

Rock Dog #1 Pit

File M-2005-045

Currently affected area is 27 acres. 2 additional acres were affected in 2022. Approximately 3 acres are planned to be affected in 2023. No areas were reclaimed.

No major weed infestations were observed in the 2022-23 reporting year and no major weed treatment was necessary this year. Monitoring is ongoing. We are considering a new eco-friendly weed treatment using goats.
