Hello, Ben

Please see the attached letter. Please note that DRMS management is requiring a response in 30 days.

Thanks,
Rob

**Re: Keenesburg Strip Mine (Permit No. C-1981-028),
Review of 2022 Annual Reclamation Report**

Dear Ben:

I have performed a review of your 2022 Annual Reclamation Report (ARR), and I have two adequacy items:

1. A map needs to be provided with the ARR. It is not sufficient to reference the Vegetation Monitoring report. This map needs to include the current numbering of areas, for example Area 43 entails the reclaimed roads near the eastern portion of the permit area.
2. The text in the ARR needs to explain the values in the ARR Form. In particular, explain the values under the Acres Seeded section. Were the values of 3.65 and 170.98 subtracted because of re-seeding of areas or for another reason? Please explain this in detail.

It is noted that the Division interprets the submittal date of February 28 (extended to 14 March this year) as the complete and accurate submittal of the Annual Reclamation Report covering the previous calendar year for all areas under bond. As such, please provide all responses to the Division's review of the Annual Reclamation Report within thirty (30) days of the date of this review.

Should you have questions or need additional information, please contact me at 720.601.2276 or at rob.zuber@state.co.us.

Sincerely,

Robert D. Zuber, P.E.
Environmental Protection Specialist
