Ms. Beth Haake
Senior Environmental Engineer
Martin Marietta
1910 Rand Ave
Colorado Springs, CO 80905

Subject: Third Quarter 2022 Surface Water and Groundwater Monitoring Results from Parkdale Quarry,
Fremont County, Colorado

Dear Ms. Haake:

This letter report provides monitoring results and a summary of activities from the Third Quarter 2022 (3Q 2022) monitoring of surface water and groundwater monitoring at the Martin Marietta (MM) Parkdale Quarry in Fremont County, Colorado. This report summarizes the monitoring activities performed and includes tabulated summaries of field measurements and water quality analyses, laboratory reports, and field data sheets. Monitoring and reporting were performed in accordance with Tetra Tech's *Surface Water and Groundwater Monitoring Proposal for Parkdale Quarry, Fremont County, Colorado* (September 2022) and Front Range Aggregates *Monitoring and Mitigation Plan for Surface and Groundwater Parkdale Quarry* (Monitoring and Mitigation Plan) (December 2021).

Surface water field parameters and analytical results are tabulated in Attachment A. Groundwater field parameters and analytical results are tabulated in Attachment B. Surface water field data and discharge measurements are provided in Attachment C. Groundwater Sampling Field Sheets are provided in Attachment D. Laboratory reports are provided in Attachment E.

Third Quarter 2022 surface water and groundwater monitoring was initially performed by Tetra Tech on September 28 and 29, 2022. In September 2022, samples were collected at two of the four stream locations (the other two were dry), and one of three planned groundwater monitoring wells (MW-3). Monitoring was not performed in September 2022 at monitoring well MW-1 due to lack of vehicle access. Sampling was attempted on September 29, 2022 at monitoring well MW-10 but failed due to high turbidity fouling pumping equipment. Subsequently, MM obtained approval from the Colorado Division of Reclamation, Mining and Safety (DRMS) to collect samples from wells MW-1 and MW-10 in October 2022 and include those results as a part of the 3Q 2022 monitoring. Sampling of MW-1 and MW-10 was performed by MM on October 19, 2022.

Surface water samples were collected at Current Creek monitoring locations CC-1 and CC-2 on September 29, 2022. Due to lack of vehicle access, the sample for CC-1 was collected approximately 1,000 feet downstream of the planned monitoring location. Tallahassee Creek monitoring locations TC-1 and TC-2 were both dry and no samples were collected at those sites.

TETRA TECH

Monitoring well MW-3 was sampled by Tetra Tech on September 28, 2022 using the three-volume purge method. Sampling of MW-1 and MW-10 on October 2022 was performed using the micro-purge method.

General chemistry and metal analyses were performed by SGS North America, Inc (SGS) in Wheat Ridge, Colorado. Radionuclide analyses were subcontracted by SGS to Energy Laboratories of Casper, Wyoming. Samples and applicable laboratory report are shown in Table 1. Analytical results were received from the laboratories, with final notification of the status of analytical results on January 30, 2023; at that time, the laboratory indicated there would be no results for uranium isotopes for MW-10 as the sample was lost.

Table 1.

| Sample Location | Report Numbers |
|------------------------|--|
| CC-1 | DA49619 |
| CC-2 | DA49619 |
| MW-1 | DA50245, DA50245X |
| MW-3 | DA49610, DA49624-MDL, DA49624X, DA49624R |
| MW-10 | DA50244, DA50244X |

Field (FB) and equipment blank (EB) samples were collected by Tetra Tech during September 2022 sampling. Analytical results for FB and EB are provided in laboratory reports DA49610, DA49624-MDL, DA49624X, and DA49624R.

Field parameter and analytical results were compared to applicable water quality standards; three groundwater quality standards were exceeded on 3Q 2022 as shown in Table 2. No water quality standard was exceeded in the surface water samples from 3Q 2022.

Table 2.

| Parameter | Standard (mg/L) | Sample Location | Result (mg/L) |
|------------------------------|------------------------|------------------------|----------------------|
| Total Dissolved Solids (TDS) | 400 ⁽¹⁾ | MW-1 | 454 |
| Total Dissolved Solids (TDS) | 400 ⁽¹⁾ | MW-10 | 458 |
| Uranium (U) | 0.03 ⁽²⁾ | MW-10 | 0.0363 |

(1) from 5 CCR 1002-41, Table 4

(2) Maximum Containment Level

No uranium speciation was performed on the sample from MW-10 as the analytical laboratory lost the sample, as noted above. For that sample, adjusted gross alpha was calculated as:

$$\text{Adjusted gross alpha (pCi/L)} = \text{Uranium (ug/L)} \times 0.67$$

For the samples from MW-1 and MW-3, Adjusted gross alpha was calculated as:

$$\text{Adjusted gross alpha (pCi/L)} = \text{measured gross alpha (pCi/L)} - [\text{U-234 (pCi/L)} + \text{U-238 (pCi/L)}]$$

Equations for calculating adjusted gross alpha were provided by N. Graziano, CDPHE, personal communication, November 30, 2022.

