August 3, 2022

To: Whom It May Concern,

The Colorado Water Protective and Development Association, (dba: Arkansas Groundwater and Reservoir Association), grants Continental Materials Corporation (CMC) the right-of-access to the Barnhart Pit, permit area (Permit No. M1984-008) for site reclamation only. This right-of-access shall expire upon the date of reclamation liability release from the Colorado Mined Land Reclamation Board, or this right-of-access shall expire no later than August 3, 2027, whichever date occurs first. However, the Arkansas Ground Water Reservoir Association (AGRA) may execute a new right-of-entry document as they see fit.

This right of entry shall not travel with the transfer of the existing Mined Land Reclamation Board permit known as the Barnhart Pit, Permit No. M1984-008, held by CMC.

Best Regards,
