

List of Tables - Continued

10/21

<u>Table No.</u>		<u>Page</u>
2.7-14	Discharge and Selected Chemical Data, Williams Fork River Near Hamilton, Colorado 1975-1976, as Obtained from the U.S. Geological Survey	2-417
2.7-15	Chemical Analysis of Surface Water Samples Collected August 15 and 16, 1974, from Utah International Lease Area	2-422
2.7-16	Chemical Analysis of Surface Water Samples Collected October 27 and 28, 1974, from Utah International Lease Area	2-423
2.7-17	Chemical Analysis of Surface Water Samples Collected January 7 and 8, 1975 from Utah International Lease Area	2-424
2.7-18	Chemical Analysis of Surface Water Samples From Various Sources in the Trapper Mine Permit Area	2-425
2.7-18a	Chemical Analysis of Surface Water From Sites S-1 and S-3, 1984-1986	2-451b
2.7-18b	Water Quality Sampling Results for Jeffway Gulch	2-451v
2.7-18c	Water Quality Sampling Results for C, I and J Pits Area	2-451z
2.7-19	Drainage Densities of the Trapper Mine	2-453
2.7-20	Basic Well Data for the Trapper Mine Wells	2-456
2.7-21	Aquifer Test Summary for Upper Unit of the Williams Fork Formation	2-458
2.7-21b	Summary of Aquifer Properties, Trapper Mine Wells, 1986	2-462f
2.7-22	Chemical Analysis of Ground Water From Various Sources in the Trapper Mine Permit Area	2-464
2.7-22a	Premining Ground Water Quality, East Portion of the Trapper Mine Permit Area	2-520b
2.7-22aa	Ground Water Quality Data, Eastern Expansion Area	2-520aaa
2.7-22aaa	Ground Water Quality Data, I and J Pits Area	2-520hhh

List of Tables - continued

<u>Table No.</u>		<u>Page</u>
2.7-22b	Well Sites Within One Mile of Trapper Mine's Proposed Permit Boundary and Their Probable Association with the Third White Sandstone Aquifer, based on the Original Inventory	2-524b
2.7-22c	Well completion information on wells within one mile of Trapper Mine's proposed permit boundary, based on the original inventory	2-524e
2.7-23	Water balance for the Trapper Mine, Craig Colorado	2-526
2.7-24	Concentration of selected parameters in cuttings from drill holes in potential alluvial valley floors	2-537
2.7-25	Basic well data for the wells in potential AVF's	2-541
2.7-26	lithologic logs for Flume and Pyeatt Gulch potential AVF wells	2-542
2.7-27	Recovery data for Flume Well No. 1	2-547
2.7-28	Recovery data for Pyeatt Well No. 1	2-551
2.7-29	Drawdown data for Observation Pyeatt Well 2	2-553
2.7-30	Pumping and recovery data for Pyeatt Well 3	2-555
2.7-31	Pumping and recovery data for Pyeatt Well 4	2-558
2.7-32	Pumping and recovery data for Pyeatt Well 5	2-562
2.7-33	Bailing and recovery of Pyeatt Well 6	2-565
2.7-34	Bailing and recovery data for Pyeatt Well 8	2-567
2.7-35	Summary of aquifer properties for the AVF sites	2-569
2.7-36	Groundwater quality in alluvial areas	2-571
2.7-39	List of plant species encountered during 1985 sampling season, Flume Gulch AVF	2-576s
2.7-40	Percent herbaceous plant canopy cover by species for Flume Gulch AVF channel bottom and adjacent pasture and hayland (3-dimensional) 1985	2-576t
2.7-41	Herbaceous annual production (#/ac) for Flume Gulch AVF, channel bottom and adjacent pasture and hayland, 1985	2-576u
2.8-1	The list of aquatic macroinvertebrate taxa identified in samples collected by Utah International Inc at Trapper Mine sites and their most common aquatic habitats	2-579
3.1-1	Maximum annual production	3-10
