Dear Clayton:
Here are the PDFs of the corrected pages:
Page 2, Beginning excavation would be 15 March 2023 or as soon as possible after the permit is issued. Correct shown in red at bottom of page 2.
Exhibit A. The names of adjacent landowners have been added using letters on the map in the upper left corner and a table below that. The actual immediately adjacent landowners are just the Fergusons themselves (who own the excavation area) and Steve and Joyce Wright (who own the Lob Lolly Pit west of the highway), but we included the other nearby landowners.
Reclamation Estimate:
The total area of 3.8 acres includes the pond. The pond water surface will vary based on water levels in the river from 2.0 to 3.0 acres, so with an average of 2.5 acres, that leaves 1.3 acres of dry land, of which about 0.2 acres are road, so that would give 1.1 acres of land requiring seeding, assuming average water surface.
I did not see any place on the form to show this, so added it to item 12 of Exhibit D (application page 16).
Please let me know if I need to submit a formal cover letter, or if this email will work.

Nathan
