Ms. Gagnon,

Thank you for speaking with me earlier regarding the Hazeltine Mine Release Request Application. In response to that conversation, I am forwarding photos of piled vegetation materials left by the operator in the bottom of the pit. We would like to request that those materials be removed from the site. We also assume that upon release from the permit, the operator will remove the piping and pump including the generator and all related materials used for pumping water from the pit. I am attaching photos of the vegetation piles for reference.

Please let me know if clarification on this is needed, or if you have any further items to discuss regarding Hazeltine.

Regards,

Elena Acker
