RE: Thompson Pit, File No. M-2022-046 , Receipt of Incomplete 112c Application Package

Mr. Laube:

On November 7, 2022, the Division of Reclamation, Mining and Safety (Division) received the above referenced application package. A preliminary review of the application determined that the following items must be received before the Division can consider the application complete for the purpose of filing and technical review can begin:

1. Pursuant to Rule 1.6.2 (1)(b) the applicant shall post notice of the application at the location of the proposed mine site prior to submitting the application. Your application contained a certification of posting notice, but the certification was not signed. Please submit proof to the Division that notice of the application has been posted at the site. You can submit either a signed copy of the certification or, alternatively, submit a photo of the notice posted at the site.

The application cannot be filed until all information listed above is received and found sufficient to begin our review. Please submit all necessary documents in order to address the above listed deficiencies within sixty days. If, at the end of the sixty day period, the application is still incomplete, the Division may deny the application and terminate the application file.

This letter shall not be construed to mean that there are no other technical deficiencies in your application. Once the application is filed the Division will review the application in order to determine whether it is adequate to meet the requirements of the Colorado Land Reclamation Act for the Extraction of Construction Materials (Act) and the associated Mineral Rules and Regulations of the Colorado Mined Land Reclamation Board for the Extraction of Construction Materials (Rules).

If you require additional information, or have questions or concerns, please contact me.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Dustin Czapla', is located below the 'Sincerely,' text.
