Re: Benton Dawson Gravel, Permit M-1983-209, TR-03 Preliminary Adequacy Review

Mr. Gilmore:

The Division has reviewed your Technical Revision No. 3 (TR-03) application. Please address the following adequacy items.

1. Regarding the page in your submittal entitled New Water Drainage Plan, it is unclear where this fits into the exhibits of your permit. Should it be added to the Mining Plan or another exhibit of the permit? Please add this information to the page. Also, this appears to be a map and should include a scale per Rule 6.2.1(2)(e).
2. On that same page, please elaborate on the purpose of the proposed small ditch. Will this flow to the northwest and cause runoff to flow toward the center of the west area? Is it expected that this water will then infiltrate into the porous soil?

If you want to discuss these items, or if you have any additional questions, please do not hesitate to contact me at Rob.Zuber@state.co.us or by calling (720) 601-2276.

Thank you,

Robert D. Zuber, P.E.
Environmental Protection Specialist
