4th Quarter 2022 Discharge Monitoring Reports Review**

Dear Ms. Hammond,

The Colorado Division of Reclamation, Mining and Safety (the Division) has finished reviewing the 2022 4th Quarter Discharge Monitoring Reports (DMRs). The reports were received on; November 14, 2022 (October report), December 8, 2022 (November report) and January 10, 2023 (December and 4th quarter reports). The reports cover the time period of; October 1, 2022 through December 31, 2022. The Division finds the reports to be in compliance with Rule 4.05.13(2).

There are two outfalls associated with the CO-0027146 NPDES permit, Outfall 002 and Outfall 016. During the months of October, November and December no flow was recorded out of Outfall 002. No exceedances occurred at this location. Outfall 016 discharged during all three months of the 4th quarter. The reports indicate that no exceedances occurred for the reported parameters during the 4th quarter. No other concerns were identified during this time period.

This concludes the Division's review of the 4th Quarter 2022 Discharge Monitoring Reports for the Roadside Portals Mine. If you have any questions, feel free to contact me.

Sincerely,

Clayton Wein
