Hello Ms. McKee-Huth,

Attached are two maps provided from the application. Please note that the comment period for this application has already closed (111 ap is only 5 days). So any comments received will be noted but any objections will require an appeal of the Divisions decision.

For clarifications is your agency requesting maps of all proposed permit sites for your review or is this a site specific requirement? Right now our noticing process does not allow for us to attach maps. So I would have to coordinate with management if this is a need going forward.

Hi Ms. Yeldell ,

I am reviewing the referenced permit application we received on April 10, 2023, and I would like to request a map that clearly shows the permit boundary. Specifically, we request a topographic map showing the boundary of the proposed action. An aerial map and coordinates is sometimes helpful as well, but it should be for the location of the proposed action. We understand that sometimes this information is provided in the permit documents on the DNR website, but locating this information on the website can prove to be difficult and not always helpful for the purposes of reviewing and identifying potential resources in the area of the proposed action. As such, we request that the appropriate maps be sent directly to us. If the locational information requested cannot be provided, our response will include data for the entire Township(s), Range(s), and Section(s) provided in your letter.

As a reminder, the State Register Act gives the SHPO 30 calendar days to provide a response to the state agency. If the response is to ask for additional information to be able to render a comprehensive and accurate response, the 30-day 'clock' will pause and restart at zero when the SHPO receives the information it requested.

Thank you,

Holly McKee-Huth
