

## COLORADO DIVISION OF RECLAMATION, MINING AND SAFETY

1313 Sherman Street, Room 215, Denver, Colorado 80203 ph(303) 866-3567

### REQUEST FOR TECHNICAL REVISION (TR) COVER SHEET

File No.: M- 2001-069 Site Name: DEL NORTE WEST VALLEY PIT

County RIO GRANDE TR# \_\_\_\_\_ (DRMS Use only)

Permittee: ASPHALT CONSTRUCTORS, INC.

Operator (If Other than Permittee): \_\_\_\_\_

Permittee Representative: TODD STOCKEBRAND

Please provide a brief description of the proposed revision: \_\_\_\_\_

Currently mining in Phase IV, requesting bond extension and approval to open up Phase V

for extraction and stockpiling & Phase VI to continue stockpiling aggregates.

As defined by the Minerals Rules, a Technical Revision (TR) is: "a change in the permit or application which does not have more than a minor effect upon the approved or proposed Reclamation or Environmental Protection Plan." The Division is charged with determining if the revision as submitted meets this definition. If the Division determines that the proposed revision is beyond the scope of a TR, the Division may require the submittal of a permit amendment to make the required or desired changes to the permit.

The request for a TR is not considered "filed for review" until the appropriate fee is received by the Division (as listed below by permit type). Please submit the appropriate fee with your request to expedite the review process. After the TR is submitted with the appropriate fee, the Division will determine if it is approvable within 30 days. If the Division requires additional information to approve a TR, you will be notified of specific deficiencies that will need to be addressed. If at the end of the 30 day review period there are still outstanding deficiencies, the Division must deny the TR unless the permittee requests additional time, in writing, to provide the required information.

There is no pre-defined format for the submittal of a TR; however, it is up to the permittee to provide sufficient information to the Division to approve the TR request, including updated mining and reclamation plan maps that accurately depict the changes proposed in the requested TR.

Required Fees for Technical Revision by Permit Type - Please mark the correct fee and submit it with your request for a Technical Revision.

<u>Permit Type</u>	<u>Required TR Fee</u>	<u>Submitted</u> (mark only one)
110c, 111, 112 construction materials, and 112 quarries	\$216	<input checked="" type="checkbox"/>
112 hard rock (not DMO)	\$175	<input type="checkbox"/>
110d, 112d(1, 2 or 3)	\$1006	<input type="checkbox"/>

RE: M-2001-069  
Del Norte West Valley Pit  
Technical Revision dated 6-15-2022

Dear Clayton:

Please accept this letter and documentation as our request for a Technical Revision for the Subject mining permit.

We are requesting to open up Phase V for extraction and material stockpiling purposes. Phase VI has been historically used for stockpiling dating back prior to the Amendment Approval, Revision No AM-1 approved on April 9, 2010.

Mining is currently progressing from south to north in Phase IV. Topsoil has been stripped and stockpiled along the northern edge of Phase V, and aggregates are currently stockpiled on Phase V. The majority of the aggregates in stockpile on Phase V should be removed by the end of September, 2022. We are agreeable to furnishing the financial warranty required to begin mining into Phase V before reclaiming Phases III and IV. These revisions do not affect the final reclamation, we are simply advancing the sequence into the next Phase.

Attached are the following:

- Exhibit C.3 - up to date illustrating the current disturbance areas
- Exhibit D #2 Mining Plan with minor revisions Item (D) total mined area
- Exhibit L – Reclamation Costs estimated for Phases IV, V, VI, and VII

All other Exhibits are unchanged.

If you need any additional information, please let me know ASAP.

Sincerely,

Asphalt Constructors, Inc.
