**RE: Loloff Mine - File No. M-1985-112,
Second Adequacy Review of Technical Revision (TR-4),
Update of Reclamation Plan to Remove Requirement of Revegetation**

Mr. Hodge:

Your Technical Revision application for the Loloff Mine 112c Construction Materials Reclamation Permit was filed with the Division on January 11, 2023. Your response to our adequacy letter was received yesterday. I do have the following adequacy items that must be addressed (see #5).

1. Exhibit E needs to be updated to describe the new reclamation plan.
 - *No further response required.*
2. On the Reclamation Plan Map (Exhibit F), please indicate the status and plan for the blank area in the northwest corner. Is this area undisturbed by mining activity? Or will this area be hard surface?
 - *No further response required.*
3. On Exhibit F, indicate what work is complete and what work will be completed in the future. This can be done using notes or a text box.
 - *No further response required.*
4. Regarding the notes on Exhibit F, please explain if the verb tense is accurate. For example, they state that soils “will be” placed and fill “will be” compacted. As appropriate, revise the text in the notes to state what has already been completed.
 - *No further response required.*
5. Exhibit L must be updated to show the remaining reclamation tasks. If all work has been completed, state that in the text. A task for maintenance of the site, including repair of rills on the slopes, should be included.
 - **This adequacy item was not resolved. Please update Exhibit L to describe the current costs, even if there are none.**

If you have any questions, please contact me by telephone at (720) 601-2276, or by email at Rob.zuber@state.co.us.

Sincerely,

A handwritten signature in blue ink, appearing to read "Robert D. Zuber".
