**Re: Durham Sand & Gravel Pit, Permit M-1978-056,
Corrective Actions from September 2022 Inspection**

Dear Mr. Varra:

During my inspection in September, I identified a problem that require corrective actions by Varra Companies: the need to control weeds within the permitted area. Based on the proper time to control weeds in Colorado, I am extending the decision due date for these actions to June 16, 2022.

If you have any questions, please contact me at rob.zuber@state.co.us or (720) 601-2276.

Thank you,

Robert D. Zuber, P.E.