Except as noted above, quality assurance and validation of analytical data, field and laboratory operations, field sample handling and custody, and calibration procedures for field equipment indicate the data collected during 3Q 2022 monitoring met the objectives outlined in the Monitoring and Mitigation Plan.

Sincerely,
Tetra Tech

A handwritten signature in blue ink that reads "Fred Charles".

CASE NARRATIVE / CONFORMANCE SUMMARY

2

Client: Tetra Tech Longmont

Job No: DA49610

Site: Parkdale Quarry

Report Date 10/13/2022 9:11:48 A

On 09/30/2022, 3 sample(s), 0 Trip Blank(s), and 0 Field Blank(s) were received at SGS North America Inc. (SGS) at a temperature of 3.2 °C. The samples were intact and properly preserved, unless noted below. An SGS Job Number of DA49610 was assigned to the project. The lab sample ID, client sample ID, and date of sample collection are detailed in the report's Results Summary.

Specified quality control criteria were achieved for this job except as noted below. For more information, please refer to the analytical results and QC summary pages.

General Chemistry By Method EPA300.0

Matrix: AQ

Batch ID: GP32671

- All samples were prepared within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA49610-3MS, DA49610-3MSD were used as the QC samples for the Chloride, Nitrogen, Nitrite, Sulfate, Chloride, Nitrogen, Nitrate analysis.
- The matrix spike (MS) recovery(s) of Nitrogen, Nitrate are outside control limits. Spike recovery indicates possible matrix interference and/or sample nonhomogeneity.
- The matrix spike duplicate (MSD) recovery(s) of Nitrogen, Nitrate are outside control limits. Probable cause due to matrix interference.

SGS certifies that data reported for samples received, listed on the associated custody chain or analytical task order, were produced to specifications meeting SGS's Quality System precision, accuracy and completeness objectives except as noted.

Estimated non-standard method measurement uncertainty data is available on request, based on quality control bias and implicit for standard methods. Acceptable uncertainty requires tested parameter quality control data to meet method criteria.

SGS is not responsible for data quality assumptions if partial reports are used and recommends that this report be used in its entirety. This report is authorized by SGS indicated via signature on the report cover.

CASE NARRATIVE / CONFORMANCE SUMMARY

Client: Tetra Tech Longmont

Job No: DA49619

Site: Parkdale Quarry

Report Date 11/29/2022 4:22:02 P

On 09/30/2022, 2 sample(s), 0 Trip Blank(s), and 0 Field Blank(s) were received at SGS North America Inc. (SGS) at a temperature of 4 °C. The samples were intact and properly preserved, unless noted below. An SGS Job Number of DA49619 was assigned to the project. The lab sample ID, client sample ID, and date of sample collection are detailed in the report's Results Summary.

Specified quality control criteria were achieved for this job except as noted below. For more information, please refer to the analytical results and QC summary pages.

Metals Analysis By Method EPA 200.7

Matrix: AQ

Batch ID: MP36189

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA49484-1MS, DA49484-1MSD were used as the QC samples for the metals analysis.

Metals Analysis By Method EPA 200.8

Matrix: AQ

Batch ID: MP36471

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA51003-1MS, DA51003-1MSD were used as the QC samples for the metals analysis.

General Chemistry By Method CALCULATION

Matrix: AQ

Batch ID: R59078

- The data for CALCULATION meets quality control requirements.
- DA49619-1F for Chromium, Trivalent: Calculated as: (Chromium) - (Chromium, Hexavalent)

Matrix: AQ

Batch ID: R59082

- The data for CALCULATION meets quality control requirements.
- DA49619-2F for Chromium, Trivalent: Calculated as: (Chromium) - (Chromium, Hexavalent)

General Chemistry By Method EPA300.0

| | |
|-------------------|--------------------------|
| Matrix: AQ | Batch ID: GP32671 |
|-------------------|--------------------------|

- All samples were prepared within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA49610-3MS, DA49610-3MSD were used as the QC samples for the Chloride, Fluoride, Nitrogen, Nitrite, Sulfate, Chloride, Nitrogen, Nitrate analysis.
- The matrix spike (MS) recovery(s) of Nitrogen, Nitrate are outside control limits. Spike recovery indicates possible matrix interference and/or sample nonhomogeneity.
- The matrix spike duplicate (MSD) recovery(s) of Nitrogen, Nitrate are outside control limits. Probable cause due to matrix interference.
- DA49619-2 for Nitrogen, Nitrite: Elevated detection limit due to matrix interference.
- DA49619-1 for Nitrogen, Nitrite: Elevated detection limit due to matrix interference.

