**RE: Loloff Mine - File No. M-1985-112,
Preliminary Adequacy Review of Technical Revision (TR-4),
Update of Reclamation Plan to Remove Requirement of Revegetation**

Mr. Hodge:

Your Technical Revision application for the Loloff Mine 112c Construction Materials Reclamation Permit, which is located in Weld County was filed with the Division on January 11, 2023. A decision date has been set for February 10, 2023. We do have the following adequacy items that must be addressed.

1. Exhibit E needs to be updated to describe the new reclamation plan.
2. On the Reclamation Plan Map (Exhibit F), please indicate the status and plan for the blank area in the northwest corner. Is this area undisturbed by mining activity? Or will this area be hard surface?
3. On Exhibit F, indicate what work is complete and what work will be completed in the future. This can be done using notes or a text box.
4. Regarding the notes on Exhibit F, please explain if the verb tense is accurate. For example, they state that soils "will be" placed and fill "will be" compacted. As appropriate, revise the text in the notes to state what has already been completed.
5. Exhibit L must be updated to show the remaining reclamation tasks. If all work has been completed, state that in the text. A task for maintenance of the site, including repair of rills on the slopes, should be included.

If you have any questions, please contact me by telephone at (720) 601-2276, or by email at Rob.zuber@state.co.us.

Sincerely,

Robert D. Zuber, P.E.
Environmental Protection Specialist
