**Keenesburg Mine First Quarter 2021
Pest & Disease Inspection**

On March 31, 2021 Habitat Management inspected the operational, bonded reclaimed, and shop areas at the Keenesburg Mine for plant pests, plant diseases, and noxious weeds that could or have affected establishment of vegetation on reclaimed lands. The following areas were inspected:

- Office/shop/facility area;
- Bonded reclamation;
- Permanent sediment ponds; and
- Undisturbed land within the permit boundary.

These areas are depicted on Map 1.

Plant pests or diseases were not observed within the areas inspected. The vegetation has not been adversely affected by plant pests. Areas affected by infestation or blight were not identified during this inspection. No areas were observed where noxious weeds, plant pests or plant disease had adversely impacted the normal growth and establishment of vegetation on reclaimed lands.

**Keenesburg Mine -2nd Quarter 2022
Pest & Disease Inspection**

On June 3, 2022 Habitat Management inspected the operational, bonded reclaimed, and shop areas at the Keenesburg Mine for plant pests, plant diseases, and noxious weeds that could or have affected establishment of vegetation on reclaimed lands. The following areas were inspected and are depicted on Map 1:

- Office/shop/facility area;
- Bonded reclamation;
- Permanent sediment ponds; and,
- Undisturbed land within the permit boundary.

Plant pests or diseases were not observed within the areas inspected. The vegetation has not been adversely affected by plant pests. Areas affected by infestation or blight were not identified during this inspection. No areas were observed where noxious weed species were impacting normal growth and establishment of vegetation on reclaimed lands.