General Chemistry By Method SM 2540D-2011

| | |
|-------------------|--------------------------|
| Matrix: AQ | Batch ID: GN57880 |
|-------------------|--------------------------|

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA49634-1DUP were used as the QC samples for the Solids, Total Suspended analysis.

General Chemistry By Method SM 3500CR B-2011

| | |
|-------------------|--------------------------|
| Matrix: AQ | Batch ID: GN57980 |
|-------------------|--------------------------|

- All method blanks for this batch meet method specific criteria.
- Sample(s) DA42058-21DUP, DA42058-21MS, DA42058-21MSD were used as the QC samples for the Chromium, Hexavalent analysis.
- The following samples were run outside of holding time for method SM 3500CR B-2011: DA49619-1F, DA49619-2F Sample preserved within 24hrs. to extend the hold time.

General Chemistry By Method SM 4500NH3 D-2011

| | |
|-------------------|--------------------------|
| Matrix: AQ | Batch ID: GP32689 |
|-------------------|--------------------------|

- All samples were prepared within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) TD83200-3ADUP, TD83200-3AMS, TD83200-3AMSD were used as the QC samples for the Nitrogen, Ammonia analysis.

General Chemistry By Method SM 4500S2 F-2011

| | |
|-------------------|--------------------------|
| Matrix: AQ | Batch ID: GN57911 |
|-------------------|--------------------------|

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA49619-2DUP were used as the QC samples for the Sulfide analysis.

SGS certifies that data reported for samples received, listed on the associated custody chain or analytical task order, were produced to specifications meeting SGS's Quality System precision, accuracy and completeness objectives except as noted.

Estimated non-standard method measurement uncertainty data is available on request, based on quality control bias and implicit for standard methods. Acceptable uncertainty requires tested parameter quality control data to meet method criteria.

SGS is not responsible for data quality assumptions if partial reports are used and recommends that this report be used in its entirety. This report is authorized by SGS indicated via signature on the report cover.

Technical Report for

Tetra Tech Longmont

Parkdale Quarry

117-8741008

SGS Job Number: DA49624

Sampling Dates: 09/28/22 - 09/29/22

Report to:

Tetra Tech Inc
351 Coffman Street
Longmont, CO 80501
ed.muller@tetrtech.com

ATTN: Edward Muller

Total number of pages in report: **59**

Test results contained within this data package meet the requirements of the National Environmental Laboratory Accreditation Program and/or state specific certification programs as applicable.

Rebecca L Nichols

Subject: Report Reissue for SGS Job: DA49624

As requested per your email, MDLs were added to the analyses.

This reissue report is complete. Please accept our apologies for any inconvenience this may have caused you.

Any questions or concerns should be directed to the undersigned at 303-425-6021.

Sincerely,

Rebecca L Nichols

Becky Nichols
General Manager

CASE NARRATIVE / CONFORMANCE SUMMARY

Client: Tetra Tech Longmont

Job No: DA49624

Site: Parkdale Quarry

Report Date 11/29/2022 4:22:27 P

On 09/30/2022, 3 sample(s), 0 Trip Blank(s), and 2 Field Blank(s) were received at SGS North America Inc. (SGS) at a temperature of 4 °C. The samples were intact and properly preserved, unless noted below. An SGS Job Number of DA49624 was assigned to the project. The lab sample ID, client sample ID, and date of sample collection are detailed in the report's Results Summary.

Specified quality control criteria were achieved for this job except as noted below. For more information, please refer to the analytical results and QC summary pages.

Metals Analysis By Method EPA 200.7

Matrix: AQ

Batch ID: MP36189

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA49484-1MS, DA49484-1MSD were used as the QC samples for the metals analysis.

Metals Analysis By Method EPA 200.8

Matrix: AQ

Batch ID: MP36177

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA49516-2FAMS, DA49516-2FAMSD were used as the QC samples for the metals analysis.

Matrix: AQ

Batch ID: MP36178

- The data for EPA 200.8 meets quality control requirements.

Matrix: AQ

Batch ID: MP36471

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA51003-1MS, DA51003-1MSD were used as the QC samples for the metals analysis.

