ECOS Environmental & Disaster Restoration Inc.  
6690 Highway 82  
Glenwood Springs, CO 81601

Client: ELAM Construction –

Location address: 67246 T Rd  
Montrose, CO, 81403

To whom it may concern,

On 11/30/2022 ECOS Environmental and Disaster Restoration Inc. was contacted by Jim Doody with Elam construction to assist and collect soil samples due to diesel release. Jim advised the release was approximately 350 gallons caused by a fuel tank that supplies diesel to a generator at the above listed address. The spill site was cleaned up and isolated by personal at the facility.

On 12/2/2022 ECOS Environmental performed the initial site visit to advise and collect samples of the spill site. ECOS Environmental met with Jim Doody, field manger and team. ECOS was advised of the area impacted by the release. The area was approximately 90x40 with an asphalt wrap covering the scraped area. The area was visually inspected and field samples were collected using a photoionization detector (PID). The field PID sampling and visual observations determined that the impacted area would need to be further scraped and reassessed. The pit crew was advised to remove additional soil.

On 12/6/2022 ECOS Environmental performed a site visit once the impacted area was excavated. ECOS Environmental conducted a visual inspection and field PID testing of the impacted area. The impacted area was determined to be at acceptable PID readings, this was determined by placing the soil into sealed plastic bag, heating to ambient temperature of 75 degrees Fahrenheit, then inserting the PID probe into the bag headspace. The samples were collected from random locations at the initial site where the spill occurred and throughout the area of migration. The confirmation samples collected were placed into jars and prepared in a cooler for shipping and analysis by a independent laboratory.

The laboratory results, diagram of sample locations and photos are attached to this document for review.

Re: 67246 T Rd

Work Order: 22120704

Dear Admin,

ALS Environmental received 3 samples on 07-Dec-2022 09:00 AM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental - Holland and for only the analyses requested.

Sample results are compliant with industry accepted practices and Quality Control results achieved laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 11.

If you have any questions regarding this report, please feel free to contact me:

ADDRESS: 3352 128th Avenue, Holland, MI, USA  
PHONE: +1 (616) 399-6070 FAX: +1 (616) 399-6185

Sincerely,

Electronically approved by: Chad Whelton

Chad Whelton  
Project Manager

Qualifier	Description
*	Value exceeds Regulatory Limit
**	Estimated Value
a	Analyte is non-accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
Hr	BOD/CBOD - Sample was reset outside Hold Time, value should be considered estimated.
J	Analyte is present at an estimated concentration between the MDL and Report Limit
n	Analyte accreditation is not offered
ND	Not Detected at the Reporting Limit
O	Sample amount is >= 4 times amount spiked
P	Dual Column results percent difference >= 40%
R	RPD above laboratory control limit
S	Spikes Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL
X	Analyte was detected in the Method Blank between the MDL and Reporting Limit, sample results may exhibit background or reagent contamination at the observed level.

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LOD	Limit of Detection (see MDL)
LOQ	Limit of Quantitation (see PQL)
MSLK	Method Blank
MDL	Method Detection Limit
MS	Matrix Spikes
MSD	Matrix Spikes Duplicate
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
TDL	Target Detection Limit
TNTC	Too Numerous To Count
A	APHA Standard Methods
D	ASTM
E	EPA
SW	SW-846 Update III

Units Reported	Description
% of sample	Percent of Sample
mg Kg-dry	Milligrams per Kilogram Dry Weight
