Re: Annual Report M1981-207, Blue Pit

03/06/2023

Mining has continued West and North in the past year. Additional mining is being performed with haul trucks to remove the southwest floor area. Approximately 42,000 cubic yards of imported inert fill dirt was placed mid-mining area to raise floor to lessen reclaim slope height.

A handwritten signature in blue ink, appearing to read "S Mello", is positioned above a solid horizontal line.
