Per your letter dated April 11, 2023 please find attached the data you requested. The wells were installed August of 2022 and our geologist put locks on the caps and unfortunately our employee that reads the wells every month did not get the key so he thought someone else was reading them. I didn't notice until I collected his log to input for the annual report that we had not been collecting data. Issue is now resolved and will be collecting monthly moving forward. The numbers in red, the surveyor missed when he was collecting data and will get that later this week. If you need that data to consider this complete, please accept this email as our request for a one week extension.

**Subject:** Riverbend West Monitoring Well Data Letter

### EXTERNAL EMAIL

Julie,

The corrective action letter for the missing monitoring well data for the Riverbend Operation is attached.

Please submit the data as soon as possible.

Peter S. Hays
