated January 25, 2011.

**Dedication of Water Rights to the
Fredstrom Pit Substitute Water Supply Plan**

Golden Land Company, LLC, as the owner of 5/12ths interest in the Zweck & Turner Ditch, hereby affirm that a pro-rata share (as pro-rata is defined below) of said water rights will be dedicated solely to the Fredstrom Pit Substitute Water Supply Plan for as long as there are depletions at this gravel pit, until such time as another replacement source is obtained, or until the associated depletions are reduced requiring less water to be dedicated. This dedication is subject to the terms & conditions of Paragraph 10 of the Purchase and Sale Agreement between Aggregate Industries- WCR, Inc & Golden Land Company, LLC dated March 13, 2018, which makes available for mining operations a pro-rata share of the water rights appurtenant to the property based on the ratio of mined acres to total farmable acres; the remaining pro-rata share of the water rights not used for mining may continue to be used for irrigation of the property. Other than as allowed by the aforementioned Purchase and Sale Agreement, the water right will not be sold, leased, or traded to others during the term of this dedication.

TEMPORARY CARRIAGE AGREEMENT

THIS AGREEMENT, is entered into this 13th day of April, 2021, by and between THE WHITNEY IRRIGATION COMPANY, whose address is 30951 County Road 27, Greeley, Colorado, hereinafter referred to as the "Company," and AGGREGATE INDUSTRIES-WCR, INC., whose address is 1687 Cole Boulevard, Suite 300, Golden, Colorado 80401, hereinafter referred to as "Aggregate Industries".

RECITALS

WHEREAS, the Company manages and operates the Whitney Ditch (hereinafter "Ditch") and operates a wasteway and augmentation structure "Structure" located within the SE Quarter, Section 30, Township 6 North, Range 66 West of the 6th P.M., Weld County, Colorado; and,

WHEREAS, Aggregate Industries desires to divert water they own through the Ditch, being 13.5 Whitney shares, to be carried by the Company and released through the Structure in order to return water yielded by the shares to the Poudre River for the 2021 irrigation season; and

WHEREAS, there is on occasion capacity in the Structure to permit the Company to deliver the water described above as desired by Aggregate Industries;

NOW THEREFORE, in consideration of the premises and the mutual promises and covenants of the parties hereto, IT IS AGREED AS FOLLOWS:

1. The Company agrees to deliver water represented by Aggregate Industries ownership of 13.5 Whitney shares for release into the Structure described above pursuant to the terms and conditions of this Agreement. The Company may deliver and release the water, in its sole discretion, to the Structure as is consistent with its primary responsibility of delivery of irrigation water during the 2021 irrigation season. Aggregate Industries may request a monthly delivery schedule within said irrigation season, and the Company agrees to accommodate said request as they are reasonably able, so long as the delivery schedule is consistent with Company operations, as determined in the sole discretion of the Company.
2. The carriage and delivery of water will occur only at such times as the Ditch is operating in order to carry water rights to meet the requirements of the stockholders, and it is expressly understood by Aggregate Industries that the carriage right is subordinate to the rights and obligations of the Company to run water for its stockholders. Releases will be made only when the Company is operating the Ditch and may be interrupted in the event the Company determines it cannot run water in the Ditch for any reason. The releases may be simultaneous with the diversion or may be delayed as a result of temporary storage in the Company system. Releases shall equal the amount diverted at the Company headgate minus any losses resulting from ditch seepage or temporary storage ("Carriage Loss").
3. The carriage fee shall be \$ 200.00 per share and shall be paid to the Whitney Irrigation Company upon execution of this Agreement. Additional charges will be assessed as necessary for administration, operation, legal review, engineering review, and any other charges incurred by the Company related to this Agreement. Legal fees shall be limited to \$500.00 and are due and payable

upon execution of this Agreement. The Company does not anticipate engineering fees at this time. Administration and operation fees in an annual amount not to exceed \$300.00 shall be paid on or before October 15, 2021.

4. Company shall be responsible for the maintenance and operation of the Structure. Company shall provide to Aggregate Industries a letter confirming the delivery of shares to the Structure. Aggregate Industries is responsible for all measurement, accounting and reporting related to the amount of water delivered through the Structure to the State or Division Engineer and Company accepts no obligation or responsibility for said measurement or accounting. Aggregate is also responsible for coordinating deliveries with the ditch superintendent, within the delivery limitations described in this agreement, and coordinating and reporting deliveries to the District Water Commissioner as necessary.

5. The term of this agreement shall be from April 1, 2021 to October 15, 2021, to allow for the carriage and delivery of 13.5 shares of Whitney Irrigation Company water rights to the Structure. The term of this agreement is not necessarily representative of the irrigation season, or period of ditch operations, which vary in any given year.

6. Aggregate Industries does hereby indemnify and agrees to hold Company harmless of and from any claims or cause of action by third parties against Company due to the existence or execution of this Agreement or arising out of the diversion and carriage of Aggregate Industries water into the Ditch and subsequent delivery into the Structure.

7. No act by Aggregate Industries under this agreement shall be considered, or claimed by Aggregate Industries, to be adverse possession of the Ditch or other property of Company.

8. This document represents the complete agreement of the parties hereto and no oral modification shall be recognized. Any amendments or additions shall be made in writing signed by the parties.

9. Neither party may assign or transfer all or any part of this Agreement.

10. This Agreement is binding upon the parties, their successors and assigns.

IN WITNESS WHEREOF, The Whitney Irrigation Company has, by the authority of its Board of Directors, caused this Agreement to be executed by its President, and Aggregate Industries, has caused this Agreement to be executed.

DATED the date and year first written above.

RE: Mining Operations with Exposed Ground water

To Whom It May Concern:

The Division of Reclamation Mining and Safety is responsible for ensuring that Sand and Gravel mining operators comply with the requirements of the Colorado Land Reclamation Act for the Extraction of Construction Materials (Act) and the Mineral Rules and Regulations of the Colorado Mined Land Reclamation Board for the Extraction of Construction Materials (Rules). Among these requirements are provisions for the protection of water resources. The Act requires that reclamation plans must ensure minimization of disturbances to the prevailing hydrologic balance, including disturbances to the quantity of water in the area affected by mining and in the surrounding areas. § 34-32.5-116(4)(h). Rule 3.1.6(1)(a) requires compliance with Colorado water laws and regulations governing injury to existing water rights both during and after mining. Permits must specify how the permittee will comply with applicable Colorado water laws and regulations governing injury to existing water right rights. Rule 6.3.3(j); Rule 6.4.5(2)(c). After an extensive review, the Division determined that several operators may not have appropriate permit conditions to address certain reclamation liabilities arising from impacts to water resources.

In September 2009 the Division of Water Resources (DWR) updated its Guidelines for Sand and Gravel Pits. These guidelines provide guidance on achieving compliance with state law regarding replacement of depletions from sand and gravel mining, thus the guidelines provide a benchmark for the protection of hydrologic balance required under the Act and Rules. As noted in the Guidelines, sand and gravel operations which expose groundwater without complying with state law create a reclamation liability by impacting available groundwater.

State law requires that any person exposing ground water must obtain a well permit from the SEO pursuant to § 37-90-137(11). Because exposed groundwater results in out-of-priority water depletions, operations which expose ground water must also eventually obtain a water-court approved augmentation plan. Currently, several operators do not have either an augmentation plan or bonding to provide an alternative method to mitigate injurious stream depletions that result from mining-related exposure of ground water. The Division has a statutory duty to ensure that lands affected by mining are reclaimed in a manner that complies with state law and to ensure that operators have sufficient bonding to achieve reclamation. In order to assist operators in achieving compliance with these requirements, the Division proposes that, by April 30, 2011, operators should contact the Division and agree upon a plan for achieving compliance.

The Division has identified four approaches for operators:

1. File a financial warranty that will ensure backfilling of the pit to cover the exposed ground water to a depth of two feet above the static ground water level or,
2. Obtain a court approved augmentation plan prior to exposing ground water or,
3. File a financial warranty to cover the cost of installing a clay liner or slurry wall that meets the Division of Water Resources requirements for preventing ground water exposure or,
4. Obtain approval from the Division of Water Resources that acknowledges compliance with the SEO's requirements pursuant to § 37-90-137(11).

The Division will work with operators on an individual basis as they move to implement one of these plans. It is likely that options 1 and 3 will require the submittal of a technical revision or an amendment to the existing permit depending on the nature of the current mining and reclamation plan and the proposed changes. Increased financial warranties, as a result of these modifications, may be posted in a phased manner not to exceed three years. Amendments or revisions currently under review will be required to be approved by April 30, 2011 and may use the phased financial warranty approach described above. New applications going forward or presently under review by the Division will be required to meet the requirements of one of the options 1-4 at the time of application approval. Failure of affected operators to initiate contact with the Division and gain compliance as described above could result in an enforcement action being issued by the Division.

If you have any questions, please contact Tony Waldron at 303-866-3567, extension 8150.

ADMINISTRATION PROTOCOL
Dry-Up of Irrigated Land
Division One – South Platte River

As required by either a decreed change of water rights or a substitute water supply plan, a source of irrigation water may be either permanently or temporarily removed from a parcel of land in order to make the historical consumptive use portion of that water supply available for other uses, typically augmentation. This protocol addresses the documentation required to administer the effective “dry-up”. To the extent that one or more of the following directives are in direct contradiction with a decree of the court, the terms of the decree must be followed.

Permanent Dry-up Covenant

1. Must be decreed by the court.
2. Must be filed with clerk and recorder’s office for the county wherein the land is located.
3. Must email a GIS shapefile to Div1Accounting@state.co.us that includes case number, WDID, and total acreage permanently dried-up, along with any accompanying metadata. The shapefile must be in NAD83 datum, UTM projection, Zone 13North.
4. Must address the issue of noxious weeds as required by §37-92-305(4.5)(a), C.R.S. and/or other county or local ordinances. (DWR is not authorized to administer the issue of noxious weeds; this statement is, therefore, simply informational).

Temporary Dry-up Agreement

1. May be made for a term that is not less than one irrigation season.
2. Unless otherwise stated in the approved SWSP, a written notification, reporting land of intended dry-up, must be submitted prior to April 1 of each irrigation season to the division engineer, water commissioner and Div1Accounting@state.co.us. Along with the written notification, a GIS shapefile reflecting the land of intended dry-up must be submitted. The shapefile must be emailed to Div1Accounting@state.co.us. The shapefile shall include case number, WDID, and acreage of dry-up, along with any accompanying metadata. The shapefile must be in NAD83 datum, UTM projection, Zone 13North.
3. Unless otherwise stated in the approved SWSP, a written affidavit, affirming land actually dried up, must be submitted prior to October 31 of each irrigation season to the division engineer, water commissioner and Div1Accounting@state.co.us. Along with the written affidavit, a GIS shapefile, reflecting the dried up acreage proclaimed in the affidavit, must be submitted. If the submitted affidavit indicates that the intended and actual dry-up acreages are identical, then no GIS shapefile is required. The shapefile must be emailed to Div1Accounting@state.co.us. The shapefile shall include case number, WDID, and acreage of dry-up, along with any accompanying metadata. The shapefile must be in NAD83 datum, UTM projection, Zone 13North.
4. Once written notice has been made to the division engineer and/or water commissioner, the dry-up requirement is irrevocable during the current irrigation season regardless of whether or not the water associated with the historical consumptive use is actually used.

ADMINISTRATION PROTOCOL Augmentation Plan Accounting Division One - South Platte River Revised October, 2021

This protocol establishes the accounting and reporting process required to enable the division engineer's office to determine if depletions from all out-of-priority diversions are being replaced so as to prevent injury to vested water rights. The accounting must follow "cradle to grave" accounting practices that track exactly how the data are manipulated from raw data input (e.g., meter readings) to the resultant impact on the river. While this protocol is subordinate to any decreed language addressing specific accounting requirements, it generally addresses the minimum requirements of such accounting.

The accounting must use the standard convention where a depletion is shown as a negative value and an accretion or other replacement source is shown as a positive value. The difference of depletions and replacements will then result in either a negative or positive impact on the stream.

1. Accounting must be submitted electronically to the division engineer and water commissioner through the online data submittal portal at the following link on our website: <https://dwr.state.co.us/Tools/reporting>. If not already registered, you will need to create a new account through that link.

Typically, submittals are due within 30 days of the end of the month for which the accounting is being submitted, unless decreed otherwise. Additional data or more frequent submittals may be required by the water commissioner if required for administration. Accounting submittals not submitted through the online data submittal portal or questions regarding accounting submittals may be emailed to dnr_Div1Accounting@state.co.us.

The following naming convention must be used for all files submitted via email:
"PlanWDID_YYMMDD"

where: PlanWDID is the WDID assigned by the division engineer's office

YYMMDD corresponds to the date the accounting is submitted.

As an example, the assigned WDID for the former GASP plan was 0103333. If accounting using Excel® was submitted for that plan on May 15, 2004, the file name would be:
"0103333_040515.xls"

2. The accounting must include a Contact & Plan Information tab, that includes the 7-digit WDID for the plan for augmentation/SWSP, the 4-digit SWSP ID (if applicable), and contact information (i.e., name, phone number, email address) for the augmentation plan accounting including:
 - a. the owner(s) of each augmented structure
 - b. the person responsible for submitting the accounting
 - c. the plan administrator and/or the plan attorney.

3. All of the raw input data (i.e., meter readings, water pumped from wells, etc.) must be provided and organized in a single location, such as an “Input” worksheet, etc. The accounting must include the following input data listed below, as well as relevant WDIDs and permit numbers.
 - a. Diversion data from flumes or weirs and unit of measurement.
 - b. The required input data for each well is:
 - i. the monthly flow meter reading as shown on the flow meter; date of the meter reading; flow meter multiplier (i.e., 0.001, 10, 1); units of volume (i.e., gallons or acre-feet); the meter serial number; correction factor, if any.
 - ii. The total volume pumped, showing the calculations using the information in Item “i” above.
 - iii. factors from the decree or SWSP that provide for the well consumptive use and depletions (i.e., presumptive depletion factor (PDF), water balance methodology, lagging parameters, etc.).
 - iv. Any well permitted or decreed as an alternate point of diversion (APOD) to a surface water right must report pumping on a daily basis if any of the diversions during the month is claimed as being “in priority”. (See Administration Protocol - APOD Wells for more details.)
 - c. If applicable, data for each recharge structure must be included and comply with the appropriate decree(s) or SWSP Approval requirements and any applicable current statewide Administration Protocol. At a minimum the following should be reported in the accounting:
 - i. 7-digit WDID and name of recharge structure
 - ii. daily volume in AF diverted into the site;
 - iii. monthly volume in AF released from the site;
 - iv. monthly gross evaporative loss in AF;
 - v. volume of water in AF remaining at the end of the month.
 - d. The accounting must identify each source of replacement water actually delivered to the stream and how replacement water at that location offset the depletions. To demonstrate the water was actually delivered to the required location will require the following information:
 - i. the name (water court case, lease, etc.) and WDID of the originating source of the replacement water, date released and volume of water released;
 - ii. transit losses from point of release to point of depletion or use, if any, using stream loss factors approved by the water commissioner;
 - iii. the volume of water actually delivered on a daily basis past any surface water diversion that was sweeping the river as corroborated by the water commissioner. (See Administration Protocol - Delivery of Water for more details on delivering water).

For each source of replacement water that has been “changed” for use as a source of augmentation, such as changed reservoir shares, changed rights from a ditch, or credits from dry-up, etc., the following input information must be reported:

- i. the decreed volume of return flow obligation;
 - ii. if not specified in the decree or SWSP, the location and timing of the owed return flow on the stream(s).
4. If required by the decree or SWSP, the accounting must include a monthly projection of the plan’s operation at least through March 31 of the next calendar year, or as specified in the decree or SWSP.
5. The accounting submittal must include output associated with modeling showing monthly delayed depletions (from well pumping or return flow obligations) and/or accretions (from recharge).

6. All accounting must provide a net impact summary that shows a daily balance of the out-of-priority depletions, accretions from each recharge site, volume of replacement water actually delivered and the resultant net impact. If necessary, a net impact must be shown for each applicable river and reach.

While modeling may use a monthly step function to determine the depletions from pumping and accretions from recharge, the monthly result must then be divided by the number of days in the month in order to simulate a daily impact, as water rights are administered on a daily and not monthly basis.

The accounting should indicate that the replacement water is equal to the depletion(s) such that the daily net impact (using the simulated daily numbers from the modeling) is not negative, unless the water commissioner approves less frequent aggregation of replacements without injury to downstream water rights.

In the instance that aggregation is allowed, replacement is needed only for days with out-of-priority depletions. For example, if a well is out-of-priority for 15 days during a month, replacement must be made only for the 15 days the well is out-of-priority. Likewise, any simulated daily accretions will only count toward replacing the depletion on the days the well is out-of-priority. The accretions that accrue to the river when the well is in priority cannot be applied to different days with out-of-priority depletions.

7. The basis for determining that the depletions are out-of-priority should be data from the Division of Water Resources' Administrative Calls & Analysis Tool (<https://dwr.state.co.us/Tools/AdministrativeCalls/Active>) and should be included in the accounting along with the relative steps in the determination of a structure being in or out of priority. The analysis may be done, unless otherwise limited by decree, for each well or groups of wells, provided the most junior water right associated with the group of wells is used as the reference water right for the group's out-of-priority status.
8. The accounting shall include all the required information for the month of the submittal in addition to the information submitted from previous months such that the information and monthly submittals are a cumulative report each month throughout the 12 month reporting period.
9. If a well is covered in multiple SWSPs or augmentation plans, the monthly meter readings must be the same in the accounting for each plan covering the subject well. The accounting for every plan covering the well shall state the proportionate and total pumping amount covered by each plan to assure all out-of-priority depletions are replaced.
10. The following additional accounting requirements apply when sources of replacement water are used in more than one plan.
 - a. The entity providing replacement water to the stream is responsible for accounting for the total amount of replacement water and how much of the total went to each plan.
 - b. The amount of replacement water claimed for a particular augmentation plan must match the amount in the accounting from the entity providing the replacement water to the stream.
 - c. The amount of replacement water claimed for use by one or more water users shall not exceed the amount of replacement water physically and legally available. (See Administration Protocol - Use Of Unnamed Sources For Replacement for additional requirements concerning required notice and approval of sources of replacement not specifically described in a SWSP or augmentation plan).

ADMINISTRATION PROTOCOL
Use Of Replacement Sources Not Specifically Identified
In An SWSP Or Augmentation Plan
Division One – South Platte River

This protocol addresses the minimum standards required for use of a source of replacement water not specifically described in an SWSP or augmentation plan.

- Request to the Division Engineer and Water Commissioner must be in writing and must include:
 - the augmentation plan or SWSP provision in the purchasers plan that allows an unnamed source to be added to the plan for credit
 - the decree provision or SWSP provision in the sellers plan that allows water to be sold for use in the purchasers plan
 - the annual and monthly amount of water available from the water right to be used for replacement
 - the location at which the water will be delivered to the stream
 - a lease agreement between the seller and purchaser of the replacement water
- Applicant shall have written approval from the Division Engineer or Water Commissioner before an unnamed source is added to an augmentation plan or SWSP.
- Applicant must comply with the Augmentation Plan Accounting Protocol and, if appropriate, the Delivery of Water Protocol.

This protocol is subordinate to any decreed language addressing specific situations.
