**Re: Additional Information Required, 2022 Annual Groundwater Monitoring Report;
Knox Pit, Permit No. M-2017-036**

Dear Mr. Niccoli:

On February 6, 2023, the Division of Reclamation, Mining and Safety (Division/DRMS) received the 2022 Annual Groundwater Monitoring Report for the Knox Pit. After review of the submission the Division has additional items that need to be addressed or clarified.

1. Please provide a graph that depicts the depth to groundwater from the surface for all wells at the site to demonstrate the seasonal variability for each well over the past two years.
2. Please provide graphs of the analytes that exceed the water quality standard that depict concentration trends over the past two years.

Please respond to these issues within 30 days of the date on this letter. **The due date is March 24, 2023.** The Division reserves the right to further supplement this document with additional items and details as necessary.

If you need additional information or have any questions, please contact me by telephone at **303-866-3567 x8114**, or by email at patrick.lennberg@state.co.us.

Sincerely,

Patrick Lennberg
Environmental Protection Specialist
