**RE: McClane Canyon Mine, C-1980-004**  
**1<sup>st</sup> Quarter 2022 Discharge Monitoring Reports Review (CO-0038342)**

Dear Mr. Stover,

The Colorado Division of Reclamation, Mining and Safety (the Division) has finished reviewing the 2022 1<sup>st</sup> Quarter Discharge Monitoring Reports for the McClane Canyon Mine. The reports were received electronically on February 1, 2022 (January report), March 7, 2022 (February report) and April 6, 2022 (March and quarterly reports). The reports cover the time period of January 1, 2022 through March 31, 2022. The Division finds the reports to be in compliance with Rule 4.05.13(2).

There are three outfalls associated with the CO-0038342 DMR permit, Outfall 001, Outfall 002 and Outfall 004. During the months of January, February and March, there was no discharge recorded from outfalls 001, 002 and 004. Therefore, no exceedances occurred.

This concludes the Division's review of the 1<sup>st</sup> Quarter 2022 Discharge Monitoring Reports for the McClane Canyon Mine. If you have any questions or concerns, feel free to contact me.

Sincerely,

Clayton Wein  
Environmental Protection Specialist