General Chemistry By Method CALCULATION

Matrix: AQ

Batch ID: R59079

- The data for CALCULATION meets quality control requirements.
- DA49624-1F for Chromium, Trivalent: Calculated as: (Chromium) - (Chromium, Hexavalent)

Matrix: AQ

Batch ID: R59080

- The data for CALCULATION meets quality control requirements.
- DA49624-2F for Chromium, Trivalent: Calculated as: (Chromium) - (Chromium, Hexavalent)

Matrix: AQ

Batch ID: R59081

- The data for CALCULATION meets quality control requirements.
- DA49624-3F for Chromium, Trivalent: Calculated as: (Chromium) - (Chromium, Hexavalent)

General Chemistry By Method EPA 353.2/LACHAT

| | |
|-------------------|----------------------------|
| Matrix: AQ | Batch ID: N:GP42685 |
|-------------------|----------------------------|

- The data for EPA 353.2/LACHAT meets quality control requirements.
- DA49624-3 for Nitrogen, Nitrate + Nitrite: Analysis performed at SGS Dayton, NJ.
- DA49624-2 for Nitrogen, Nitrate + Nitrite: Analysis performed at SGS Dayton, NJ.
- DA49624-1 for Nitrogen, Nitrate + Nitrite: Analysis performed at SGS Dayton, NJ.

General Chemistry By Method EPA300.0

| | |
|-------------------|--------------------------|
| Matrix: AQ | Batch ID: GP32695 |
|-------------------|--------------------------|

- All samples were prepared within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA49605-1MS, DA49605-1MSD were used as the QC samples for the Fluoride analysis.

General Chemistry By Method SM 2540C-2011

| | |
|-------------------|--------------------------|
| Matrix: AQ | Batch ID: GN57885 |
|-------------------|--------------------------|

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA49682-1DUP were used as the QC samples for the Solids, Total Dissolved analysis.
- The duplicate RPD(s) for Solids, Total Dissolved are outside control limits for sample GN57885-D. High RPD due to possible sample nonhomogeneity.

General Chemistry By Method SM 2540D-2011

| | |
|-------------------|--------------------------|
| Matrix: AQ | Batch ID: GN57880 |
|-------------------|--------------------------|

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA49634-1DUP were used as the QC samples for the Solids, Total Suspended analysis.

General Chemistry By Method SM 3500CR B-2011

| | |
|-------------------|--------------------------|
| Matrix: AQ | Batch ID: GN57980 |
|-------------------|--------------------------|

- All method blanks for this batch meet method specific criteria.
- Sample(s) DA42058-21DUP, DA42058-21MS, DA42058-21MSD were used as the QC samples for the Chromium, Hexavalent analysis.
- The following samples were run outside of holding time for method SM 3500CR B-2011: DA49624-1F, DA49624-2F, DA49624-3F Sample preserved within 24hrs. to extend the hold time.
- DA49624-1F for Chromium, Hexavalent: Sample received outside the holding time.

General Chemistry By Method SW846 7.2/9040C

| | |
|-------------------|--------------------------|
| Matrix: AQ | Batch ID: GN57878 |
|-------------------|--------------------------|

- The data for SW846 7.2/9040C meets quality control requirements.

SGS certifies that data reported for samples received, listed on the associated custody chain or analytical task order, were produced to specifications meeting SGS's Quality System precision, accuracy and completeness objectives except as noted.

Estimated non-standard method measurement uncertainty data is available on request, based on quality control bias and implicit for standard methods. Acceptable uncertainty requires tested parameter quality control data to meet method criteria.

SGS is not responsible for data quality assumptions if partial reports are used and recommends that this report be used in its entirety. This report is authorized by SGS indicated via signature on the report cover.

CASE NARRATIVE / CONFORMANCE SUMMARY

Client: SGS Wheat Ridge, CO **Job No:** DA49624
Site: TETTCOL: Parkdale Quarry **Report Date** 10/6/2022 5:37:53 PM

On 10/04/2022, 2 Sample(s), 0 Trip Blank(s) and 1 Field Blank(s) were received at SGS North America Inc. at a maximum corrected temperature of 2.7 C. Samples were intact and chemically preserved, unless noted below. A SGS North America Inc. Job Number of DA49624 was assigned to the project. Laboratory sample ID, client sample ID and dates of sample collection are detailed in the report's Results Summary Section.

Specified quality control criteria were achieved for this job except as noted below. For more information, please refer to the analytical results and QC summary pages.

Compounds qualified as out of range in the continuing calibration summary report are acceptable as per method requirements when there is a high bias but the sample result is non-detect.

General Chemistry By Method EPA 353.2/LACHAT

Matrix: AQ **Batch ID:** GP42685

- All samples were prepared within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JD52358-2DUP, JD52358-2MS were used as the QC samples for Nitrogen, Nitrate + Nitrite.
- Matrix Spike Recovery(s) for Nitrogen, Nitrate + Nitrite are outside control limits. Spike recovery indicates possible matrix interference.

