Re: Bennett's Gravel Pit, Permit M-1979-166, Receipt of Corrective Action Documentation

Dear Mr. Mueller:

The Division received your responses to two Compliance Problems cited in the Division's report from the inspection that was conducted on August 17, 2021. The status of the corrective action in regard to the cited problem is as follows:

Compliance Problem, Revegetation: State-listed noxious weeds on site.

This problem is considered to be resolved as a result of photographs showing that weeds have been controlled at the site.

Compliance Problem, Topsoil: Topsoil piles do not have vegetation on them and are susceptible to erosion.

This problem is considered to be resolved as a result of documentation of the purchase of seed and photographs showing measures to protect topsoil piles.

If you have any questions, please contact me at Rob.Zuber@state.co.us or by calling (720) 601-2276.

Thank you,

Robert D. Zuber, P.E.
Environmental Protection Specialist
