Re: Oxbow Mining, LLC., Permit C-1981-022

2022 Annual Reclamation Report

Dear Mr. Simmons:

The following information is submitted as the 2022 Annual Reclamation Report for the Oxbow Mining, LLC, Sanborn Creek and Elk Creek Mines. The contents of this report are submitted to satisfy the requirements of CDMG Rule 2.04.13 Annual Reclamation Reports. Also included is an executed *CDRMS*, *Annual Reclamation Report for Calendar Year 2022* form.

Basically, all that remains to complete demolition, backfill and grading for the property are the dams that remain at the bottom of the refuse piles, (Pond C and Pond E), and the reclamation of the West Valley II lower access road. Phase 2 release of these areas was achieved in 2022 and this reclamation may be scheduled for 2023.

Surety Release 01 (SL-01) for the Elk Creek facilities area was completed during 2019. SL-01 included 19.4 acres of phase 1 bond release in areas known as the Middle and Lower Pads. A 1.3 acre area composed of a two foot barrier surrounding the reclaimed Elk Creek was not included in the release, but will be eligible for phase 3 release in 2028.

Elk Creek Surety Release 02 (SL-02) was submitted in September of 2019 and was completed in 2021. Elk Creek Surety Release 03 (SL-03) was submitted in August of 2020 and was completed in 2021. Elk Creek Surety Release 04 (SL-04) was submitted in January of 2021 and was subdivided into an additional Elk Creek Release 05 (SL-05) to increase inspection efficiencies. SL-04 was completed in 2021 and SL-05 was completed in February of 2022. Elk Creek Surety Release 06 (SL-06) was submitted in October 2021 and was completed in November 2022. Elk Creek Surety Release 07 (SL-07) was submitted in April of 2022 and is nearing completion now in 2023. SL-07 is not included in this annual report for 2022.

### Seed Purchases:

No seed was purchased during 2022. Minimal "supplemental" spreading of surplus USFS and BLM seed mixes were appropriately cast on reclaimed exploration roads in the "Coal Bank" area. Minimal "supplemental" spreading of surplus Oxbow seed mix was spread on Oxbow lands. The seed mixes used were purchased in 2018 and may have exceeded their shelf life.

### Weed Control

Scattered thistles, hounds tongue, white top and other noxious weeds were sprayed by Oxbow employees. *Curtail* and *Escort* herbicides were used in accordance with the labels. Areas sprayed included general disturbance areas such as road cuts, reclaimed areas, warehouse storage areas, pond out slopes, reclaimed borehole roads and borehole pad sites, etc.

### Rill and Gully Survey

The Lower Hubbard Creek site, the Bear Creek site, the reclaimed areas of the II West and West Valley fill coal refuse disposal area and East Yard coal refuse disposal area and the reclaimed degas wells sites, etc. were inspected for the formation of rills and gullies deeper than nine inches. No such gullies were encountered which would require follow-up repair and seeding.

### Reclamation Map

The Division has, within the PAP, a number of maps showing the location of the particular reclaimed areas. As in years past, rather than maps, this report contains an updated: EXHIBIT 1 – SUMMARY OF DISTURBANCE/ SEEDED AREAS, summarizing the OMLLC disturbance and reclaimed areas. It is implied that the areas noted as reclaimed include applicable backfilling, grading, topsoil spreading, and seeding activities.

#### EXHIBIT 1

Last years EXHIBIT 1 was updated to highlight areas that were reclaimed in 2012.

### **EXHIBIT 2**

EXHIBIT 2 is included in this report to show the calculation used to account for Light Use drill roads that were left on Hotchkiss Ranch property, at their request. The request was approved in MR108. The road lengths listed in the drill hole descriptions were multiplied by an estimated average width of 17 feet, which was converted to acres. The total acreage for roads left is 5.6 acres.

#### EXHIBIT 3

EXHIBIT 3 is a copy of the spreadsheet included to show sums used to complete the 2022 Annual Reclamation Report Form. An error of 0.62 acres that occurred in Surety Release 3 was discovered during the review of of Surety Release 7. EXHIBIT 3 reflects this correction which also is carried onto the attached ARR Form.

Please let me know what further corrections you would like to see and how you would like to proceed. Please contact me at 970-929-6034 with questions.

Sincerely,

Doug A. Smith Chief Engineer

### Colorado Division of Reclamation, Mining and Safety

Annual Reclamation Report for Calendar Year - 2022

ELK CREEK MINE C1981022 OXBOW MINING, LLC.

Mine Name Permit Number Permittee

P.O. BOX 535, SOMERSET CO 81434

#### Address

This report, required by Rule 2.04.13, is due by February 15 of each year, or other date, as agreed upon by the Division. It should include text, discussion, and maps, at a minimum, in addition to any other reclamation monitoring data as required by the approved permit. The location of the acreage reported under each land status category and year of seeding (if applicable) should be clearly identified on a map included with the report.