SGS North America Inc. certifies that data reported for samples received, listed on the associated custody chain or analytical task order, were produced to specifications meeting the Quality System precision, accuracy and completeness objectives except as noted.

Estimated non-standard method measurement uncertainty data is available on request, based on quality control bias and implicit for standard methods. Acceptable uncertainty requires tested parameter quality control data to meet method criteria.

SGS North America Inc. is not responsible for data quality assumptions if partial reports are used and recommends that this report be used in its entirety. Data release is authorized by SGS North America Inc indicated via signature on the report cover

Report of Analysis

ANALYTICAL SUMMARY REPORT

November 21, 2022

SGS Accutest
4036 Youngfield St
Wheat Ridge, CO 80033-3862

Work Order: C22110381

Project Name: DA49624R

Energy Laboratories, Inc. Casper WY received the following 3 samples for SGS Accutest on 11/9/2022 for analysis.

| Lab ID | Client Sample ID | Collect Date | Receive Date | Matrix | Test |
|---------------|------------------|----------------|--------------|---------|--------------------------|
| C22110381-001 | DA49624R-1R | 09/28/22 17:34 | 11/09/22 | Aqueous | Uranium, Isotopic, Total |
| C22110381-002 | DA49624R-2R | 09/29/22 8:50 | 11/09/22 | Aqueous | Same As Above |
| C22110381-003 | DA49624R-3R | 09/29/22 9:00 | 11/09/22 | Aqueous | Same As Above |

The analyses presented in this report were performed by Energy Laboratories, Inc., 2393 Salt Creek Hwy., Casper, WY 82601, unless otherwise noted. Any exceptions or problems with the analyses are noted in the report package. Any issues encountered during sample receipt are documented in the Work Order Receipt Checklist.

The results as reported relate only to the item(s) submitted for testing. This report shall be used or copied only in its entirety. Energy Laboratories, Inc. is not responsible for the consequences arising from the use of a partial report.

If you have any questions regarding these test results, please contact your Project Manager .

Standard Reporting Procedures:

Lab measurement of analytes considered field parameters that require analysis within 15 minutes of sampling such as pH, Dissolved Oxygen and Residual Chlorine, are qualified as being analyzed outside of recommended holding time.

Solid/soil samples are reported on a wet weight basis (as received) unless specifically indicated. If moisture corrected, data units are typically noted as -dry. For agricultural and mining soil parameters/characteristics, all samples are dried and ground prior to sample analysis.

The reference date for Radon analysis is the sample collection date. The reference date for all other Radiochemical analyses is the analysis date. Radiochemical precision results represent a 2-sigma Total Measurement Uncertainty.

Contact and Corrective Action Comments:

These sample were originally received in the lab on 10/03/2022. Teri emailed requesting additional analysis on remaining sample volume. Chantel S. Johnson 11/09/2022

These samples were preserved in the laboratory upon receipt 10/03/2022. All samples were received with pH 7, 2mL of HNO₃ was added to each sample to preserve to pH <2 Chantel S. Johnson 11/09/2022

Report of Analysis

ANALYTICAL SUMMARY REPORT

October 20, 2022

2

SGS Accutest
4036 Youngfield St
Wheat Ridge, CO 80033-3862

Work Order: C2210003 Quote ID: C5800

Project Name: DA49624X

Energy Laboratories, Inc. Casper WY received the following 3 samples for SGS Accutest on 10/3/2022 for analysis.

| Lab ID | Client Sample ID | Collect Date | Receive Date | Matrix | Test |
|--------------|------------------|----------------|--------------|---------|--|
| C2210003-001 | DA49624X-1X | 09/28/22 17:34 | 10/03/22 | Aqueous | Gross Alpha, Gross Beta, Total pH Check for Nitric Radiochem FIRST Radium 226 + Radium 228, Total Radium 226, Total Radium 228, Total Radon 222, Total |
| C2210003-002 | DA49624X-2X | 09/29/22 8:50 | 10/03/22 | Aqueous | Same As Above |
| C2210003-003 | DA49624X-3X | 09/29/22 9:00 | 10/03/22 | Aqueous | Same As Above |

The analyses presented in this report were performed by Energy Laboratories, Inc., 2393 Salt Creek Hwy., Casper, WY 82601, unless otherwise noted. Any exceptions or problems with the analyses are noted in the report package. Any issues encountered during sample receipt are documented in the Work Order Receipt Checklist.

The results as reported relate only to the item(s) submitted for testing. This report shall be used or copied only in its entirety. Energy Laboratories, Inc. is not responsible for the consequences arising from the use of a partial report.

If you have any questions regarding these test results, please contact your Project Manager .

