TVPH (GRO) and TEPH (DRO) are Pace Analytical Laboratory reportable detection limits (RDL's), Numerical values are non-regulatory agency thresholds or associated with clean-up standards Colorado Code of Regulations (CCR) Water Quality Control Commission (Reg. 41) thresholds are per 2020 revision

[c] indicates adult in process by the lab

- Indicates analytical that was not analyzed during the date of sampling event

All results are presented in mg/L, unless otherwise noted

Exceedances to laboratory reporting limits are highlighted in yellow. Results below the standard or reporting limit are reported as NI

Exceedances to regulatory thresholds are highlighted in yellow. and outlined in red

Recently sampled analytical results are highlighted in blue for easier reference
