Re: Buster Quarries, Permit M-1981-107, Corrective Actions Extension

Dear Mr. Buster:

During my inspection on February 15, 2022, I identified two problems that require corrective actions. Regarding both (the water rights issue with water in the pits and the update of the reclamation plan to address the waste rock area), the Division is extending the decision due date to November 14, 2022.

If you have any questions, please contact me at Rob.Zuber@state.co.us or by calling (720) 601-2276.

Thank you,

Robert D. Zuber, P.E.