Standard Reporting Procedures:

Lab measurement of analytes considered field parameters that require analysis within 15 minutes of sampling such as pH, Dissolved Oxygen and Residual Chlorine, are qualified as being analyzed outside of recommended holding time.

Solid/soil samples are reported on a wet weight basis (as received) unless specifically indicated. If moisture corrected, data units are typically noted as -dry. For agricultural and mining soil parameters/characteristics, all samples are dried and ground prior to sample analysis.

The reference date for Radon analysis is the sample collection date. The reference date for all other Radiochemical analyses is the analysis date. Radiochemical precision results represent a 2-sigma Total Measurement Uncertainty.

Contact and Corrective Action Comments:

1 out of 2 VOAs for DA49624-2 has headspace <1/4." MJ 10/3/2022

Samples for Radionuclides were received at pH~ 7, 2 mLs of HN03 was added per 250mL to preserve to pH <2.

| DA50244-1 | 10/18/22 | 13:32 BH | 10/20/22 | AQ | Ground Water |
| DA50244-1F | 10/18/22 | 13:32 BH | 10/20/22 | AQ | Groundwater Filtered |

CASE NARRATIVE / CONFORMANCE SUMMARY

Client: Martin Marietta Materials

Job No: DA50244

Site: Parkdale Project

Report Date 11/28/2022 7:01:14 P

On 10/20/2022, 1 sample(s), 0 Trip Blank(s), and 0 Field Blank(s) were received at SGS North America Inc. (SGS) at a temperature of 4 °C. The samples were intact and properly preserved, unless noted below. An SGS Job Number of DA50244 was assigned to the project. The lab sample ID, client sample ID, and date of sample collection are detailed in the report's Results Summary.

Specified quality control criteria were achieved for this job except as noted below. For more information, please refer to the analytical results and QC summary pages.

Metals Analysis By Method EPA 200.7

Matrix: AQ

Batch ID: MP36335

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA50258-1FMS, DA50258-1FMSD were used as the QC samples for the metals analysis.

Metals Analysis By Method EPA 200.8

Matrix: AQ

Batch ID: MP36289

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA50184-1FMS, DA50184-1FMSD were used as the QC samples for the metals analysis.

Matrix: AQ

Batch ID: MP36308

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA49959-7MS, DA49959-7MSD were used as the QC samples for the metals analysis.

General Chemistry By Method EPA300.0

Matrix: AQ

Batch ID: GP32847

- All samples were prepared within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA50258-2MS, DA50258-2MSD were used as the QC samples for the Chloride, Fluoride, Nitrogen, Nitrate, Nitrogen, Nitrite, Sulfate, Chloride analysis.
- DA50244-1 for Nitrogen, Nitrite: Elevated detection limit due to matrix interference.

General Chemistry By Method SM 2540C-2011

Matrix: AQ

Batch ID: GN58160

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA50311-1DUP were used as the QC samples for the Solids, Total Dissolved analysis.

General Chemistry By Method SM 2540D-2011

Matrix: AQ

Batch ID: GN58141

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA50232-1DUP were used as the QC samples for the Solids, Total Suspended analysis.
- The duplicate RPD(s) for Solids, Total Suspended are outside control limits for sample GN58141-DUP. RPD acceptable due to low duplicate and sample concentrations.

General Chemistry By Method SW846 7.2/9040C

Matrix: AQ

Batch ID: GN58151

- The data for SW846 7.2/9040C meets quality control requirements.
- DA50244-1 for Corrosivity as pH: Non Corrosive

Field Data By Method FIELD

Matrix: AQ

Batch ID: R59232

- The data for FIELD meets quality control requirements.

SGS certifies that data reported for samples received, listed on the associated custody chain or analytical task order, were produced to specifications meeting SGS's Quality System precision, accuracy and completeness objectives except as noted.

Estimated non-standard method measurement uncertainty data is available on request, based on quality control bias and implicit for standard methods. Acceptable uncertainty requires tested parameter quality control data to meet method criteria.

SGS is not responsible for data quality assumptions if partial reports are used and recommends that this report be used in its entirety. This report is authorized by SGS indicated via signature on the report cover.

ANALYTICAL SUMMARY REPORT

November 21, 2022

SGS Accutest
4036 Youngfield St
Wheat Ridge, CO 80033-3862

Work Order: C22100848 Quote ID: C5800

Project Name: DA50244X

Energy Laboratories, Inc. Casper WY received the following 1 sample for SGS Accutest on 10/21/2022 for analysis.

| Lab ID | Client Sample ID | Collect Date | Receive Date | Matrix | Test |
|---------------|------------------|----------------|--------------|---------|--|
| C22100848-001 | DA50244X-1X | 10/18/22 13:32 | 10/21/22 | Aqueous | Gross Alpha, Gross Beta, Total Radium 226 + Radium 228, Total Radium 226, Total Radium 228, Total Radon 222, Total |

The analyses presented in this report were performed by Energy Laboratories, Inc., 2393 Salt Creek Hwy., Casper, WY 82601, unless otherwise noted. Any exceptions or problems with the analyses are noted in the report package. Any issues encountered during sample receipt are documented in the Work Order Receipt Checklist.

