**Re: Buster Quarries, Permit M-1981-107, Corrective Actions Extension**

Dear Mr. Buster:

During my inspection on February 15, 2022, I identified two problems that require corrective actions. The impounded water issue has been resolved.

Regarding the issue related to the waste rock area, the Division is extending the decision due date to January 13, 2023. I understand that your company has been making progress on moving the waste rock material, and you will soon submit a revision to the reclamation plan (a Technical Revision) to address the reclamation of this area.

If you have any questions, please contact me at [Rob.Zuber@state.co.us](mailto:Rob.Zuber@state.co.us) or by calling (720) 601-2276.

Thank you,

Robert D. Zuber, P.E.  
Environmental Protection Specialist
