**Re: Benton Dawson Gravel Pit, Permit M-1983-209,
Corrective Action Extension (Reclamation Plan update)**

Dear Mr. Gilmore:

During my inspection in October 2021, I identified several problems that require corrective actions. Regarding the need for an update of the reclamation plan with a Technical Revision (TR), the Division is extending the decision due date to July 29, 2022.

If you have any questions with the TR process or anything else, please contact me at Rob.Zuber@state.co.us or by calling (720) 601-2276.

Thank you,

Robert D. Zuber, P.E.
Environmental Protection Specialist
