Patrick,

I tried to call both your office line which is having difficulty accepting calls due to outages and your cell phone but was unable to reach you. Unfortunately We are having lab issues In regards to our Fourth Quarter 2022, Groundwater, Mine Effluent , Surface Water and Treatment Plant Effluent Quality Report compliant with the terms of Technical Revision #10 (TR-10).

Per Section 5.6 of the Approved TR-10, GIR will report sampling results Quarterly and will be issued to DRMS on August 1, 2022, November 1, 2022, February 1, 2023, May 1, 2023 and August 1, 2023.

Reports were submitted in a timely fashion in August and November of 2022. The next report is due February 1, 2023 per the above listed schedule.

Samples were collected in October, November and December; however, not all laboratory results have been received by GIR to date and therefore the report cannot be finalized. Due to this complication, we are requesting a one month extension on the February 1, 2023 date to provide you with a comprehensive report consistent with the two already provided. We expect a much quicker turnaround on this and will let you know when all data is received and when it will be released. Thank you for your understanding on this matter and I look forward to hearing back from you soon.

Respectfully,

**Daniel J. Takami**
