Hi Janet,

My name is Amber Fisher. I work for Dolores County in the Mapping Department.

We received 2021 imagery after the map was submitted with the paperwork on the Bartley Gravel Pit.

Please see the updated map with 2021 imagery. It does show that the piles are leveled out in the NW corner of the gravel pit.

I outlined the area that was reclaimed and seeded to grass in 2021. The grass stand didn't come up very good. There is some grass there but not a full stand. It was around 17 acres that was reclaimed and seeded.

The rest of the gravel pit has been reclaimed in previous years.

I will forward another email with pictures of the NW corner that was taken on Oct 20<sup>th</sup>.

If you have questions, please let me know.

Amber Fisher

Dolores County
