Let's see if this works.

Thanks Blake. Unfortunately, the only GPS point in the file is the entrance marker at the road .

You might try creating a new folder in Google Earth, dragging the point labels (in the data list on the left side of the Google Earth screen, not the actual points on the map) into the folder, then right click on the new folder and select "Save Place as ...". Then send me that file.

Tim,

I've attached a kmz file with two pins showing the GPS location for the SE and SW corners of the mining area. I will send the pictures in a separate email. Please let me know if you have any questions.

Thank you,

Blake
