

Taft Expansion 2022 Supplemental Information

3. Answered No this year because area around the conveyor and south side of the lake cannot be reclaimed until mining is completed on north side of M-1977-439.
4. Mining was completed for the site 5/2/2017. Reclamation is on-going except for 2.0 acres along the south boundary which is being used to run conveyor to and from M-1977-439.
5. Mine (conveyor) operates in conjunction with M-1977-439.
17. This permit is no longer covered under a Martin Marietta Substitute Water Supply Plan. The property has been sold to Bill Seaworth and he has taken it through water court (2016CW3093) and is responsible for releasing and reporting to the State Engineer's Office. Copy of decree was attached to the 2019 annual report.
21. Mining is complete, dewatering pumps have been removed, water has been allowed to fill back in, and annual groundwater monitoring has ceased.
