**RE: Permit No. M-2009-035, 32.5 Road Gravel Pit, Inspection Problem-Corrective Action Extension
Request Approval #2**

Dear Mr. Azcarraga:

On November 10, 2021 the Colorado Division of Reclamation Mining and Safety (Division) inspected the above mentioned pit. Hydrologic Balance was cited as an inspection problem. Corrective actions included demonstrating that the site has sufficient water rights to conduct the current operation and complete reclamation as approved. This information was originally due on February 28, 2022 and has since been extended. On July 25, 2022 the Division received a status update letter and extension request to allow the Operator to continue to work with the landowner and a water rights engineer to resolve this issue.

Your extension request is approved. A progress update is due no later than September 1, 2022. And final resolution of the problem and required corrective action documentation is due by **November 1, 2022**.

If you require additional information, or have questions or concerns, please feel free to contact me.

Sincerely,

Amy Yeldell
Environmental Protection Specialist
