**Re: Munroe Gypsum Quarry - File No. M-1977-002-HR
Colorado Lien Company
Technical Revision (TR-2)
Addition of Drill Holes**

Dear Michael Golliher:

On December 14, 2022 the Division of Reclamation, Mining and Safety concluded its review of the Technical Revision application submitted to the Division on December 12, 2022, addressing the following:

The operator is proposing to drill 39 holes to delineate overburden thickness and gypsum reserves within the current permit boundary.

The decision reached by the Division is: approve.

The terms of Technical Revision No. 2 approved by the Division are hereby incorporated into Permit No. M-1977-002-HR. All other conditions and requirements of Permit No. M-1977-002-HR remain in full force and effect.

The revised liability amount exceeds the financial warranty currently held (see below) by \$284.00. The Division will not issue a Surety Increase at this time due to the fact that the Revised Liability exceeds the Bond Held by less than 1%.

Bond Held:	\$35,300.00
Prior Liability:	\$34,800.00
Change in Liability:	\$784.00
Revised Liability:	\$35,584.00
Prior Permit Acreage:	240.00
Change in Permit Acreage:	0.00
Revised Permit Acreage:	240.00

Prior Affected Acreage:	70.70
Change in Affected Acreage:	0.00
Revised Affected Acreage:	70.70

The current bond held by the Division is adequate to cover the reclamation cost of the currently disturbed area and the drill holes approved in TR2. If any new disturbance is planned outside the currently disturbed area, additional bond will have to be posted.

If you have any questions, please contact me by telephone at (303) 866-3567 x 8142, or by email at Brock.bowles@state.co.us.

Sincerely,

Brock F. Bowles
Environmental Protection Specialist
