Subject: Who can I contact

To: brandon.neal@state.co.us <brandon.neal@state.co.us>

Mr. Brandon: I hope you can tell me who to contact for help with a problem we are having with the Cripple Creek & Victor (Newmont) mine here in Cripple Creek. My wife is coughing up a storm due to very high air quality problems we believe is caused by something the mine is doing on weekends at 9 AM. our 2.5 air quality monitor goes from a normal reading of 2-8% to 127, 109, 96 and lasts for about an hour.

These high, worrisome values, are enough to set my 82 year old wife to coughing for the entire day. We have had many visits from the mines' external relations people assuring us that the mine complies with the outdoor PM10 regulations. Our readings are indoors with double pane windows protecting us. The mine does not blast Friday-Sunday so may be doing cleaning with a harsh chemical.

I have many e-mails to share with the right person - can you help?.
