Dryland Pasture Mix

A mixture of hardy, cool season grasses, that are drought tolerant and adapt well to the Northern Great Intermountain regions. It provides a good, palatable spring forage and fair regrowth in the fall. This mix may produce a hay crop depending upon available moisture. Widely adapted to many soil types and elevations of 3,000 to 10,000 feet. Ideal for areas not receiving regular irrigation.

Characteristics Grows 30-48 inches at full potential.
 Great forage and hay producer.

Seeding Rate:

New Seeding

Broadcast: 20-25 lbs/acre

Drilled: 15-20 lbs/acre

Overseeding

Broadcast: 10-15 lbs/acre

Drilled: 5-10 lbs/acre

Mix contains:

20% Tetraploid Perennial Rye

Bunchgrass with germination in 5-10 days.

One of the most widely used grasses and is adaptable to a wide variety of soils and climate conditions. It is leafy and fine stemmed.

20% Smooth Brome, Lincoln

Sod Forming grass with germination in 10-14 days

Smooth brome is resistant to drought and extremes in temperature. Lincoln smooth brome is the most widely used of the cultivated brome grasses.

15% Paiute Orchardgrass

Bunchgrass with germination in 14-21 days.

One of the earliest species to exhibit growth in the spring, making tremendous forage potential during cool conditions. Performs well on different textured soils. Is a great forage and hay producer.

15% Hycrest Crested Wheatgrass

Bunchgrass with germination in 14-21 days.

A hybrid cross between Standard and Desert wheatgrass, resulting in a plant with excellent seedling vigor that establishes quickly. It is taller and has higher forage yield potential than its parents.

15% Pubescent Wheatgrass

Cool season, sod-forming with germination in 21-28 days.

Stays green into the summer months when soil moisture is adequate.

15% Dahurian Wildrye

Bunchgrass with germination in 7 - 21 days.

Deep rooted allowing good drought tolerance. Regrows aggressively after cutting and grazing, providing excellent palatable forage.

Formulations & varieties are subject to change without notice!

Hi Amber,

Here are pictures of the dirt pile before and then the dirt pile after we moved it. Let us know if you need anything else.
