**RE: Logan Wash Mine, Permit No. M-1977-424, Inspection Problem Abated and Retort Mine
Water Spill Acknowledgement**

Dear Mr. Smith:

On April 21, 2023 the Division of Reclamation, Mining and Safety (Division) conducted an inspection of the above referenced site in response to the spill notification received on April 14, 2023. Availability of Records was cited as a problem because the Division had not yet received the formal written notification as required by Rule 8.2. Corrective actions required you a written report of the event pursuant to Rules 8.2.2 and 8.2.3 by the corrective action date.

On May 2, 2023 the Division received the requested report. This satisfies the corrective action and it is considered abated. Based on the results the Division is not requiring additional remediation work.

If you require additional information, or have questions or concerns, please feel free to contact me.

Sincerely,

Amy Yeldell
Environmental Protection Specialist

EC: Travis Marshall, Senior EPS, DRMS
Scott Hall, BLM
David Anderson, Oxy
