Re: Permit No. M-1980-244; Cripple Creek & Victor Gold Mining Company; Cresson Project; Adequacy Review Response to Technical Revision 134 – Magnesium Chloride Tank Relocation

Dear Mr. Russell:

On March 2, 2023 Newmont Corporation's Cripple Creek and Victor Gold Mining Company (CC&V) received the Division of Reclamation, Mining, and Safety (DRMS) first adequacy review of Technical Revision (TR) 134 to Permit M-1980-244, proposing the relocation of three (3) Magnesium Chloride tanks.

Please see DRMS comments from adequacy review #1 in **bold** followed by CC&V's responses in *italics*.

1. **The TR134 submittal included an aerial photo displaying the former and current location of the magnesium chloride tanks. Please update and submit Drawing C-2 Existing and Approved Facilities to show the new location of the magnesium chloride tanks. Note the approved Drawing C-2 on file was last updated on November 5, 2020. Therefore, for consistency, please also revise Drawing C-2 to display the following approved revision on the C-2 map.**
 - a. **TR128 – realigned access road from County Road 82 to the Ironclad Facilities**
 - b. **TR133 – WHEX Clay Borrow Source Pit**
 - c. **SA4 – Autonomous Haulage Tower Extension at Powder Keg and Iron Hill sites.**
 - d. **SA6 – Autonomous Haulage Tower Extension at Joe Dandy site**

The map has been revised to include the magnesium chloride tank relocation, realigned access road, WHEX Clay Borrow Source, and Autonomous Haulage Tower Extensions at the Powder Keg, Iron Hill, and Joe Dandy.

Should you require further information, please do not hesitate to contact Johnna Gonzalez at (719) 313-0447, Johnna.Gonzalez@Newmont.com, or myself at Katie.Blake@Newmont.com.

Sincerely,

DocuSigned by:
