

Green Line "1" is 100-foot setback from River Ordinary High Water Mark

2021-2022 Changes shown in color

Area En is 3.9 acres used for materials stockpile and plant site, originally planned for reclamation in 2021 but now delayed due to need to use for plant and to mine out. Area Es is 4.6 acres affected but still at original grade, used as plant site and to relocate stockpiles from En.

Plant Sites:
 P1 - crushing and screening plant
 P2 - washing plant relocated
 Total highwalls moved but total length unchanged from 2021 to 2022.
 H1 and H2 regraded to planned final slope H3 now being mined, expanding pond F1.

Areas A, B, & C Not effected land under permit. (Well pad pipeline and preexisting roads)
 Areas D - soil stockpiles (2.5 Ac)
 Areas E - Current work and traffic areas (13.5 Ac)
 En - old stockpile area: wash plant & 2023 mining (3.9 Ac)
 Ec - old wash plant now being mined around pond (4.2 Ac)
 Es - old wash pond/excavation (0.8 Ac)
 F - plant and stockpile area (2021-2023) (4.6 Ac)
 Areas F - Ponds (open water) (9.0 Ac) (considered reclaimed)
 Areas G - undisturbed islands (no reclamation needed)
 Areas H - areas at final grade/slope (2.7 Ac)
 H1 - west bank of pond F2 (1.8 Ac)
 H2 - east bank of pond F2 (0.9 Ac)