The results as reported relate only to the item(s) submitted for testing. This report shall be used or copied only in its entirety. Energy Laboratories, Inc. is not responsible for the consequences arising from the use of a partial report.

If you have any questions regarding these test results, please contact your Project Manager .

| Lab ID: C22100980-001ADUP | 3 | Sample Duplicate | | | | | | | | | |
| Radium 228 | | 0.62 | pCi/L | | | | | | 66 | 30 | UR |
| Radium 228 precision (\pm) | | 0.66 | pCi/L | | | | | | | | |
| Radium 228 MDC | | 1.1 | pCi/L | | | | | | | | |

- Duplicate RPD is outside of the acceptance range for this analysis. However, the RER is less than the limit of 3, the RER result is 0.65.

Qualifiers:

RL - Analyte Reporting Limit

ND - Not detected at the Reporting Limit (RL)

R - Relative Percent Difference (RPD) exceeds advisory limit

U - Not detected at Minimum Detectable Concentration (MDC)

Standard Reporting Procedures:

Lab measurement of analytes considered field parameters that require analysis within 15 minutes of sampling such as pH, Dissolved Oxygen and Residual Chlorine, are qualified as being analyzed outside of recommended holding time.

Solid/soil samples are reported on a wet weight basis (as received) unless specifically indicated. If moisture corrected, data units are typically noted as -dry. For agricultural and mining soil parameters/characteristics, all samples are dried and ground prior to sample analysis.

The reference date for Radon analysis is the sample collection date. The reference date for all other Radiochemical analyses is the analysis date. Radiochemical precision results represent a 2-sigma Total Measurement Uncertainty.

Contact and Corrective Action Comments:

The COC was not signed when relinquished.

The collection times on the bottles vary from the COC.

Report of Analysis

ANALYTICAL SUMMARY REPORT

November 21, 2022

SGS Accutest
4036 Youngfield St
Wheat Ridge, CO 80033-3862

Work Order: C22100848 Quote ID: C5800

Project Name: DA50244X

Energy Laboratories, Inc. Casper WY received the following 1 sample for SGS Accutest on 10/21/2022 for analysis.

| Lab ID | Client Sample ID | Collect Date | Receive Date | Matrix | Test |
|---------------|------------------|----------------|--------------|---------|--|
| C22100848-001 | DA50244X-1X | 10/18/22 13:32 | 10/21/22 | Aqueous | Gross Alpha, Gross Beta, Total Radium 226 + Radium 228, Total Radium 226, Total Radium 228, Total Radon 222, Total |

The analyses presented in this report were performed by Energy Laboratories, Inc., 2393 Salt Creek Hwy., Casper, WY 82601, unless otherwise noted. Any exceptions or problems with the analyses are noted in the report package. Any issues encountered during sample receipt are documented in the Work Order Receipt Checklist.

The results as reported relate only to the item(s) submitted for testing. This report shall be used or copied only in its entirety. Energy Laboratories, Inc. is not responsible for the consequences arising from the use of a partial report.

If you have any questions regarding these test results, please contact your Project Manager .

Standard Reporting Procedures:

Lab measurement of analytes considered field parameters that require analysis within 15 minutes of sampling such as pH, Dissolved Oxygen and Residual Chlorine, are qualified as being analyzed outside of recommended holding time.

Solid/soil samples are reported on a wet weight basis (as received) unless specifically indicated. If moisture corrected, data units are typically noted as -dry. For agricultural and mining soil parameters/characteristics, all samples are dried and ground prior to sample analysis.

The reference date for Radon analysis is the sample collection date. The reference date for all other Radiochemical analyses is the analysis date. Radiochemical precision results represent a 2-sigma Total Measurement Uncertainty.

Contact and Corrective Action Comments:

The COC was not signed when relinquished.

The collection times on the bottles vary from the COC.

CASE NARRATIVE / CONFORMANCE SUMMARY

Client: Martin Marietta Materials

Job No: DA50245

Site: Parkdale Project

Report Date 11/28/2022 7:01:48 P

On 10/20/2022, 1 sample(s), 0 Trip Blank(s), and 0 Field Blank(s) were received at SGS North America Inc. (SGS) at a temperature of 4 °C. The samples were intact and properly preserved, unless noted below. An SGS Job Number of DA50245 was assigned to the project. The lab sample ID, client sample ID, and date of sample collection are detailed in the report's Results Summary.

