Hi Wyatt.

Yes, I see the report was submitted with the annual report. I'll update the permit system to show it was received, however the report is very difficult to read in the format submitted. The headers are not carried through each page, the dates are not shown for MW9-MW17, and there are no page numbers. Will you send me the data in a different format? Perhaps a horizontal 11x17 so all the monitoring wells are on one page like the attached report from 2022. Also, per Patrick's request in a letter to Neil Whitmer on March 1, 2022, please also include a graphical representation of the data to date. A cover letter would also be appreciated, noting any changes in the water levels, if any, and a statement about whether the levels indicate a trigger point for mitigation.

Please reach out to me if you have any questions.

Neil received this e-mail pertaining to groundwater data for Tucson South. I believe this was included in the online report I filed in January. Attached for your reference.
