

## ANNUAL REPORT

Permit: M-2001-106

Operation Name: Orlando Pit

The portable crusher and associated equipment were moved to the site in September 2022. The equipment was staged within the northern boundary of the pit. Mining followed a western direction. A topsoil stockpile which was seeded is located in the northern portion of the permit boundary. To date no reclamation to the ground disturbance has been done. There will be one crushed gravel stockpile located in the northern pit boundary.

This mining set will complete about July 2023.
