Reclamation Material Balance (2021-2022)

Alpine Aggregates' Steamboat Sand and Gravel Pit has made a cut of approximately 937,314.29 yards over a surface area of 17.5 acres. A total of 226,761.00 yards of material would be required to restore the current cut to the contours of the approved reclamation plan. The Steamboat Sand and Gravel Pit has 322,375.83 yards of fill stockpiled and 127,773.15 yards of reserve material remaining in the pit's floor which can be utilized as reclamation materials, if necessary. Thus, we have an excess of 305,730.64 yards of available material on site for reclamation. Therefore, there is an adequate volume of material on site to complete reclamation at the current stage of mining.

Sincerely,
ALPINE AGGREGATES, LLC
