**Re: Mountain Coal Company, LLC, West Elk Mine; Permit No. C-1980-007;  
Minor Revision No. MR-467- Additional Concrete Piers for C-1 Conveyor  
Structure.**

Dear Mr. Simmons:

Mountain Coal Company, LLC (MCC) submits this letter, application and drawings for Minor Revision No. 467 to add concrete piers for the C-1 Conveyor to readjust the conveyor belt structure. The current piers are no longer able to support the structure due to movement of the hillside.

There will be 4 new piers and will be approximately 30 inches in diameter. Two of the piers will be approximately 34.6 feet long and the other two will be approximately 42.6 feet long. The piers will take approximately 112 cubic yards of concrete and attach to the Conveyor structure via anchor bolts. See attached drawing for location of new piers. MCC will not be removing the current piers at this time.

Please contact me with any questions regarding this submittal.

Sincerely,

A handwritten signature in cursive script that reads "Nicki Poulos".
