Patrick ,
Here is the response to the email you sent yesterday. Thank you
Levi

Stoddard Pit M2022-028
Response to Adequacy Review
7/20/22

1. It is the Division's understanding that the applicant will not apply for a stormwater detention permit but will allow any stormwater to infiltrate into the ground and if there is ponding for longer than 72 hours then the applicant will eliminate the ponding areas. Please confirm this is the case or provide an alternate narrative.

This is correct. We will not apply for a stormwater detention permit. We will allow any stormwater to infiltrate the ground, and any areas that pond longer than 72 hours will be eliminated.

2. It is the Division's understanding that the applicant will not be leaving an exposed shale floor and is planning on spreading overburden over the floor and seeding it with the NRCS recommended seeding mixture. Please confirm this is the case or provide an alternate narrative.

This is correct. We will not be leaving the shale floor exposed, we will cover the shale floor with overburden and reseed using the recommendation received from the NRCS office.

3. The Division has attached to this review its Reclamation Cost Estimate for the site. Please review the estimate and provide any comments, as this amount will be the required financial warranty amount for the site.

We have reviewed the reclamation cost estimate amount of \$17,315 and agree that this is an adequate amount, and agree to that amount being needed in the form of financial warranty.

Other:

4. Pursuant to Rule 1.6.2(2), please demonstrate that the Applicant's response to these adequacy issues have been placed with the application materials previously placed with the County Clerk or Records Office, and made available for public review

Please find the attached letter showing these changes have been recieved and placed with our application on file at the Otero County Clerks office on 7/20/22.

Exhibit I
Proof of filing with Otero County Clerk and Recorder

Otero County Clerk and Recorder
13 West 3rd Street
La Junta, CO 81050

We are delivering to you correction pages to be added to the application packet for the Stoddard Pit, a Limited Impact (110c) construction materials permit, to be operated by Stoddard Construction LLC. A copy of the application is on file with the Division of Reclamation, Mining and Safety.

This copy is delivered to you pursuant to 34-32.5-112 (9) (a), Colorado Revised Statutes 1995, as amended, which states in part:

....the applicant shall file a copy of such application for public inspection at the office of the County Clerk and Recorder of the county in which the affected land is located.

Please acknowledge receipt of this copy of the permit application by signing in the space provided below and returning one copy back to us. Please hold this on file for pick up after the application has been approved by the DRMS. (approx. 180 days)

Respectfully,
John Stoddard
Stoddard Construction LLC
