Subject: Water Issues

To: <DORA_Customercare@state.co.us>, <drms_info@state.co.us>

I currently live at [275 28th lane](#) in Pueblo and there have been substantial issues regarding wells, cisterns and lack of water for those of us living here. A couple of years ago Transit Mix of Pueblo along Highway 50 had informed my mom that their land dredging had altered the water table, rendering our well unable to pump water. They installed a cistern system and have been providing water hauling free of charge since then as a result of this, and an agreement that my mom the property owner signed with them. Since Transit Mix has traded hands to Castle Aggregate, Jerry Schnabel has become our point of contact with issues regarding the cistern system. He is ignorant, rude, and negligent towards our family and the farm I run here. Today we have been 7 days without running water, this is one of several times within the past couple of years this happened because he does not view the contract he inherited or our lack of running water to be of his concern. I'm sending this email in a desperate effort to explore any options there could be to permanently remedying the situation, and preferably not have to deal with Jerry any longer.

Thanks,
Tyler Chee
