I am writing regarding the mining proposal at Weld CR 396 and 54th St Rd. If this area is developed as planned it will disrupt the entire neighborhood. The noise and dust factors are just a few of the problems that will occur. Just as important is the amount of wildlife in that area. Nesting bald eagles will be greatly affected if this happens. There are many deer, fox and coyotes in that area.

Please reconsider mining in this area. I understand the monetary aspect but please consider the impact this will have on people and wildlife.

Thank you,

Cindy Hardenburger
