Subject: M-2022-018 Request for Extension on Decision Date

Dear Mr. West:

As discussed, we are requesting an extension to the decision date for the South Hinsdale Gravel Pit for as much as 30 days, to 8 July 2022. It is our intent and hope to provide all of the information which you requested and is due today much sooner, but to avoid needless additional correspondence we are asking for a full 30 days.

As currently owed to the Division is:

- a. Responses to the 12 items of the adequacy review (including changes as suggested by the USFS on access, and dependent on research being done by the USFS starting on 2 June 2022 following our meeting regarding road status and access).
- b. Responses to the 16 objections, which apparently totals about 100 separate issues (though with overlap duplication) received by the Division by 30 May 2022.
- c. Responses to the CPW and History Colorado reviews.

With your concurrence, we will submit all of these (including any which may be non-jurisdictional for the Division) in a single report, to reduce the work on duplicate and overlapping issues. We will file and provide copies of this response to the County Clerk and to the County Commissioners through the County Administrator. We have been notified that we are prohibited from direct contact with the County Commissioners, Planning Commission members, and Road Department.

We have received no further information from Hinsdale County since the initial application and fee were received. We were told by the County Administrator that the County Attorney is reviewing the application and the County would contact us when this is done. We are unsure as to why this is being done, but are hopeful that this extension will also help.

Thank you for your rapid response to the comments and other matters. If you need any additional information from WASTELINE, please let us know.

Sincerely,

Nathan A. Barton, CE, PE, DEE Environmental and Permitting Compliance Engineer
