RE: Technical Revision

Greetings,

As requested, attached please find an updated mine map which includes permit boundary, as well as areas fully reclaimed and released (AR-1) and the area that will remain industrial (un-reclaimed) following completion of mining (TR-3).

The total area of the mine is approximately 134 acres. Mine was permitted for 78.80 acres for mining activity. There are several large areas that were proposed to remain undisturbed. Two large areas exist in the northwest and northeast quadrants. The large, sloped area on the south side of the mine area was also to be undisturbed. These areas, along with boundary buffers equal approximately 40 acres. These areas remain undisturbed. Additionally, there is a significant area that is not yet disturbed, but mineable, on the central/southwestern area of the mine which accounts for approximately 15 acres. This area, along with the originally proposed undisturbed areas equal approximately 55 acres which has not been disturbed.

In 2018, we submitted a Technical Revision (TR-3) to allow for 11 acres to remain in an industrial use following the mine's completion, and therefore be released from our reclamation liability. This technical revision was granted and I have indicated the portion of the mine area that will remain in an industrial use on the attached, updated mine map. At the same time, we requested to have 26.11 acres released: 6.11 acres of which was in final reclamation, 20 acres which had been sloped, graded and seeded. The Division released the 6.11 acres at that time. This brought our total active mining/disturbed area to 61.6 acres.

The 20 acres is currently completely reclaimed and it is our intention to immediately submit an acreage release for this area of the mine, which was inspected on November 2, 2022.

On the attached map, you will find we have indicated the mine boundary, undisturbed areas, disturbed areas, areas that were released in final reclamation and the large area we wish to seek final reclamation on immediately.

Please let me know if you have any questions, or require anything further at this time. Thank you for your consideration and review of our updated mine map.

Thank you,

Katie L Conrado