Specified quality control criteria were achieved for this job except as noted below. For more information, please refer to the analytical results and QC summary pages.

Metals Analysis By Method EPA 200.7

Matrix: AQ

Batch ID: MP36335

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA50258-1FMS, DA50258-1FMSD were used as the QC samples for the metals analysis.

Metals Analysis By Method EPA 200.8

Matrix: AQ

Batch ID: MP36289

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA50184-1FMS, DA50184-1FMSD were used as the QC samples for the metals analysis.

Matrix: AQ

Batch ID: MP36308

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA49959-7MS, DA49959-7MSD were used as the QC samples for the metals analysis.

General Chemistry By Method EPA300.0

Matrix: AQ

Batch ID: GP32847

- All samples were prepared within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA50258-2MS, DA50258-2MSD were used as the QC samples for the Chloride, Fluoride, Nitrogen, Nitrate, Nitrogen, Nitrite, Sulfate, Chloride analysis.

General Chemistry By Method SM 2540C-2011

Matrix: AQ

Batch ID: GN58160

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA50311-1DUP were used as the QC samples for the Solids, Total Dissolved analysis.

General Chemistry By Method SM 2540D-2011

Matrix: AQ

Batch ID: GN58141

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) DA50232-1DUP were used as the QC samples for the Solids, Total Suspended analysis.
- The duplicate RPD(s) for Solids, Total Suspended are outside control limits for sample GN58141-DUP. RPD acceptable due to low duplicate and sample concentrations.

General Chemistry By Method SW846 7.2/9040C

Matrix: AQ

Batch ID: GN58151

- The data for SW846 7.2/9040C meets quality control requirements.
- DA50245-1 for Corrosivity as pH: Non Corrosive

Field Data By Method FIELD

Matrix: AQ

Batch ID: R59233

- The data for FIELD meets quality control requirements.

SGS certifies that data reported for samples received, listed on the associated custody chain or analytical task order, were produced to specifications meeting SGS's Quality System precision, accuracy and completeness objectives except as noted.

Estimated non-standard method measurement uncertainty data is available on request, based on quality control bias and implicit for standard methods. Acceptable uncertainty requires tested parameter quality control data to meet method criteria.

SGS is not responsible for data quality assumptions if partial reports are used and recommends that this report be used in its entirety. This report is authorized by SGS indicated via signature on the report cover.

Report of Analysis

ANALYTICAL SUMMARY REPORT

November 21, 2022

2

SGS Accutest
4036 Youngfield St
Wheat Ridge, CO 80033-3862

Work Order: C22100849 Quote ID: C5800

Project Name: DA50245X

Energy Laboratories, Inc. Casper WY received the following 1 sample for SGS Accutest on 10/21/2022 for analysis.

| Lab ID | Client Sample ID | Collect Date | Receive Date | Matrix | Test |
|---------------|------------------|----------------|--------------|---------|--|
| C22100849-001 | DA50245X; 1X | 10/18/22 17:37 | 10/21/22 | Aqueous | Gross Alpha, Gross Beta, Total Radium 226 + Radium 228, Total Radium 226, Total Radium 228, Total Radon 222, Total Uranium, Isotopic, Total |

The analyses presented in this report were performed by Energy Laboratories, Inc., 2393 Salt Creek Hwy., Casper, WY 82601, unless otherwise noted. Any exceptions or problems with the analyses are noted in the report package. Any issues encountered during sample receipt are documented in the Work Order Receipt Checklist.

The results as reported relate only to the item(s) submitted for testing. This report shall be used or copied only in its entirety. Energy Laboratories, Inc. is not responsible for the consequences arising from the use of a partial report.

If you have any questions regarding these test results, please contact your Project Manager .

Report Approved By:

CLIENT: SGS Accutest

Standard Reporting Procedures:

Lab measurement of analytes considered field parameters that require analysis within 15 minutes of sampling such as pH, Dissolved Oxygen and Residual Chlorine, are qualified as being analyzed outside of recommended holding time.

Solid/soil samples are reported on a wet weight basis (as received) unless specifically indicated. If moisture corrected, data units are typically noted as -dry. For agricultural and mining soil parameters/characteristics, all samples are dried and ground prior to sample analysis.

The reference date for Radon analysis is the sample collection date. The reference date for all other Radiochemical analyses is the analysis date. Radiochemical precision results represent a 2-sigma Total Measurement Uncertainty.

Contact and Corrective Action Comments:

The COC was not signed when relinquished.

The collection times on the bottles vary from the COC.
